

### INDEPENDENT AUDITOR'S REPORT

To the Shareholders of First Citizens Bank Limited and its subsidiaries

### Report on the audit of the consolidated financial statements

### Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of First Citizens Bank Limited (the Bank) and its subsidiaries (together 'the Group') as at 30 September 2020, and their consolidated financial performance and their consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

#### What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statement of financial position as at 30 September 2020;
- the consolidated income statement for the year then ended;
- · the consolidated statement of comprehensive income for the year then ended;
- · the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

### Our audit approach

#### Overview

Overall group materiality: TT\$42 million, which represents 5% of profit before tax.

- The group audit included full scope audits of three significant components, two domiciled in Trinidad and Tobago and one in Barbados.
- The group audit covered 86% of profit before tax and 97% of total assets.
- IFRS 9 "Financial Instruments" Significant increase in credit risk -Loans to customers
- IFRS 9 'Financial Instruments' Forward-looking information

#### Audit scope

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including, among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

#### How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Our assessment of the components of the Group focused primarily on the Group's legal entities. Based on the individual financial significance and our risk assessment, the following components were subject to full scope audits for group audit purposes:

- First Citizens Bank Limited
- First Citizens Investment Services Limited
- First Citizens Bank Barbados Limited

In establishing the overall group audit strategy and plan, we determined the type of work that is needed to be performed at the components by the Group engagement team and by component auditors. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit work. Our group scoping provided coverage of approximately 86% of profit before tax and 97% of total assets of the Group. We performed consolidated risk assessment analytical procedures over the remaining components.

### Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

Overall group materiality	TT\$42 million
How we determined it	5% of profit before tax
Rationale for the materiality benchmark applied	We chose profit before tax as the benchmark because, in our view, it is the benchmark against which the performance of the Group is most commonly measured by users, and is a generally accepted benchmark. We chose 5% which is within a range of acceptable benchmark thresholds.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above TT\$2M, as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

#### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### Key audit matter

How our audit addressed the key audit matter

IFRS 9 'Financial Instruments' – Significant increase in credit risk - Loans to customers
Refer to note 3.a.iii to the consolidated financial statements for disclosures of related accounting policies and balances.

IFRS 9 outlines a three-stage model for impairment based on changes in credit quality since initial recognition. A financial instrument that is not credit impaired on initial recognition is classified in Stage 1 and has its credit risk continuously monitored by the Group. If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to Stage 2 but is not yet deemed to be credit impaired. If the financial instrument is credit-impaired, the financial instrument is then moved to Stage 3.

Financial instruments in Stage 1 have their expected credit loss ("ECL") measured at an amount equal to the portion of lifetime ECLs within the next twelve (12) months. Instruments in Stages 2 or 3 have their ECL measured based on ECLs on a lifetime basis.

The Group considered a loan to have experienced a SICR based on criteria which include:

- The loan becomes 31 days past due;
- The loan classification is downgraded to special mention:
- There is a downgrade based on the Group's internal credit rating from:
  - a) 3- or higher to 4 or lower; or
  - b) for those at 4+ or lower, to a three notch downgrade.

Due to the unprecedented economic impact of COVID-19 lockdown measures, the SICR criteria have been temporarily expanded to include a borrower level assessment of the industry, percentage of fixed operating costs, liquidity or where a facility has been significantly restructured.

Additionally, the Group defined a financial instrument as in default or credit impaired, when it meets one or more of the following quantitative or qualitative criteria:

- The borrower is more than ninety (90) days past due on its contractual payments

Our approach to addressing the matter involved the following procedures, amongst others:

- Updated our understanding of the Group's approach to identify SICR and application to staging in the ECL model.
- Tested the completeness and accuracy of the data used to assess whether SICR has occurred, by agreeing a sample to underlying source contracts.
- For a sample of loans, recalculated the number of days past due and agreed special mentions and downgrades based on the credit ratings to source documentation.
   These loans were then, traced to management's loan listing to evaluate whether they were accurately staged within the ECL model.
- Selected a sample of loans that management had not identified as in default or credit impaired and agreed to underlying source documentation to assess whether they had been appropriately classified based on management's quantitative and qualitative criteria.
- Additionally, we tested a sample of loans by reference to management's assessment forms to assess whether the additional SICR criteria in response to COVID-19, had been evaluated and accounted for by management.

The results of our procedures indicated that the assumptions used by management in determining SICR were not unreasonable.

### Key audit matters (continued)

### Key audit matter

How our audit addressed the key audit matter

IFRS 9 'Financial Instruments' – Significant increase in credit risk - Loans to customers

Refer to note 3.a.iii to the consolidated financial statements for disclosures of related accounting

statements for disclosures of related accounting policies and balances. (continued)

- The borrower meets unlikeliness to pay criteria (e.g. bankruptcy)
- There has been a modification to terms and conditions of the original loan agreement and where the change in the present value of the cash flows of the new proposed loan facility versus the original loan facility exceeds 10%

We have focused on this area due to the impact of COVID-19 on credit risk and increased complexities in management's assumptions and judgements required over loans to customers subject to SICR.

IFRS 9 'Financial Instruments' – Forward-looking information

Refer to notes 3.a.(vi) and 10 to the consolidated financial statements for disclosures of related accounting policies and balances.

In assessing impairment, IFRS 9 prescribes a forward-looking expected credit loss ("ECL") impairment model which takes into account reasonable and supportable forward-looking information.

As at 30 September 2020, the Group's loans to customers totalled TT\$19 billion. The Group's investment securities measured at amortised cost and fair value through other comprehensive income (FVOCI) totalled TT\$16.1 billion. In aggregate, the above exposures represent 74% of total assets. The resultant impairment, which incorporates forward-looking information, recorded under the expected credit loss (ECL) impairment model amounted to TT\$216.7 million for loans to customers and a writeback of TT\$3.4 million for investment securities.

Our approach to addressing the matter, with the assistance of our valuation specialists, involved the following procedures, amongst others:

- Updated our understanding of management's ECL model, including whether there were any changes to source data and assumptions.
- Compared the consistency of the macroeconomic indicators with those used in the comparative period.

#### Loans to customers:

 Assessed the reasonableness of the Group's methodology for determining economic scenarios and the probability weightings applied.

#### Key audit matters (continued)

### Key audit matter

How our audit addressed the key audit matter

IFRS 9 'Financial Instruments' – Forward-looking information

Refer to note 3.a.(vi) to the consolidated financial statements for disclosures of related accounting policies and balances (continued)

To incorporate forward-looking information into the model, the Group performed historical analyses and identified the key economic variables which impacted credit risk and expected credit losses for each portfolio. These variables are determined differently for loans and investments.

For loans to customers a scorecard model was developed, with macroeconomic factors and weightings which are based on management's judgement and experience. The main factors were unemployment rate, real GDP growth, inflation and a country specific factor. Management assessed unemployment to have a significant impact on the retail portfolio whilst real GDP growth was determined to have the highest impact and weighting on the corporate/commercial loan portfolio. Outlooks were determined for each of these variables to derive a weighted adjustment factor that was applied to the loan portfolios to reflect this forward-looking information.

For investment securities, management performed a scenario analysis to determine the impact of future economic conditions in each of the countries in which the group held securities. Thereafter a main macroeconomic indicator was determined, which was then statistically linked to the credit risk of the relevant sovereign via regression analysis.

We have focused on this area due to the number of significant assumptions made by management regarding possible future economic scenarios and the increased uncertainty impacting these assumptions due to COVID-19, which would impact the determination of the ECL balance as a whole.

- Evaluated the reasonableness of inputs into the downside scenarios as a result of COVID-19, by agreeing the forward-looking economic information, in particular unemployment rate, real GDP growth, inflation rates and country specific factors to external sources published or pronounced by reputable third parties.
- Recalculated management's ECL based on the scorecard model, including the weighted adjusted factor, which was applied to the loans to customers portfolio.
- Sensitised the probability weightings used in the ECL calculation.

#### Investment securities:

- Obtained a listing of the macroeconomic variables (MEVs) used to derive a single macroeconomic indicator and utilised in management's regression analysis for the four sovereign countries with the most significant ECL on investment securities:
  - Agreed a sample of historical MEVs used in the scenarios to external source information where available.
  - Recalculated a correlation coefficient between the historical MEVs and the sovereign credit risk rating and reperformed the regression analysis.
  - Sensitised the macroeconomic factors for sovereigns with significant investment concentration.

The results of our procedures indicated that the judgement and assumptions used by management in determining forward-looking information were not unreasonable.

### Other information

Management is responsible for the other information. The other information comprises the Annual Report (but does not include the consolidated financial statements and our auditor's report thereon), which is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

# Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

### Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the consolidated financial statements,
whether due to fraud or error, design and perform audit procedures responsive to those risks, and
obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of
not detecting a material misstatement resulting from fraud is higher than for one resulting from error,
as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of
internal control.

. - .

### Auditor's responsibilities for the audit of the consolidated financial statements (continued)

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Dwayne Rodriguez-Seijas.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Trinidad and Tobago dollars)

#### **General information**

First Citizens Bank Limited (the Bank) and its subsidiaries (together the Group) provide retail, commercial and corporate banking as well as investment banking services. The Group operates primarily in Trinidad and Tobago and the Eastern Caribbean region.

The Bank is a subsidiary of First Citizens Holdings Limited (Holdings), a company owned by the Government of the Republic of Trinidad and Tobago (GORTT), and its registered office is located at 9 Queen's Park East, Port of Spain. First Citizens Holdings has 64.43% controlling interest. The remainder of the shares are listed on the Trinidad and Tobago Stock Exchange and are publicly traded.

On 12 September 1993, the Workers' Bank (1989) Limited, National Commercial Bank of Trinidad and Tobago Limited and Trinidad Co-operative Bank Limited under and by virtue of vesting orders made by the Minister of Finance under section 49 of the Financial Institutions Act, 1993, were transferred to and became vested in the Bank.

All entities which were transferred to, or from which specific assets or liabilities were transferred to the Bank, were wholly owned or controlled by the Government of the Republic of Trinidad and Tobago (GORTT). Therefore, the transfers were recorded as a combination of interests under common control whereby all assets and liabilities transferred to the Bank were transferred at their carrying amounts in the accounts of the transferred or transferring entities at the dates of the respective transfers.

### The Group currently comprises the following entities:

Entity	Nature of operations	Country of incorporation	Ownership interest
First Citizens Depository Services Limited	The Company acts as custodian to third parties and provides paying agent services.	Trinidad & Tobago	100%
First Citizens Bank (Barbados) Limited	Banking, including the provision of mortgages for residential and commercial properties	Barbados	100%
First Citizens Costa Rica SA	Service related transactions	Costa Rica	100%
First Citizens Financial Services (St. Lucia) Limited	Selected banking and financial service operations	St. Lucia	100%
First Citizens Investment Services Limited and its subsidiaries	Investment & asset management services and repo business	Trinidad & Tobago	100%
First Citizens Trustee Services Limited	Provision of trustee, administration and paying agency services	Trinidad & Tobago	100%
The Group also has investments in the following entire	ties:		
Infolink Services Limited	Provision of automated banking reciprocity services	Trinidad & Tobago	25%
Trinidad and Tobago Interbank Payment System Limited	Automated clearing house	Trinidad & Tobago	14%
St. Lucia Electricity Services Limited	Provision of electrical power to consumers	St. Lucia	19%

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies**

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### a. Basis of preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and IFRS Interpretation Committee (IFRS IC) applicable to companies reporting under IFRS. These financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB). The consolidated financial statements are prepared under the historical cost convention as modified by the revaluation of freehold premises, Fair value through other comprehensive income financial assets, financial assets classified at fair value through profit or loss and the defined benefit pension plan.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

- (i) Standards, amendment and interpretations which are effective and have been adopted by the Group in the accounting period
  - IFRS 16 Leases (effective 1 January 2019). This standard specifies how an IFRS reporter will recognize, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term in 12 months and less or the underlying assets has a low value. Lessors continue to classify leases as operating or finance (Note 2.1).
  - IFRIC 23 Uncertainty over Income Tax Treatments (Effective 1 January 2019). The interpretation addresses the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12. It specifically considers:
  - Whether tax treatments should be considered collectively
  - Assumptions for taxation authorities' examinations
  - The determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
  - The effect of changes in facts and circumstances
  - IFRS 9 Amendment Prepayment Features with Negative Compensation (Effective 1 January 2019). This amends the existing requirements in IFRS 9 regarding termination rights in order to allow measurement at amortized cost (or, depending on the business model, at fair value through other comprehensive income) even in the case of negative compensation payments.
  - IAS 28 Amendments Long-term Interests in Associates and Joint Ventures (Effective 1 January 2019). This amendment clarifies that an entity applies IFRS 9 Financial Instruments to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture but to which the equity method is not applied.
  - IAS 19 Amendments Plan Amendment, Curtailment or Settlement (effective 1 January 2019). The amendments in Plan Amendment, Curtailment or Settlement (Amendments to IAS 19) are:
  - If a plan amendment, curtailment or settlement occurs, it is now mandatory that the current service cost and the net interest for the period after the remeasurement are determined using the assumptions used for the remeasurement.
  - In addition, amendments have been included to clarify the effect of a plan amendment, curtailment or settlement on the requirements regarding the asset ceiling.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- a. Basis of preparation (CONTINUED)
  - (ii) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group

The following standards, amendments and interpretations to existing standards are not yet effective for accounting periods beginning on or after 1 January 2020 and have not been early adopted by the Group:

- Amendments to IAS 1 and IAS 8 Definition of Material (Effective 1 January 2020). The amendments in Definition of Material (Amendments to IAS 1 and IAS 8) clarify the definition of 'material' and align the definition used in the Conceptual Framework and the standards.
- Amendments to IFRS 9, IAS 39 and IFRS 7 Interest Rate Benchmark Reform (Effective 1 January 2020). The amendments in Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7) clarify that entities would continue to apply certain hedge accounting requirements assuming that the interest rate benchmark on which the hedged cash flows and cash flows from the hedging instrument are based will not be altered as a result of interest rate benchmark reform.
- Amendment to IFRS 3 Amendments in Definition of a Business (Effective 1 January 2020). The amendments are changes to Appendix A Defined Terms, the application guidance, and illustrative examples of IFRS are:-
- clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and substantive process that together significantly contribute to the ability to create outputs:
- narrow the definitions of a business and of outputs by focusing on goods and services provided to customers and by removing the reference to an ability to reduce costs;
- add guidance and illustrative examples to help entities assess whether a substantive process has been acquired;
- remove the assessment of whether market participants are capable of replacing any missing inputs or processes and continuing to produce
- add an optional concentration test that permits a simplified assessment of whether an acquired set of activities and assets is not a business.
- Amendments to IFRS 16-COVID-19-Related Rent Concessions (Effective 1 June 2020). The amendment provides lessees with an exemption from assessing whether a COVID-19-Related Rent Concession is a lease modification.

The Group is in the process of assessing the impact of the new and revised standards not yet effective on the Financial Statements, we do not anticipate any material impact.

#### b. Consolidation

(i) Principles of consolidation

The consolidated financial statements include the accounts of the Bank and its wholly owned subsidiaries as outlined in Note 1. The financial statements of the consolidated subsidiaries used to prepare the consolidated financial statements were prepared as of the parent company's reporting date. The consolidation principles are unchanged as against the previous years'.

Inter-company transactions, balances and unrealized gains on transactions between Group companies are eliminated on consolidation. Unrealized losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies (CONTINUED)**

- b. Consolidation (CONTINUED)
  - (ii) Investment in subsidiaries

Subsidiaries are all entities, (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognizes any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of the acquiree's identifiable net assets.

### (iii) Business combinations and goodwill

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognized in profit or loss.

Any contingent consideration in relation to financial instruments to be transferred by the Group is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognized in either profit or loss or other comprehensive income in accordance with IFRS 9 Financial Instruments. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognized and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognized directly in the consolidated income statement.

### (iv) Transactions and non-controlling interests

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

### (v) Investment in joint ventures

The Group has applied IFRS 11 to all joint arrangements as of 1 October 2012. Under IFRS 11 investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor. The Group has assessed the nature of its joint arrangements and determined them to be joint ventures. Joint ventures are accounted for using the equity method.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- b. Consolidation (CONTINUED)
  - (v) Investment in joint ventures (CONTINUED)

Under the equity method of accounting, interests in joint ventures are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses and movements in other comprehensive income. When the Group's share of losses in a joint venture equals or exceeds its interests in the joint ventures (which includes any long-term interests that, in substance, form part of the Group's net investment in the joint ventures), the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the joint ventures.

### (vi) Investment in associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses and movements in other comprehensive income. The Group's investment in associates includes goodwill identified on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income is reclassified to profit or loss where appropriate.

The Group's share of post-acquisition profit or loss is recognized in the income statement, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, the Group does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognizes the amount adjacent to 'share of profit/ (loss) of associates' in the consolidated income statement.

Profits and losses resulting from upstream and downstream transactions between the Group and its associate are recognized in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealized losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

### c. Foreign currency translation

#### (i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements are presented in Trinidad and Tobago dollars, which is the Group's presentation currency. The exchange rate between the TT dollar and the US dollar as at the date of these statements was TT\$6.7124 = US\$1.00 (2019: TT\$6.6926 = US\$1.00), which represent the Group's mid rate. The exchange rate between the TT dollar and the Barbados dollar as at the date of these statements was TT\$3.4203 = BB\$1 (2019: TT\$3.4102 = BB\$1.00), which represent the Group's mid rate.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- c. Foreign currency translation (CONTINUED)
  - (ii) Transactions and balances

Foreign currency transactions are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated income statement.

Changes in the fair value of monetary securities denominated in foreign currency classified as fair value through other comprehensive income are analysed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortized cost are recognized in profit or loss and other changes in carrying amount are recognized in other comprehensive income. Translation differences on non-monetary items such as equities classified as fair value through other comprehensive income financial assets are included in other comprehensive income.

### (iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (b) income and expenses for each income statement are translated at average cover exchange rates for the financial year, and
- (c) all resulting exchange differences are recognized in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognized in other comprehensive income.

### d. Derivative financial instruments

Derivative financial instruments including swaps are initially recognized at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognizing the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. Fair values are obtained from quoted market prices, discounted cash flow models and options pricing models as appropriate. All derivatives are carried as assets when their fair value is positive and as labilities when negative.

- e. Financial assets and financial liabilities
  - (i) Financial assets

The Group classifies its financial assets based on the following business models:

- Fair value through profit or loss
- Fair value through other comprehensive income
- Amortized cost

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- e. Financial assets and financial liabilities (CONTINUED)
  - (i) Financial assets (CONTINUED)

Based on these factors, the Group classifies its assets into one of the following three measurement categories:

### Amortized cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI), and that are not designated at FVPL are measured at amortized cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognized and measured as described in note 3.a.v. Interest income from these financial assets is included in "Interest income" using the effective interest rate method.

Fair value through other comprehensive income (FVOCI)

Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets cash flows represents solely payments of principal and interest, and that are not designated at FVPL, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortized cost which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit and loss and recognized in "Net Investment Income". The interest income from these financial assets is included in "interest Income" using the effective interest rate method.

#### Fair value through profit or loss

Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognized in profit or loss and presented in the "income statement" within "Gains from investments securities" in the period in which it arises, unless it arises from debt instruments that were classified at fair value or which are not held at fair value through profit or loss, in which case they are presented in Investment Interest Income. Interest income from these financial assets is included in "Interest income" using the effective interest rate method.

#### (a) Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans, government and corporate bonds.

Classification and subsequent measurement of debt instruments depend on:

- (i) the Group's business model for managing the asset; and
- (ii) the cash flow characteristics of the asset.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- e. Financial assets and financial liabilities (CONTINUED)
  - (i) Financial assets (CONTINUED)
    - (a) Debt instruments (CONTINUED)

Group's business model

The business model reflects how the Group manages the assets in order to generate cash flows. An assessment is made at a portfolio level and includes an analysis of factors such as:

- The stated objective and policies of the portfolio and the operation of those in practice. More specifically whether the Group's objective is solely to collect the contractual cash flows from the assets or to collect both the contractual cash flows and cash flows arising from the sale of the assets.
- Past experience on how the cash flows for these assets were collected.
- Determination of performance targets for the portfolio, how evaluated and reported to key management personnel.
- · Managements identification of and response to various risks, which includes but not limited to, liquidity risk, market risk, credit risk, interest rate risk.
- Management considers, in classifying its assets, the level of historical sales and forecasted liquidity requirements.

Arising out of the assessment the portfolios were deemed to have the business models identified as follows:

Amortized Cost	Fair Value Through Other Comprehensive Income	Fair Value Through Profit or Loss
Corporate and Commercial Loans	ОМО	Actively Traded (Capital Gains) Portfolio
Retail Loans	Treasury Notes	Floating NAV Funds*
Credit Cards	Bonds Issued by or guaranteed by Government of Trinidad & Tobago	Fixed NAV Funds** - cash & cash equivalents
Bonds Issued by or guaranteed by Government of Trinidad & Tobago (GORTT)	Eurobonds	
Non-Eurobonds maturing in greater than 3 years at recognition	Treasury Bills	
Loans & receivables	Canadian Treasury Bills	
Securities sold under repurchase agreements to clients and brokers	Non-Eurobonds maturing in less than 3 years at recognition	
Long Term Borrowings from brokers in the form of Total Return Swaps	Cash	
Medium Term Notes		

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- e. Financial assets and financial liabilities (CONTINUED)
  - (i) Financial assets (CONTINUED)
    - (a) Debt instruments (CONTINUED)

Solely payments of principal and interest (SPPI)

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Group assesses whether flows represent solely payment of principal and interest (SPPI test). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the period.

### (b) Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include shareholdings with Visa and CariCRIS.

The Group subsequently measures all equity investments at fair value through profit or loss, except where the Group's management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. These financial assets are presented within investment securities held to collect and sell. The Group's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, fair value gains and losses are recognized in OCI and are not subsequently reclassified to profit or loss, including on disposal. Dividends, when representing a return on such investments, continue to be recognized in profit or loss as other income when the Group's right to receive payments is established.

Gains and losses on equity investments classified as FVPL are included in the consolidated income statement.

#### (c) Impairment

The Group assesses on a forward-looking basis the expected credit losses (ECL) associated with its assets carried at amortized cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognizes a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- e. Financial assets and financial liabilities (CONTINUED)
  - (i) Financial assets (CONTINUED)
    - (c) Impairment (CONTINUED)
      - Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.
      - Note 3.a.v provides more detail of how the expected credit loss allowance is measured.

### (i) Modification of loans

The Group sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. When this happens, the Group assesses whether or not the new terms are substantially different to the original terms. The Group does this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay. (note 3.a.iv)
- Significant extension of the loan term when the borrower is not in financial difficulty.
- Significant change in the interest rate.
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Group derecognizes the original financial asset and recognizes a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Group also assesses whether the new financial asset recognized is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the borrower being unable to make the originally agreed payments. Differences in the carrying amount are also recognized in profit or loss as a gain or loss on derecognition.

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognizes a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or creditadjusted effective interest rate for purchased or originated credit-impaired financial assets).

The impact of modifications of financial assets on the expected credit loss calculation is discussed in note 3.a.xv.

#### (ii) Derecognition other than on a modification

Financial assets, or a portion thereof, are derecognized when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Group transfers substantially all the risks and rewards of ownership, or (ii) the Group neither transfers nor retains substantially all the risks and rewards of ownership and the Group has not retained control.

The Group enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as 'pass through' transfers that result in derecognition if the Group:

- (i) Has no obligation to make payments unless it collects equivalent amounts from the assets;
- (ii) Is prohibited from selling or pledging the assets; and

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- e. Financial assets and financial liabilities (CONTINUED)
  - (i) Financial assets (CONTINUED)
    - (c) Impairment (CONTINUED)
      - (ii) Derecognition other than on a modification (CONTINUED)
        - (iii) Has an obligation to remit any cash it collects from the assets without material delay.

Collateral (shares and bonds) furnished by the Group under standard repurchase agreements and securities lending and borrowing transactions are not derecognized because the Group retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met. This also applies to certain securitization transactions in which the Group retains a subordinated residual interest.

### (d) Write-off

The Group writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the Group's effort to dispose of repossessed collateral is such that there is no reasonable expectation of recovering in full.

### (ii) Financial liabilities

(i) Classification and subsequent measurement

In both the current and prior period, financial liabilities are classified as subsequently measured at amortized cost, except for:

- Financial liabilities at fair value through profit or loss: this classification is applied to derivatives, financial liabilities held at fair value through profit or loss (e.g. short positions in the trading booking) and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at fair value through profit or loss are presented partially in other comprehensive income (the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, which is determined as the amount that is not attributable to changes in market conditions that give rise to market risk) and partially profit or loss (the remaining amount of change in the fair value of the liability). This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss;
- Financial liabilities arising from the transfer of financial assets which did not qualify for derecognition, whereby a financial liability is recognized for the consideration received for the transfer. In subsequent periods, the Group recognizes any expense incurred on the financial liability; and
- Financial guarantee contracts and loan commitments (see note 2.f).

### (ii) Derecognition

Financial liabilities are derecognized when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

The exchange between the Group and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- e. Financial assets and financial liabilities (CONTINUED)
  - (ii) Financial liabilities (CONTINUED)
    - (ii) Derecognition (CONTINUED)

the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognized as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortized over the remaining term of the modified liability.

f. Financial quarantee contracts and loan commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities.

Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:

- The amount of the loss allowance (calculated as described in note 3.a.iii); and
- The premium received on initial recognition less income recognized in accordance with the principles of IFRS 15.

Loan commitments provided by the Group are measured as the amount of the loss allowance (calculated as described in note 3.a.1.a). The Group has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument.

For loan commitments and financial guarantee contracts, the loss allowance is recognized as a provision. However, for contracts that include both a loan and an undrawn commitment and the Group cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognized together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognized as a provision.

g. Impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(Expressed in Trinidad and Tobago dollars)

### 2 Summary of significant accounting policies (CONTINUED)

### h. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position where there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

### i. Sale and repurchase agreements and lending of securities

Securities sold subject to sale and repurchase agreements (repos) are retained on the consolidated statement of financial position as investment securities and the counterparty liability is included in other funding instruments.

Securities purchased under agreements to resell (reverse repos) are recorded as loans to other banks or customers as appropriate.

The difference between sale and repurchase price is treated as interest and accrued over the life of the repo agreement using the effective interest method.

#### i. Lease transactions

### Policies applicable on or after October 1 2019

The Group has adopted IFRS 16 effective October 1, 2019, replaces IAS 17 and IFRIC 4. The comparative information has not been restated and continues to be reported under IAS 17 and IFRIC 4.

For all new contracts entered into on or after October 1 2019, the Group assesses whether a contract is, or contains a lease. A lease is defined as "a contract that conveys the right-of-use of an asset for a period of time in exchange for consideration". To assess whether a contract conveys the right-of-use of an asset, the Group assesses whether:

- the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group;
- the Group has the right to obtain substantially all the economic benefits from use of the assets through the period of use;
- the Group has the right to direct the use of the asset throughout the period of use. The Group has this right when it has the rights to direct "how and for what purpose" the asset is used.

#### (i) The Group as the lessee

Until the 2019 financial year, leases of property, plant and equipment were classified as either finance leases or operating leases. From October 1 2019, the Group recognizes leases as a right-of-use asset and a lease liability at the date at which the leased asset is available for use by the Group. The right-of-use is initially measured at the cost, which comprises the initial amount of the lease liability, any initial direct cost incurred, an estimate of any cost to dismantle and remove the asset or to restore the asset and less any lease incentive received.

The Group depreciates the right-of-use assets on a straight line basis from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. The Group also assesses the right-of-use asset for impairment when such indicators exists.

The Group measures the lease liability at the present value of the lease payments not paid at the commencement date, discounted using the interest rate implicit in the lease or if that rate cannot be readily determined, the Group's incremental borrowing rate, which is the Repo rate. Lease liabilities include the net present value of the following lease payments:-

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

- i. Lease transactions (CONTINUED)
  - (i) The Group as the lessee (CONTINUED)
    - fixed payments, including in-substance fixed payments, less any lease incentive;
    - variable lease payments that are based on an index or a rate, initially measured using the index or rate at the commencement date;
    - amount expected to be payable by the group under residual value guarantees;
    - the exercise price under a purchase option, if the group is reasonably certain to exercise that option;
    - lease payments in an optional renewal period, if the group is reasonably certain to exercise;
    - penalties for early termination of a lease, if the lease term reflects the group exercising this option.

The lease liabilities will be remeasured when there is a change in future lease payments from a change in rate or index or if the Group changes its assessments of whether it will exercise an extension or termination option.

Payments associated with short-term leases and all low-value assets are recognized on a straight-line basis as an expense in the income statement. Short-term leases are leases with a term of twelve (12) months or less. Low-value assets comprise of IT equipment and small items of office furniture.

### Policies applicable prior to October 1, 2019

Leases are accounted for in accordance with IAS 17 and IFRIC 4. They are divided into finance leases and operating leases.

Leases in which a significant portion of the risks and methods of ownership are retained by another party, the lessor, are classified as operating leases. Leases of assets where the Group has substantially all the risk and rewards of ownership are classified as finance leases.

#### (i) The Group as the lessee

The Group has entered into operating leases where the total payments made under operating leases are charged to the consolidated income statement on a straight-line basis over the period of the lease. When an operating lease is terminated before the period has expired, any penalty payment made to the lessor is recognized as an expense in the period in which termination takes place.

When assets are held subject to a finance lease, an asset and liability is recognized in the consolidated statement of financial position at amounts equal at inception to the fair value of the leased asset or, if lower, the present value of the minimum lease payments. Lease payments are apportioned between the finance charge and the outstanding liability so as to achieve a constant rate on the finance balance outstanding.

The interest element of the finance cost is charged to the consolidated income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The plant and equipment acquired under finance leases is depreciated over the shorter of the useful life of the asset and the lease term.

#### (ii) The Group as the lessor

The Group's accounting policy under IFRS 16 has not changed.

When assets are held subject to a finance lease, the present value of the lease payments is recognized as a receivable. The difference between the gross receivable and the present value of the receivable is recognized as unearned finance income. Lease income is recognized over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return on the remaining balance of the asset for each period.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies (CONTINUED)**

### k. Property, plant and equipment

Freehold premises are shown at fair value based on assessments performed by management or by independent valuators every three years, less subsequent depreciation for buildings. Valuations are performed with sufficient regularity to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the assets and the net amount is restated to the revalued amount of the asset.

All other property, plant and equipment are stated at historical cost less depreciation. The valuation of freehold premises is reviewed annually to ensure it approximately equates to fair value. The valuations of freehold premises are re-assessed when circumstances indicate there may be a material change in value.

Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

All other repairs and maintenance are charged to the consolidated income statement during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of freehold premises are credited to fair value reserves in shareholders' equity. Decreases that affect previous increases of the same assets are charged against fair value reserves directly in equity; all other decreases are charged to the consolidated income statement. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset.

Leasehold improvements and equipment are recorded at cost less accumulated depreciation.

Depreciation and amortization are computed on all assets except land.

The provision for depreciation and amortization is computed using the straight line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives, as follows:-

**Buildings** 50 years Equipment and furniture 4 - 5 years Computer equipment and motor vehicles 3 - 5 years

Leasehold improvements amortized over the life of the lease

The assets' residual and useful lives are reviewed and adjusted if appropriate at each reporting date. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount may not be recoverable.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. The recoverable amount is the higher of the assets fair value less cost to dispose and value in use. Gains and losses on disposal of property, plant and equipment are determined by reference to their carrying amount and are recognized within the consolidated income statement. When revalued assets are sold, the amounts included in fair value reserves are transferred to retained earnings.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies (CONTINUED)**

#### l. Income tax

The tax expense for the period comprises current and deferred tax. Tax is recognized in the consolidated income statement, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Bank and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred income tax liabilities are provided on taxable temporary differences arising from investments in subsidiaries, associates and joint arrangements, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Generally the Group is unable to control the reversal of the temporary difference for associates. Only where there is an agreement in place that gives the Group the ability to control the reversal of the temporary difference not recognized.

Deferred income tax assets are recognized on deductible temporary differences arising from investments in subsidiaries, associates and joint arrangements only to the extent that it is probable the temporary difference will reverse in the foreseeable future and there is sufficient taxable profit available against which the temporary difference can be utilized.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

### m. Employee benefits

### (i) Pension plans

The Group operates a defined benefit plan, which is a pension plan that defines an amount of pension benefits that an employee will receive on retirement, usually dependent on one or more factors, such as age, years of service and compensation. This pension plan is funded by payments from employees and by the Group, taking account of the recommendations of independent qualified actuaries.

Typically defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

### m. Employee benefits (CONTINUED)

### (i) Pension plans (CONTINUED)

The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is calculated based on cash outflows allocated to current or prior periods using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

### (ii) *Profit sharing and bonus plans*

The Group recognizes a liability and an expense for bonuses and profit-sharing, based on a formula that takes into consideration the profit attributable to the Group's shareholders after certain adjustments. The Group recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

### (iii) Employee share ownership plan

The Group established a cash-settled based remuneration plan for its employees. A liability is recognized for the fair value of the cash-settled transactions. The fair value is measured initially and at each reporting date up to and including the settlement date, with changes in the fair value recognized in the income statement. The fair value is expensed over the period until the vesting date with recognition of a corresponding liability.

#### n. Cash and cash equivalents

For purposes of the consolidated statement of cash flows, cash and cash equivalents comprise of cash balances on hand, deposits with other banks and short-term highly liquid investments with original maturities of three months or less when purchased net of balances "due to other banks".

### o. Interest income and expense

Interest income and interest expense are recognized in the consolidated income statement for all interest bearing instruments on an accrual basis using the effective interest method based on the initial carrying amount. Interest income includes coupons earned on fixed income investments, loans and accrued discount and premium on treasury bills and other discounted instruments.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortized cost before any impairment allowance) or the amortized cost of a financial liability. The calculation does not consider expected credit losses and include transaction costs, premium, discounts and fees and point paid or received that are integral to the effective interest rate, such as origination fees.

For financial assets that are credit impaired (stage 3), interest income is calculated by applying the effective interest rate (EIR) to the carrying value net of the expected credit loss provision. For financial assets classified as Purchased or Originated Credit Impaired (POCI), interest income is calculated by applying a credit-adjusted EIR (based on an initial expectation of credit losses) to the amortized cost of these POCI assets. Credit-Adjusted Effective Interest Rate (CAEIR) is lower than the effective interest rate as the cash flows of the instruments are adjusted downwards for the impact of expected credit losses.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

#### p. Fee and commission income

IFRS 15 Revenue from Contracts with Customers (effective 1 January 2018). This standard provides a single, principles based five-step model to be applied to all contracts with customers. The five steps in the model are as follows:

- Identify the contract with the customer
- Identify the performance obligations in the contract
- Determine the transaction price
- Allocate the transaction price to the performance obligations in the contracts
- Recognize revenue when (or as) the entity satisfies a performance obligation.

Fees and commissions income from contracts with customers are measured based on the consideration specified in a contract with a customer. The group recognizes revenue when it transfers control over a service to a customer.

The information about the nature of the type of services and the timing of the satisfaction of performance obligations in contracts with customers, including significant payment terms and related revenue recognition policies are as follows:-

### (i) Retail and corporate banking services

The Group provides banking services to retail and corporate customers, including account management, provision of overdraft facilities, foreign currency transactions, credit card and servicing fees.

Fees for ongoing account management are charged to the customer's account on a monthly basis. The Group sets the rates separately for retail and corporate banking customers in each jurisdiction.

Transaction-based fees for interchange, foreign currency transactions and overdrafts are charged to the customer's account when the transaction takes place. However, the bonus (loyalty) points attached to the credit card transactions are issued quarterly to cardholders.

Servicing fees are charged on a monthly basis and are based on fixed rates, as per the Group's "Rates and Charges".

Revenue from account service and servicing fees is recognized over time as the services are provided. Revenue related to transactions is recognized at the point in time when the transaction takes place.

### (ii) Treasury and investment banking

The Group's investment banking segment provides various finance-related services, including loan administration and agency services, administration of a loan syndication, execution of client transactions with exchanges and securities underwriting.

Fees for ongoing services are charged annually at the end of the calendar year to the customer's account. However, if a customer terminates the contract before the expiration date, then on termination it is charged the fee for the services performed to date.

Transaction-based fees for administration of a loan syndication, execution of transactions, and securities underwriting are charged when the transaction takes place.

Revenue from administrative agency services is recognized over time as the services are provided. The amount is collected upfront and is recognized as deferred income.

Revenue related to transactions is recognized at the point in time when the transaction takes place.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

### p. Fee and commission income (CONTINUED)

### (iii) Trustee and asset management

The Group provides asset management services. Fees for asset management services are calculated based on a fixed percentage of the value of assets managed and deducted from the customer's account balance on a monthly basis. In addition, the Group charges a non-refundable upfront fee when opening an account.

Revenue from asset management services is recognized over time as the services are provided. Non-refundable up-front fees give rise to material rights for future services and are recognized as revenue over the period for which a customer is expected to continue receiving asset management services.

### (iv) Brokerage & Advisory Services

Brokerage & Advisory fees are generally recognized at a point in time upon full completion of the scope of works to the contract, however, for Initial Public Offerings and services of that nature the performance obligation maybe specific to the stage of completion of the services performance obligation. In addition some contracts may require variation to the performance obligation based on the client specifications. These contracts would qualify for revenue recognition over time.

### q. Dividend income

Dividends are recognized in the consolidated income statement when the entity's right to receive payment is established.

#### r. Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Subsequently, borrowings are stated at amortized cost and any difference between proceeds net of transactions costs and the redemption value is recognized in the consolidated income statement over the period of the borrowings using the effective interest method.

#### s. Acceptances

Acceptances comprise undertakings by the Group to pay bills of exchange drawn on customers. The Group expects most acceptances to be settled simultaneously with the reimbursement from the customers. Acceptances are accounted for as off-balance sheet transactions and are disclosed as contingent liabilities and commitments.

### t. Dividend distribution

Dividends on ordinary shares are recognized in equity in the period in which they are approved by the Bank's Board of Directors. Dividends for the year, which are declared after the year end, are disclosed in the subsequent events note when applicable.

#### u. Preference shares

Preference shares are non-convertible and non-redeemable are classified as equity.

(Expressed in Trinidad and Tobago dollars)

### **Summary of significant accounting policies** (CONTINUED)

#### v. Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of the obligation as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognized as interest expense.

### w. Intangible assets

Intangible assets comprise separately identifiable items arising from business combinations, computer software licenses and other intangible assets. Intangible assets are recognized at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortized using the straight line method over the period that the benefits from these assets are expected to be consumed, generally not exceeding 20 years. Intangible assets with an indefinite useful life are not amortized. At each date of the consolidated statement of financial position, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits. If such indications exist, the intangible assets are analysed to assess whether their carrying amount is fully recoverable. An impairment loss is recognized if the carrying amount exceeds the recoverable amount.

The Group chooses to use the cost model for the measurement after recognition.

Intangible assets with indefinite useful life are tested annually for impairment and whenever there is an indication that the asset may be impaired.

#### (i) Goodwill

Goodwill arises on the acquisition of subsidiaries and represents the excess of the consideration transferred over the Group's interest in net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the CGUs, or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognized immediately as an expense and is not subsequently reversed.

(Expressed in Trinidad and Tobago dollars)

## **Summary of significant accounting policies** (CONTINUED)

#### w. Intangible assets (CONTINUED)

#### (ii) Other Intangible assets

Other intangible assets are initially recognized when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributes to the assets with flow from their use. The value of intangible assets which are acquired in a business combination is generally determined using income approach methodologies such as the discounted cash flow method.

Other intangible assets are stated at cost less amortization and provisions for impairment, if any, plus reversals of impairment, if any. They are amortized over their useful lives in a manner that reflects the pattern to which they contribute to future cash flow.

### (iii) Computer software

Costs associated with maintaining computer software programmes are recognized as an expense when incurred. However, expenditure that enhances or extends the benefits of computer software programmes beyond their original specifications and lives is recognized as a capital improvement and added to the original cost of the software. Computer software development costs are recognized as assets when the following criteria are met:-

- It is technically feasible to complete the software and use it
- Management intends to complete the software and use it
- There is an ability to use the software
- Adequate technical, financial and other resources to complete the development and to use it
- The expenditure attributable to the software during its development can be reliably measured.

The software development costs are amortized using the straight-line method over their useful lives but not exceeding a period of three years.

#### x. Fiduciary activities

The Group acts as trustees and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Group (Note 3.d).

## v. Earnings per share

Earnings per share is calculated by dividing the profit attributable to the equity holders, by the weighted average number of ordinary shares in issue during the year.

#### z. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the steering committee that makes strategic decisions.

(Expressed in Trinidad and Tobago dollars)

#### 2.1 Change in accounting policies

The Group has adopted IFRS 16 as issued by the IASB in January 2016, with a date of transition of 1 October 2019, which resulted in changes in accounting policies and adjustments to the amounts previously recognized in the consolidated financial statements.

The Group has applied IFRS 16 using the modified retrospective approach which:-

- Requires the Group to recognize the cumulative effect initially applying IFRS 16 as an adjustment to the opening balance of retained earnings at the date of initial application
- Does not permit restatement of comparative, which continue to be presented under IAS 17 and IFIC 43

On adoption of IFRS 16, the Group recognized lease liabilities in relations to leases which had previously been classified as "operating leases", under IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as at October 1 2019, as no implicit interest rate existed in the leases. The borrowing rate applied to the lease liabilities was 5%, being the Central Bank's Repo rate.

For leases previously classified as finance leases, the Group recognized the carrying amount of the lease asset and lease liability immediately before the transition, as the carrying amount of the right-of- use asset and the lease liability at the date of initial application.

In applying IFRS 16 for the first time, the Group used the following practical expedients permitted by the standard:

- application of a single discount rate to a portfolio of leases with similar characteristics
- relying on previous assessments on whether leases were onerous as an alternative to performing an impairment review there were no onerous contracts as at October 1 2019
- accounting for operating leases with a remaining lease term of less than 12 months as at October 1 2019, as short-term leases
- excluding initial direct costs for the measurement of the right-of-use asset as the date on initial application
- using hindsight in determining the lease term where the contract contains options to extend or terminate the lease

On transition to IFRS 16, the Group recognized the following transactions on the Statement of financial position:-

Right-of-use asset	increase	108,842
Lease Liability	increase	(116,379)
Retained earnings	decrease	7,537

## Measurement of lease liability

The following table shows the operating lease commitment disclosed applying IAS 17 as at September 30 2019, discounted using the borrowing rate at the date of the initial application and the lease liabilities recognized in the statement of financial position at the date of initial application:-

# As at September 30 2019

Operating lease commitment	117,920
Short-term leases and low value assets	(10,136)
Other charges	(4,352)
Effects of discounting the above amounts	(8,614)
Finance lease liability	21,561
Lease liability	116,379

## Measurement of right-of-use asset

The associated right-of-use for property leases were measured on a retrospective basis as if the new rules had always been applied.

(Expressed in Trinidad and Tobago dollars)

### Financial risk management

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

## Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. As part of its mandate, the Board establishes written principles for overall risk management, as well as ensuring that policies are in place covering specific areas of risk. The most significant types of risk are credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate risk and other price risks including commodity and equity risk.

The Group utilizes the three lines of defense concept to manage risk. The first line encompasses the units which design and implement controls to mitigate the risks which they face, the second line are control functions such as risk management, finance who monitors the first line against these standards/ controls. The third line is the Group's internal audit function which provides additional assurance and independent review or risk management and the control environment.

To assist the Board of Directors in fulfilling its duties, two Board Sub-Committees are in place to monitor and report to the Board of Directors on the overall risks within the Group - the Board Enterprise Risk Management (BERM) Committee and the Board Credit Committee (BCC); and two Senior Management Committees – the Senior Management Enterprise Risk Management Committee (SMERMC) and the Asset Liability Committee (ALCO).

The Group Enterprise Risk Management unit, headed by the Group Chief Risk Officer (GCRO), reports to both Sub-Committees through the Senior Management Enterprise Risk Management Committee. This unit is responsible for the identification, analysis, measurement, monitoring and control of credit, market and operational risks for the Group through the Group Credit Risk Management Unit (GCRM), Group Market Risk Unit (GMR), Group Operational Risk and Controls Unit (GORC). Group Enterprise Risk Management also facilitates the monitoring of the Group's risk profile in relation to its risk appetite and the impact of developments in the aforementioned risk areas on strategy and how strategy should be adjusted in light of these developments.

The Asset Liability Committee's role is to manage and monitor the policies and procedures that address the financial risks associated with changing interest rates, foreign exchange rates and any factors that can affect the Group's liquidity. The ALCO seeks to limit risk to acceptable levels by monitoring and anticipating possible pricing differences between assets and liabilities across the Group via the Group Treasury and International Trade Centre. The Group Treasury and International Trade Centre's primary role and responsibility is to actively manage the Group's liquidity. The ALCO is also supported in some specific areas of activity by the Market Risk Committee.

The Group Internal Audit department is responsible for the independent review of risk management and the control environment and reports its findings and recommendations to the Board Audit Committee.

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

#### a. Credit risk

Credit risk is the risk of incurring a financial loss, should any of the Group's customers, clients or market counterparties fail to fulfil their contractual obligations to the Group. Credit risk arises mainly from interbank, commercial and consumer loans and advances, and loan commitments arising from such lending activities, but can also arise from credit enhancements provided, such as financial guarantees, letters of credit, endorsements and acceptances.

The Group is also exposed to other credit risks arising from investments in debt securities and other exposures arising from its trading activities ('trading exposures') including non-equity trading portfolio assets and derivatives as well as settlement balances with market counterparties and reverse repurchase agreements.

Credit risk is the single largest risk for the Group's business; management therefore carefully manages its exposure to credit risk.

### (i) Credit risk management

In its management of credit risks, the Group has established an organizational structure which supports the lending philosophy of the Group. This structure comprises the Board of Directors, the Board Credit Committee, Senior Management Enterprise Risk Management Committee, the Group Chief Risk Officer, the Group Credit Risk Management unit and the Internal Audit department. The Board of Directors maintains general oversight to ensure that policies and procedures are consistent with the strategic direction and credit philosophy of the Group and that they serve to bring the required level of protection over assets that are exposed to credit risks. To facilitate day to day decision making and timely implementation of decisions, the Board has delegated authority for specific areas to specific committees and/or officers with an appropriate reporting system to the Board. The BCC focuses primarily on credit risk appetite and in so doing sanctions amendments to credit policies, delegation of lending authority to senior management and credit requests exceeding the authority of management. The SMERMC together with the GCRO monitors the effectiveness of credit policies and procedures and may direct changes to strategies to improve the effectiveness of policies. The major focus of GCRM is to formulate credit policies, monitor compliance with them and on a continuous basis to assess their relevance to the changing business environment. Most of these policies are established and communicated through the Group's documented Credit Policy manuals. These documents set out in detail the policies governing the lending function and provides a comprehensive framework for prudent risk management of the credit function.

### (a) Loans and advances (including loan commitments and guarantees)

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Group measures credit risk using Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD).

This is similar to the approach used for the purposes of measuring Expected Credit Loss (ECL) under IFRS 9 (note 3.a.v).

### (ii) Credit risk grading

The Group uses internal credit risk grading or ratings which reflect its assessment of the risk profile or PD of counterparties. The Group utilizes two (2) rating models for loans and one (1) for investment securities. Retail borrowers are assessed using the Internal Grading (IG) Code model while Corporate and Commercial borrowers are assessed using the Borrower Risk Rating (BRR) model.

(Expressed in Trinidad and Tobago dollars)

### Financial risk management (CONTINUED)

- a. Credit risk (CONTINUED)
  - (ii) Credit risk grading

#### Retail/consumer loans

The IG code model is a qualitative assessment of key borrower information collected at the time of application such as debt servicing ability, credit history and quality of collateral. External data such as credit bureau scoring information is also used where available. Finally, expert judgement may also be applied where there are other relevant factors which may not be captured as part of the pre-defined data inputs into the model. Once the analysis is completed, the borrower is assigned an IG Code which would equate to an assessment of the PD ranging from extremely low risk (IG 98) to Very High Risk (IG 65).

#### Corporate/commercial loans

The BRR model is a quantitative assessment of the business risk profile and financial risk profile of the borrower. There are two subcategories of the BRR model: one which is used to assess Financial Institutions and another which is used for all other types of Corporate/Commercial Borrowers.

The business risk profile involves an assessment of the country risk, industry stage, competitive position and management expertise of the borrower. The financial risk profile involves calculating key financial ratios over the past three years and assigning risk scores based on the financial strength or weakness which the ratios represent. The model allows for discretionary adjustments to be made to the baseline rating using expert judgement by the business unit and GCRM. Once the analysis is completed, the borrower is assigned a credit rating which would equate to an assessment of the PD ranging from extremely low risk (BRR 1) to Very High Risk (BRR 6).

#### Investment Securities

For sovereign and corporate investment securities, the ratings published by Standards and Poor's Rating Agency (S&P), where available, are used. For sovereigns with no S&P rating, the Group's Research and Analytics Unit uses a model based on the S&P methodology to generate a rating. For corporate investment securities with no S&P rating, a rating is assigned using the BRR model.

S&P published ratings are continuously monitored and updated. The PD's associated with each rating are determined based on realized default over the prior 12 months, as published by the rating agency. The ratings generated by the BRR model are also updated annually.

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(iii) Expected credit loss measurement

IFRS 9 outlines a three stage model for impairment based on changes in credit quality since initial recognition as summarized below:

- A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1 and has its credit risk continuously monitored by the Group.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to Stage 2 but is not yet deemed to be credit-impaired.
- If the financial instrument is credit-impaired, the financial instrument is then moved to Stage 3. Please refer to note 3.a.iv for a description of how the Group defines credit-impaired and default.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses within the next twelve (12) months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis. Please refer to note 3.a.v for a description of inputs, assumptions and estimation techniques used in measuring the ECL.
- A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward-looking information. Note 3.a. (vi) details how the Group has incorporated this in its ECL model.
- Purchased or originated credit-impaired (POCI) financial assets are those assets that are credit-impaired on initial recognition. The ECL is always measured on a lifetime basis and is deemed "built-in" to the fair value on origination. A credit impaired effective interest rate is used to amortize these instruments to their maturity. Changes to the life-time expected credit losses are adjusted in the amortized prices.

Further explanation is also provided of how the Group determines appropriate groupings when ECL is measured on a collective basis (refer to note 3.a.vii). The following diagram summarizes the impairment requirements under IFRS 9 (other than purchased or originated credit-impaired financial assets):

Change in credit quality since initial recognition				
Stage 1 Stage 2 Stage 3				
(Initial Recognition)	(Significant increase in credit risk)	(Credit - impaired assets)		
12 month expected credit losses	Lifetime expected credit losses	Lifetime expected credit losses		

(Expressed in Trinidad and Tobago dollars)

# **Financial risk management** (CONTINUED)

- a. Credit risk (CONTINUED)
  - (iii) Expected credit loss measurement (CONTINUED)

Significant increase in credit risk (SICR)

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following criteria have been met:

Loans – First Citizens Bank Trinidad and Tobago

Criteria	Retail Loans (includes Credit Cards)	Commercial/Corporate Loans
Relative Measure	n/a	Initial BRR of 3- or higher - Downgraded such that the BRR is 4 or lower Initial BRR of 4+ or lower- Three notches downgrade of the BRR
Absolute Measure	31 days past due/Classified Special Mention	31 days past due/Classified Special Mention

### Loans – First Citizens Bank Barbados

Criteria	Retail Loans (includes Credit Cards)	Commercial/Corporate Loans
Absolute Measure	31 days past due/Classified Special Mention	31 days past due/Classified Special Mention

(Expressed in Trinidad and Tobago dollars)

- Financial risk management (CONTINUED)
  - a. Credit risk (CONTINUED)
    - (iii) Expected credit loss measurement (CONTINUED)

Investment Securities

Criteria	Investment Grade Portfolio	Single "B" Speculative Grade Portfolio
Absolute Measure	PD - 15% or higher	PD - 25% or higher
AND	AND	AND
Relative Measure	One notch downgrade (investment securities rating scale)	One notch downgrade (investment securities rating scale)
OR	OR	OR
Special Consideration	Eurobonds with Trigger 3 Breaches	Eurobonds with Trigger 3 Breaches

In addition to the above, due to the unprecedented economic impact of COVID-19 lockdown measures, the SICR criteria have been temporarily expanded to include a borrower level assessment based on the following:

- a) Where the borrower is assessed as being directly linked or indirectly linked to the travel industry.
- b) Where the borrower is assessed as providing a discretionary product or service, the purchase of which can be deferred or cancelled.
- c) Where the borrower is assessed as having a business which is very people intensive and therefore risks associated with a pandemic are amplified.
- d) Where the borrower is assessed as having more than 50% of its operating costs classed as fixed and therefore scaling capacity up or down in response to changes in demand is difficult.
- e) Where the borrower is assessed to be under severe liquidity strain with little or no access to alternative sources of liquidity.
- Where a facility is restructured for purposes other than retention of the account (due to competitiveness of the market) and there is one or a combination of a non-market driven reduction in interest rate, deferral of payments, an extension of the existing term by more than 12 months and a moratorium on payments/capitalization of interest in excess of 12 months (note 3.a.iv)

The Group has not used the low credit risk exemption for any financial instruments in the year ended 30 September 2020.

(Expressed in Trinidad and Tobago dollars)

# **Financial risk management** (CONTINUED)

- a. Credit risk (CONTINUED)
  - (iii) Expected credit loss measurement (CONTINUED)

With respect to the cure for SICR, the Group considers a significant decrease in credit risk has occurred when the following happens:

## Loans

Retail Loans (includes Credit Cards)	Commercial/Corporate Loans
Payments received for six months consecutively	Payments received for six periods consecutively
Loan classification upgrade to Pass	Loan classification upgrade to Pass
	BRR reverts to the rating just prior to the SICR

## **Investment Securities**

Criteria	Investment Grade Portfolio	Single "B" Speculative Grade Portfolio	
Absolute Measure	PD - 12.5% or lower	PD - 25% or lower	
AND	AND	AND	
Relative Measure	Credit rating reverts to level just prior to the SICR	One notch upgrade (investment securities rating scale)	
OR	OR	OR	
Special Consideration	No credit stop loss breaches	No credit stop loss breaches	

(Expressed in Trinidad and Tobago dollars)

### Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(iv) Definition of default and credit-impaired assets

The Group defines a financial instrument as in default or credit impaired, when it meets one or more of the following criteria:

Quantitative criteria

The borrower is more than ninety (90) days past due on its contractual payments.

Due to the economic impact of COVID-19 lockdown measures, the Group granted payment deferrals to borrowers. For retail loans, automatic deferrals of 90 days were granted to all customers along with an equivalent extension of the loan maturity. Beyond 90 days, an extension of the deferral period for up to an additional 90 days was granted on retail loans once requested by the customer along with an extension to the loan maturity date. For commercial and corporate customers, payment deferrals were granted to customers on an individual request basis. There deferrals granted were for a minimum period of 90 days along with an equivalent extension of the loan maturity date.

Once the deferral period ended, the payment status of the loan would be considered to be the same as what existed prior to the deferral being granted.

Qualitative criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower formally files for bankruptcy or there is a commencement of foreclosure proceedings.
- The obligation is classified Doubtful or worse as per the Group's classification process.
- The Group executes a modification to terms and conditions of the original loan agreement that they would not normally consider and where the change in the present value of the cash flows of the new proposed loan facility versus the original loan facility exceeds 10%.
- Restructure proceedings or an indication of the intention to restructure is initiated by the issuer (investments only).

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD), throughout the Group's expected loss calculations.

A loan instrument is considered to no longer be in default (i.e. to have cured) when it no longer meets any of the default criteria for a period of six consecutive payments.

An investment instrument is considered to no longer be in default (i.e. to have cured) when it has been restructured. An exception exists for credit impaired facilities at origination.

(Expressed in Trinidad and Tobago dollars)

### Financial risk management (CONTINUED)

- a. Credit risk (CONTINUED)
  - (v) Measuring ECL Explanation of inputs, assumptions and estimation techniques

The Expected Credit Loss (ECL) is measured on either a twelve (12) month (12M) or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- PD represents the likelihood of a borrower defaulting on its financial obligation (as defined in note 3.a.iv), either over the next twelve (12) months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next twelve (12) months (12M EAD) or over the remaining lifetime (Lifetime EAD). The EAD is calculated as the outstanding balance less the discounted collateral value. Collateral values are discounted by first making adjustments to account for the cost of disposal and the expected time it would take to sell the collateral. This present value of this reduced collateral value is then calculated by discounting it by the effective interest rate of the facility.
- LGD is expressed as the percentage of loss expected to be incurred if the default occurs over the remaining expected lifetime of the loan and represents management's expectation of the extent of loss on a defaulted exposure. LGD varies by seniority of claim and product type, while the availability of collateral is factored before LGD is considered.

#### PDs

The lifetime and twelve (12) month PDs are determined differently for loans and investment securities. Loans' PDs are derived from the historical experience of the Group, calculated using a vintage analysis methodology. The investment securities' PDs for sovereign and corporate instruments are taken from the Standard & Poors' (S&P) Annual Sovereign Default and Rating Transition Study and the Annual Global Corporate Default and Transition Study, respectively.

#### EAD

For amortizing products and bullet repayment loans, EAD is based on the contractual repayments owed by the borrower over the remaining life of the loan. This will also be adjusted for any expected overpayments made by a borrower. Early repayment assumptions are also incorporated into the calculation.

For revolving products, the EAD is calculated by taking the current drawn balance and adding a credit conversion factor (CCF) which adjusts for the expected drawdown of the remaining unutilized limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on an analysis of the product's usage over the prior two (2) year period. (Note 3.a.vi)

#### LGD

LGDs for loans are determined based on historical recovery rates and vary by product type and are influenced by the collection strategies of the specialist units managing the process (Note 3.a.vi). For sovereign investment securities, LGDs are obtained from Moody's Investor Services' Data Report on Sovereign Global Default and Recovery Rates (1983-2019). Corporate investment securities LGDs are based on the standard terms for North American corporate entities CDS contracts, taken from Moody's Analytics' CDS-implied EDF™ Credit Measures and Fair-value Spreads.

(Expressed in Trinidad and Tobago dollars)

### Financial risk management (CONTINUED)

- a. Credit risk (CONTINUED)
  - (v) Measuring ECL Explanation of inputs, assumptions and estimation techniques (CONTINUED)

Management also made the following key assumptions in its assessment:-

#### Credit cards

The average lifetime of credit card facilities were calculated as six (6) years for FCTT and seven (7) years for FCBB. In determining the tenor of these facilities, an average of the accounts in existence at the reporting date, together with the accounts closed over the last ten years was used to calculate the average life.

#### **Overdrafts**

In order to determine the lifetime of the consumer overdraft facilities, an average of the effective life of a consumer overdraft facility i.e. the time between an overdraft being opened and then closed was calculated over an eight (8) year period. This calculation resulted in the identification of six (6) years & seven (7) years for personal and staff overdrafts respectively.

## Recovery rates

Recovery rates used on loans represents the Group's actual historical experience since inception of recovery on charged-off accounts by product type. These accounts have no attached collateral, however a robust system is in place for tracking collections on these loans. In the instance of loans that are booked in jurisdictions outside of Trinidad & Tobago and Barbados, sufficient recovery information was not available, due to a lack of defaulted loans, therefore recovery rates based on Trinidad and Tobago data was applied.

#### Credit conversion factors (CCF)

Credit conversion factors were calculated in order to project what portion of the undrawn element of revolving facilities (Credits Cards and Overdrafts), could reasonably expect to be drawn. The credit conversion factors were calculated using the quarterly exposure for overdrafts and monthly exposure for credit cards over a two (2) year period. An average of the difference between the current balance and the starting balance as a percentage of the total approved credit limit, was calculated and used as a proxy to project the portion of the undrawn balance that would be drawn, for both loans and credit cards for the various quarters and months respectively. The highest calculated average was used as the CCF.

#### (vi) Forward-looking information incorporated in the ECL models

The calculation of ECL incorporates forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

### Loan portfolio

For this portfolio, a scorecard model was developed, with the macro-economic factors and the weights attached to them, being chosen based on management's judgement and experience. Weights were assigned to distinguish those factors which would have a higher impact when compared to others. Management notes that different weightings were applied to the retail loan portfolio and the corporate/commercial loan portfolio, since in its view, the impact of the chosen macro-economic factors differs significantly for these two portfolios.

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(vi) Forward-looking information incorporated in the ECL models (CONTINUED)

For each jurisdiction, four macro-economic factors were used. Unemployment rate, real GDP growth and inflation were used in all jurisdictions, with the remaining factor being country specific. LNG Prices, Tourist Arrivals and FDI were used as the country specific indicator for Trinidad & Tobago, Barbados, Costa Rica and Latin America (LATAM) respectively. In management's assessment of the retail loan portfolio, unemployment was adjudged to have a direct impact on recoverability and was assigned the highest weighting. Similarly, for the corporate/commercial loan portfolio real GDP growth was adjudged to have the highest impact and weighting. In management's view, inflation would also have an impact on loan defaults and while not as significant as some of the other factors, it was also included in the assessment. Lastly, the outlook for each of the macro-economic factors was adjusted by management to incorporate the impact of COVID-19 and the resultant economic shock of the pandemic.

Outlooks were provided for each of these variables to derive a weighted adjustment factor that was then applied to the loan portfolios to reflect this forward-looking information.

The tables below show the macroeconomic factors selected and attendant weights:

#### Retail Loan Portfolio

Trinidad and Tobago	Barbados	Weight
Unemployment rate	Unemployment rate	0.7
Real GDP Growth	Real GDP Growth	0.1
Inflation	Inflation	0.05
LNG Prices	Tourist Arrivals	0.15
Total		

(Expressed in Trinidad and Tobago dollars)

# **Financial risk management** (CONTINUED)

a. Credit risk (CONTINUED)

Corporate Commercial Loan Portfolio

Trinidad and Tobago	Barbados	Costa Rica and LATAM	Weight
Unemployment rate	Unemployment rate	Unemployment Rate	0.1
Real GDP Growth	Real GDP Growth	Real GDP Growth	0.7
Inflation	Inflation	Inflation	0.05
LNG Prices	Tourist Arrivals	FDI	0.15
Total			

The weighting assigned to each economic scenario as at 30 September 2020 were as follows:-

	Base	Upside	Downside
Loans	80%	10%	10%

The weighting assigned to each economic scenario as at 30 September 2019 were as follows:-

	Base	Upside	Downside
Loans	80%	10%	10%

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(vi) Forward-looking information incorporated in the ECL models (CONTINUED)

The Group also made the following key assumptions in its assessment:-

Determination of macroeconomic scenarios and probabilities

For each country in which the Group has investment securities, management performs scenario analysis to determine the impact of future economic conditions on the PD in these countries. After testing multiple economic indicators, a main macro-economic variable (MEV) is determined, which is statistically linked to the credit risk of that sovereign. To increase the robustness of the model and in light of the shock from COVID-19, management adopted a bivariate model to determine two MEVs for key sovereigns. The statistical relationship is determined through regression analysis and an analysis of various measures of significance. The sign of the coefficients is also an important factor in determining the use of the two MEVs. Correlation analysis is then conducted between the two MEVs and key sovereign credit risk metrics, to determine which are most significant. Three selected sovereign credit risk metrics were identified as sovereign credit rating drivers to quantify the impact of the MEVs on each credit risk driver, ordinary least squares (OLS) regression is conducted. To establish scenarios, the MEVs are 'shocked', such that the official forecast for each year moves up and down by a multiple of the historical standard deviation to establish a best and worse-case. The new values derived are run through a regression model to quantify the relationship between the credit rating and the scenarios. Data used in the update of the model as at 30 September, 2020 incorporate the impact of COVID-19, as such the forward looking scenarios factor in the economic shock of the pandemic.

Credit ratings were forecasted for the next three years using these macro-economic scenarios. The weightings applied to the forecasted ratings were 60% for year 1, 20% each for year 2 and 3. These weightings were determined based on management's judgement and experience.

These economic variables and their associated impact on the PD, EAD and LGD vary by financial instrument. Management judgement has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by the Economics Research Unit on a periodic basis and provide the best estimate view of the economy over the next three years. After three years, to project the economic variables out for the full remaining lifetime of each instrument, a mean reversion approach has been used. The impact of these economic variables on the PD, EAD and LGD has been determined by performing regression analysis to understand the impact changes in these variables have had historically on default rates and LGD.

### Economic assumptions

The most significant period-end assumptions used for the ECL estimate as at 30 September 2020 are set out below. The scenarios "base", "best" and "worst" were used for the investment portfolios.

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(vi) Forward-looking information incorporated in the ECL models (CONTINUED)

Sensitivity analysis

The most significant assumptions affecting the ECL allowance are as follows:

Retail portfolios

(i) Unemployment rate, given its impact on secured and unsecured borrowers' ability to meet their contractual repayments.

Corporate/Commercial portfolios

(i) GDP, given the significant impact on company financial performance and collateral valuations;

Set out below are the changes to the ECL as at 30 September 2020 that would result from reasonably possible changes in these parameters from the actual assumptions used by management (for example, the impact on ECL of increasing the estimated unemployment rate by 1% in each of the base, best and worst case scenarios):

		September 2020		September 2019			
<b>Unemployment Rates</b>	PDs			PDs			
	-1% "000	No Change "000	1% "000	-1% "000	No Change "000	1% "000	
	(27,265)	_	27,265	(1,655)	_	1,655	
GDP	LGDs	LGDs					
	-5% "000	No Change "000	5% "000	-5% "000	No Change "000	5% "000

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

### a. Credit risk (CONTINUED)

(vii) Grouping of instruments for losses measured on a collective basis

For expected credit loss provisions modelled on a collective basis, a grouping of exposures is performed on the basis of shared risk characteristics, such that risk exposures within a group are homogeneous.

In performing this grouping, the characteristic of the risk profile was taken into consideration. The grouping was done for one main product type as outlined below:

Groupings for collective measurement

- Credit Cards All stages
- Retail All stages

The following exposures are assessed individually:

- Corporate/Commercial All stages
- Investment Securities

The appropriateness of grouping of instruments is monitored and reviewed on a periodic basis by the Group Credit Risk Management unit.

## (viii) Risk limit control and mitigation policy

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to a single borrower, groups of borrowers, industry and country segments. The Group monitors its concentration of credit exposure so that no single borrower default will have a material impact on the Group. These limits are implemented and monitored by the Group Credit Risk Management unit through the Group Credit Policy manual. In instances where it is strategically beneficial and adequately documented, the Group would seek approval on an exception basis for variation to the approved limits from the Board of Directors.

### (a) Single borrower and borrower group exposure limits

Limits established by regulatory authorities have been incorporated into the credit policies where concentration is restricted by limiting credit amounts to a percentage of the capital base. This is supported by a stringent reporting requirement and is further enhanced by policies requiring periodic review of all commercial credit relationships.

### (b) Industry exposure limits

These limits have been established based on a ranking of the riskiness of various industries. The ranking is guided by a model developed by the Group for this purpose. The model utilizes a scale incorporating scores of 1 to 6 with 1 being the least risky. Exposure limits as a percentage of the total credit portfolio have been established to the various industry exposure categories based on the risk ranking.

### (c) Country exposure limits

Exposure limits have been established for selected countries which are considered to be within the Group's target market. Three (3) risk categories have been developed and the selected countries have been assigned to these categories based either on ratings issued by acceptable credit rating agencies or the Group's own internal assessment of the strategic direction of the Group. Maximum cross border exposure has been limited to a pre-determined portion of total assets and this amount is allocated to the various risk categories with a larger share being allocated to the more highly rated categories.

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(viii) Risk limit control and mitigation policy (CONTINUED)

#### (d) Collateral

The Group employs a range of policies and practices to mitigate credit risk. The most common of these is accepting collateral for funds advanced. The Group has internal policies on the acceptability of specific classes of collateral for credit risk mitigation.

The Group requires a valuation of the collateral obtained as part of the loan origination process. This assessment is reviewed periodically. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over cash and cash convertible instruments.
- Charges over business assets such as premises, inventory and accounts receivable; and
- Charges over financial instruments such as debt securities and equities.

Longer-term lending to corporate/commercial entities is generally secured; revolving individual credit facilities are generally unsecured.

Collateral held as security for financial assets other than loans and advances depends on the nature of the instrument. Investment securities, treasury and other eligible bills are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

The Group's policies regarding obtaining collateral have not changed significantly during the period and as at September 30, 2020. The impact of COVID-19 on property collateral was deemed as short term. The overall impact is not measurable at this point in time due to the high uncertainty of the real estate market.

### (e) Liquidity support agreement

The terms of the Liquidity Support Agreement (LSA) under which First Citizens Bank Limited (the Bank) acquired Caribbean Money Market Brokers Limited (CMMB), now First Citizens Investment Services Limited (FCIS), outlined certain financial assurances given by the Government of Republic of Trinidad and Tobago (GORTT) to the Bank, that provided for the indemnification of the Bank against various claims, losses or liabilities if incurred by FCIS within a stipulated period of time after the date of acquisition in relation to obligations existing or default on assets owned by FCIS at the date of the acquisition.

The LSA dated 15 May 2009 and made between the GORTT, the Central Bank of Trinidad and Tobago (CBTT) and the Bank provided that all reasonable claims by the Bank in respect of such losses were expected to be settled, once the Bank had made all reasonable efforts to recover or resist such claims, losses or liabilities. The Bank committed to reimburse FCIS for any losses incurred by FCIS against which the Bank has been indemnified.

Losses which are covered under the LSA include losses in respect of balances due from CL Financial and its affiliates accruing from the date that CMMB was acquired by the Bank to the greater of the maturity date of the obligation or 6 years from the date of completion of the share transfer of CMMB to the Bank.

(Expressed in Trinidad and Tobago dollars)

## Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(viii) Risk limit control and mitigation policy (CONTINUED)

(e) Liquidity support agreement (CONTINUED)

The Ministry of Finance continues to recognize its commitment under the LSA agreement by way of granting consecutive extensions under the Liquidity Support Agreement for the periods: 16 May 2015 to 15 November 2016 and subsequently for the period 15 November 2016 to 14 November 2017, 15 November 2017 to 14 November 2018, 15 November 2018 to 14 November 2019, 14 November 2019 to 28 February 2021 and 1 March 2021 to 28 February 2022. Additionally, the Ministry of Finance has made good and settled in full subsequent claims made for losses and expenses incurred resulting from obligations commensurate with the Liquidity Support Agreement.

The Ministry of Finance in letter dated 22 October 2020 has agreed to another extension for a twelve month period effective from 1 March 2021 to 28 February 2022 commensurate under the Liquidity Support Agreement dated 15 May 2009. This was subsequently formalized via the "Sixth Supplementary Liquidity Support Agreement" dated 11 November 2020.

As at the date of this statement of financial position, the amount of the Promissory Notes due was US \$103.9M (2019: US \$100.8M) and the Commercial Paper was TT \$249.9M (2019: TT \$241.2M).

(f) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorizing a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions are collateralized by the underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

(g) Impairment and provisioning policies

The Group's impairment provision policy is covered in detail in Note 2 e.i.c..

(Expressed in Trinidad and Tobago dollars)

The ECL on the financial guarantees are nil, as all guarantees executed are secured by cash. The newly committed assets assessments are based on the clients' risk profile, PDs, LGD and collateral position. There were no exposure, as a result they were classified under stage 1 with no ECL (Note 3.c.iii).

(xi) Maximum exposure to credit risk

The Group closely monitors collateral held for financial assets considered to be credit-impaired, as it becomes more likely that the Group will take possession of collateral to mitigate potential credit losses. Financial assets that are credit-impaired and related collateral held in order to mitigate potential losses are shown below:

Credit impaired assets 30 September 2020	Gross exposure \$'000	Impairment allowance \$'000	Carrying amount \$'000	Fair value of collateral held \$'000
Individual (retail customers)

- Financial risk management (CONTINUED)
  - a. Credit risk (CONTINUED)

(xii) Loss allowance

The loss allowance recognized in the period is impacted by a variety of factors, as described below:

- Transfers between Stage 1 and Stages 2 or 3 due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequent step up (or step down) between 12 month and lifetime ECL;
- Additional allowances for new financial instruments recognized during the period, as well as releases for financial instruments de-recognized in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from periodic refreshing of inputs to models; currently ten years of data for PDs are being used (2019: ten years were used), and management's intention is to maintain this ten year rolling average for the PDs.
- Impacts on the measurement of ECL due to changes made to models and assumptions;
- Discount unwind within ECL due to the passage of time, as ECL is measured on a present value basis;
- Foreign exchange retranslations for assets denominated in foreign currencies and other movements; and
- Financial assets that were written off during the period (3.a.xiii).
- The Government of Barbados bonds were recognized as at 1 October 2018 as Purchased or Originated Credit Impaired (POCI). These bonds originated at a deep discount that reflects incurred credit losses. An effective interest rate based in the expected cash flows net of expected credit losses is used. This is known as at Credit Adjusted Effective Interest Rate (CAEIR).
- The total amount of undiscounted expected credit losses at initial recognition for Originated credit-impaired financial assets recognized during the period was \$17.3M (2019: \$296.8M).

#### Financial risk management (CONTINUED)

a. Credit risk (CONTINUED)

(xii) Loss allowance (CONTINUED)

Significant changes in the gross carrying amount of financial assets that contributed to changes in the loss allowance were as follows:

- New loans facilities originated during the period, increased the gross carrying amount of the relative books by 32.6%, with a corresponding \$45.4M increase in loss allowance measured.
- The write-off of loans and investments with a total gross carrying amount of \$32.3M (2019: \$25.1M) resulted in the reduction of the Stage 3 loss allowance by the same amount.
- The derecognition of financial assets with a gross carrying amount of \$919.5M, resulted in the reduction of the Stage 3 allowance by \$296.0M.

The following table further explains changes in the gross carrying amount of the loan portfolio to help explain their significance to the changes in the loss allowance for the same portfolio as discussed above:

#### (xiv) Write-off policy

The Group writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the Group's effort to dispose of repossessed collateral is such that there is no reasonable expectation of recovering in full.

The Group may write-off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off during the year ended 30 September 2020 was \$32.3 million (2019: \$25.2 million). The Group still seeks to recover amounts it is legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

#### (xv) Modification & replacements of financial assets

The Group sometimes modifies the contractual terms and conditions of loans provided to customers due to commercial renegotiations, or for distressed loans, with a view to maximizing recovery (note 2.e.c.i) (note 3.a.iv).

The Group assesses if there is a subsequent significant increase in credit risk in relation to such assets through the Classified Credit Management Review process.

#### Financial risk management (CONTINUED)

#### b. Market risk

The Group takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market factors. Market risks arise from open positions in interest rate, currency, commodity and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates, commodity prices and equity prices. The Group separates exposure to market risk into either trading or non-trading portfolios.

The market risks arising from trading and non-trading activities are measured separately by the Group Market Risk Unit who submit reports to the SMERMC on a regular basis and also reports via the Group Enterprise Risk Management Unit to the Board Enterprise Risk Management Committee to enable Board oversight of market risk issues. Additionally, on a monthly basis, the Group's Pricing Committee reviews and approves the yield curves used to value all investment securities and reports on this into the Group ALCO. This Committee also provides to the Group ALCO, technical information that may be relevant to current and developing market conditions from time to time.

Trading portfolios include those portfolios arising from market-making transactions where the Group acts as a principal with clients or with the market. Trading portfolios are those positions entered into primarily to take advantage of market movements to generate capital gains.

Non-trading portfolios primarily arise from the interest rate management of the Group's retail and commercial banking assets and liabilities. Nontrading portfolios consist of interest rate, foreign exchange and equity risks arising from the Group's fair value through other comprehensive income portfolio of financial assets.

#### (i) Currency risk

The Group takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. It is the policy of the Group not to engage in speculative foreign exchange activities, since its primary focus is to supply foreign currency to customers at a profit, with the US dollar dominating trading. However, as supply usually lags behind customer demand, the Group may find itself in an overbought or oversold position.

The Group's strategy of managing this risk is to buy low and sell high; establish relationships with corporate foreign exchange earners; limit foreign exchange exposure; avoid speculation with an aim to keep a balanced position; and match foreign currency denominated assets with foreign currency denominated liabilities. The Group does not currently engage in any hedging activities to mitigate currency risk.

#### Financial risk management (CONTINUED)

- b. Market risk (CONTINUED)
  - (i) Currency risk (CONTINUED)

Included in the "Other" category are assets and liabilities held in UK Pound Sterling, Canadian Dollars, Euros, Barbados Dollars, Eastern Caribbean Dollars and Yen. A 1% increase or decrease in any of these currencies would not significantly impact the Group's profit.

If the TT\$ appreciates by 250 basis points against the US\$, the profit would increase by \$122.4 million (2019: decrease by \$115.4 million). The average change for the last three (3) years was 1 basis points (2019: 19 basis points). The change for 2020 was 30 basis points (2019: nil).

#### (ii) Interest rate risk

Interest rate risk management focuses on potential changes in net interest income resulting from changes in interest rates, product spreads and mismatches in the re-pricing between interest rate sensitive assets and liabilities.

The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and future cash flows. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of the changes in market interest rates. Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of the changes in market interest rate. The Group takes on exposure to the effects of fluctuations in the prevailing level of market interest rates on both its fair value and cash flow risks.

The Group's objective in the management of its interest rate risk is to reduce the sensitivity of its earnings and overall portfolio value to fluctuations in the interest rate. The strategy employed to achieve this involves the active pricing of deposit and loan products, increasing market share of loans and funding, diversifying portfolios, changing the mix of products in accordance with market trends and reducing funding mismatch through long-term instruments.

The table below summarizes the Group's exposure to interest rate risk. The assets and liabilities are categorized by the earlier of the repricing date and the maturity date.

Interest rate risk management focuses on the potential changes in net interest income resulting from changes in interest rates, product spreads and mismatch in the re-pricing between interest rate sensitive assets and liabilities.

A 100 basis point increase in interest rates will cause an increase in profit of \$3.3 million (2019: decrease of \$8.1 million) and a decrease in reserves of \$464.5 million (2019: \$443.5 million).

(Expressed in Trinidad and Tobago dollars)

#### Financial risk management (CONTINUED)

#### b. Market risk (CONTINUED)

#### (iii) Other price risk

Other price risk arises due to the possibility that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Group is affected by changing prices of equity instruments mainly classified as fair value through other comprehensive income securities with fair value movements recognized in shareholders' equity. Management has determined that the impact of the price risk on equity instruments classified as fair value through other comprehensive income is immaterial at the end of both periods reported.

#### c. Liquidity risk

Liquidity risk is the risk that the Group will be unable to generate or obtain sufficient cash or its equivalent in a timely and cost-effective manner to meet its commitments when they fall due under normal and stress circumstances and arises from fluctuations in cash flows. The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits and other funding instruments, loan draw downs, guarantees and from margin and other calls on cash settled derivatives. The Group does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty.

#### Liquidity risk management process

The Group's liquidity management process is carried out by the Treasury and International Trade Centre and monitored by the Group's Asset and Liability Committee. The Group's liquidity management framework is designed to ensure that there are adequate reserves of cash and other liquid securities to satisfy current and prospective commitments arising from either on-balance sheet or off-balance sheet liabilities. The Group relies on a broad range of funding sources and applies prudent limits to avoid undue concentration. Current and projected cash flows are monitored, together with diversification of funding and contingency planning, and ensuring that funding disturbances are minimized. The Group manages liquidity risk using both expected and contractual cash flows, by preserving a large and diversified base of core deposits from retail and commercial customers, by maintaining ongoing access to wholesale funding and by maintaining a liquid pool of marketable securities dedicated to mitigating liquidity risk as a contingency measure. Fallback mechanisms include access to the local interbank and institutional markets and stand-by lines of credit with external parties and the ability to close out or liquidate market positions.

Compliance with liquidity policies and risk limits is tracked by Group Market Risk and reported into the Senior Management Enterprise Risk Management Committee and via the Group Enterprise Risk Management Unit to the Board Enterprise Risk Management Committee.

#### Financial risk management (CONTINUED)

- c. Liquidity risk (CONTINUED)
  - (ii) Assets held for managing liquidity risk

The Group holds a diversified portfolio of cash and high-quality highly-liquid securities to support payment obligations and contingent funding in a stressed market environment. The Group's assets held for managing liquidity risk comprise:

- Cash and balances with central banks;
- Certificates of deposit:
- Government bonds and other securities that are readily acceptable in repurchase agreements with central banks; and
- Secondary sources of liquidity in the form of highly liquid instruments in the Group's investment portfolios.

#### (iii) Off-Balance sheet items

The table below analyses the contingent liabilities and commitments of the Group into relevant maturity groupings based on the remaining period at the year end to the contractual maturity date.

	Up to 1 month	1 to 3 months	3 to 12 months	1 to 5 years	Over 5 years	Total
As at 30 September 2020	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Credit commitments	249,034	_	207,793	_	_	456,827
Acceptances	31,337	17,112	14,605	_	_	63,054

(Expressed in Trinidad and Tobago dollars)

#### Financial risk management (CONTINUED)

#### d. Fiduciary activities

The Group provides custody, trustee and investment management services to third parties which involve the Group making allocation and purchase and sale decisions in relation to a wide range of financial instruments. Those assets that are held in a fiduciary capacity are not included in these consolidated financial statements. The assets under administration at 30 September 2020 totalled \$32.3 billion (2019 - \$31.0 billion).

#### e. Capital management

The Group's objectives when managing capital, which is a broader concept than the equity on the face of the statement of financial position, are:-

- To comply with the capital requirement set by the regulators in the differing jurisdictions in which the Group operates;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns to shareholders and benefits for other stakeholders:
- To ensure that the Group can remain solvent during periods of adverse earnings or economic decline; and
- To ensure that the Group is adequately capitalized to cushion depositors and other creditors against losses.

Capital adequacy and the use of regulatory capital are monitored monthly by the Group ALCO, employing techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervisory practices, as implemented by the Central Bank of Trinidad and Tobago for supervisory purposes. The required information is filed with the Central Bank of Trinidad & Tobago on a monthly basis.

The Central Bank of Trinidad & Tobago requires each financial institution to:-

- Maintain a ratio of qualifying capital to risk-adjusted assets of not less than the minimum standard of 8%.
- Core capital must not be less than fifty percent (50%) of qualifying capital i.e. supplementary capital must not exceed core capital.

The Central Bank of Barbados requires each financial institution to:-

• Maintain a ratio of qualifying capital to risk-weighted assets of not less than the minimum standard of 8%, of which the core capital shall be at least 4%.

The Group's regulatory capital is comprised of:-

- Tier 1 (Core) Capital share capital, retained earnings and reserves created by appropriations of retained earnings.
- Tier 2 (Supplementary) Capital qualifying subordinated loan capital, impairment allowances and unrealized gains arising on the fair valuation of fair value through other comprehensive income securities and property, plant and equipment.

(Expressed in Trinidad and Tobago dollars)

#### Financial risk management (CONTINUED)

e. Capital management (CONTINUED)

#### Tier 1 (Core) Capital

	2020 \$'000	2019 \$'000
Share capital	354,957	354,957
Statutory reserve	1,241,412	884,689
Retained earnings	4,610,815	4,712,675
Less: Intangible assets	(223,859)	(222,688)
Total Tier 1	5,983,325	5,729,633
<b>Tier 2 (Supplementary) Capital</b> Preference shares	103,600	103,600
Fair value reserves	1,110,629	1,096,130
Eligible reserve provision	68,044	39,850
Total Tier 2 Capital	1,282,273	1,239,580
Total Capital	7,265,598	6,969,213
Ratios Risk adjusted assets	18,421,038	17,154,594
Qualifying capital to risk adjusted assets	39.44%	40.63%
Core capital to qualifying capital	82.35%	82.21%

As at 30 September 2020 the Bank and its qualifying subsidiaries were in compliance with these requirements.

The Ministry of Finance, Economic Affairs and Investments of the Government of Barbados, via a letter dated 9 October 2018, advised that First Citizens Bank (Barbados) Limited has a three (3) year period in which to restore its capital to at least the statutory minimum.

In March 2020, the parent company, First Citizens Bank made an additional capital injected of BBD 37.0M (2019: USD 1.25M) into First Citizens Bank Barbados limited (FCBB) to address a deficient capital adequacy ratio. As at 30 September 2020, FCBB was in compliance with a ratio of 21.8%.

(Expressed in Trinidad and Tobago dollars)

#### Financial risk management (CONTINUED)

- f. Fair value of financial assets and liabilities
  - (i) Financial instruments not measured at fair value

The following table summarizes the carrying amounts and fair values of those financial assets and liabilities presented on the Group's consolidated statement of financial position at an amount other than their fair value.

	Carrying value		Fa	ir value
	2020	2019	2020	2019
Financial assets	\$'000	\$'000	\$'000	\$'000
Cash and due from other banks	5,176,856	3,675,964	5,176,856	3,675,964
Statutory deposits with Central Banks Financial instruments	4,920,429	3,507,579	4,920,429	3,507,579
- Loans to customers	19,040,472	18,624,265	21,556,700	19,086,700
- Investments - amortized cost	5,001,413	4,940,230	5,162,809	5,111,705
- Loan notes	147,399	221,099	165101	254,097
Other assets	423,937	386,027	423,937	386,027
Financial liabilities				
Customers' deposits	28,917,234	25,850,690	29,052,486	25,941,707
Other funding instruments	4,225,865	4,175,011	4,342,395	4,288,072
Bonds payable	3,625,194	2,928,855	3,570,345	3,070,439
Notes due to parent	58,000	58,000	58,000	58,000
Due to other banks	2,011,616	2,204,290	2,205,826	2,279,069
Creditors and accrued expenses	670,764	661,531	670,764	661,531

The fair values of the Group's financial instruments are determined in accordance with International Financial Reporting Standards (IFRS 9). See note 4 for further details of the fair value measurements (note 3.f).

(Expressed in Trinidad and Tobago dollars)

#### 3 Financial risk management (CONTINUED)

- f. Fair value of financial assets and liabilities (CONTINUED)
  - (i) Financial instruments not measured at fair value (CONTINUED)

Financial instruments where carrying value is equal to fair value

Due to their liquidity and short-term maturity, the carrying values of certain financial instruments approximate their fair values. Financial instruments where carrying value is approximately equal to fair value include cash and due from other banks and statutory deposits with Central Banks.

Loans to customers less allowance for loan losses

Loans to customers are net of specific and other provisions for impairment, which reflects the additional credit risk. The estimated fair value of these loans represents the discounted amount of future cash flows based on prevailing market rates.

Investments - amortized cost

Fair value for amortized cost assets is based on market prices or broker/dealer price quotations. Where this information is not available, fair value is estimated using a discounted cash flow valuation methodology where all cash-flows of the instruments are discounted at an appropriate yield plus a credit spread where applicable. The fair value of the amortized cost portfolio is computed for disclosure purposes only. See note 3.f.ii for Fair Value Hierarchy.

Loan notes

The fair value of these notes are calculated using discounted cash flow analyses of comparable government borrowing rates for the terms indicated.

Customer deposits

Due to their liquidity and short-term maturity, the carrying values of some customer deposits approximate their fair value. The fair value of the other customer deposits are computed using discounted cash flow analyses at current market interest rates.

Bonds payable

The fair value of bonds payable is calculated using discounted cash flow analyses assuming the 'yield-to-call' method of valuation, when call options are in the money. When they are not in the money, the yield to maturity method of valuation is used. These bonds carry fixed interest rates and have been discounted using the prevailing market rate of similar instruments.

Note due to parent company

This note is payable on demand (no maturity stated). The fair value of this note approximates its carrying value.

(Expressed in Trinidad and Tobago dollars)

#### Financial risk management (CONTINUED)

- f. Fair value of financial assets and liabilities (CONTINUED)
  - (ii) Fair value hierarchy

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to these valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created instruments whose fair value is determined based on the following fair value hierarchy:-

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes debt instruments.
- Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

The following table shows an analysis of financial instruments measured at fair value by level of the fair value hierarchy:

As at 30 September 2020 Financial assets	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
Fair value through profit or loss				
- Debt securities	_	22,351	_	22,351
- Equity securities	_	502	_	502
	_	22,853	_	22,853
Fair value through other comprehensive income				
- Debt securities	527,943	10,469,615	104,342	11,101,900
- Equity securities	321,041	2,749	14,284	338,074
	848,984	10,472,364	118,626	11,439,974

(Expressed in Trinidad and Tobago dollars)

#### **Critical accounting estimates and judgements**

The Group makes estimates and assumptions about the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year are outlined below:

a. Fair value of financial assets - fair value through other comprehensive income

The Group uses the discounted cash flow method to determine the fair value through other comprehensive income financial assets not traded in active markets. The discounted cash flow method discounts the cash-flows of the financial assets at an appropriate yield plus a credit spread where applicable. The carrying amount of the fair value through other comprehensive income financial assets would decrease by \$464.5 million if the discount rate used in the discounted cash flow analysis is increased by 100 basis points from management's estimates (2019 - \$443.5 million).

The Group's credit spread methodology utilizes gradient tenors and currency specific spreads. The appropriate credit spread for the agency or corporate fixed income security is determined using a cubic spline interpolation of the appropriate currency and credit rating category in the credit spread matrix based on the remaining tenor of the facility. This singular credit spread is then added to the discount spot rates to value the facility using the discounted cashflow method. In June 2017, Group Market Risk revised this methodology to reflect the credit risk of the facility as the credit risk on a per cash flow basis, and no longer on the full maturity of the facility. This resulted in moving from applying a single credit spread based on term to maturity, to multiple credit spreads based on each cash flow's term to maturity.

These financial statements include estimates of fair values of Government of Barbados instruments issued on 1 October 2018 in exchange for previously defaulted instruments. The fair values were obtained by identifying the relevant cashflows on each new instrument and discounting them to present values using the term structure of the derived Barbados dollar yield curve.

The proposed cash flows were discounted using the BBD yield curve derived using the Group's Pricing Methodology for Non Eurobond Securities. The sum of these discounted cash flows represented the Fair Value (as given by the NPV) of the New Instrument. The Impairment was determined as the difference between the NPV of the restructured bonds and the book value of the existing Government of Barbados bonds.

The models used to determine fair values are validated and periodically reviewed by experienced personnel at Group Market Risk.

#### b. Purchase Originated Credit-Impaired (POCI)

POCI financial assets are those for which one or more events that have a detrimental impact on the estimated future cash flows have already occurred. Indicators include:

- Borrower or issuer is experiencing significant financial difficulty;
- A breach of contract, such as a default or past due event;
- The granting of an uncustomary concession(s) by the lender(s) as a result of the borrower's financial difficulty;
- A high likelihood of bankruptcy or other financial reorganisation by the borrower;
- The loss of an active market for that financial asset because of financial difficulties; or
- The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

(Expressed in Trinidad and Tobago dollars)

#### **Critical accounting estimates and judgements** (CONTINUED)

b. Purchase Originated Credit-Impaired (POCI) (CONTINUED)

The Government of Barbados (GoB) Series D bond has a duration of 35 years and Series B bond has a duration of 15 years. They attract a coupon of 1.5% and 1% respectively.

The GoB Series D bonds amortized price as at 1 October 2019 was \$69.76 (1 October 2018: \$64.63), the effective interest rate was determined at 7.56% for both 2018 and 2019 using an adjusted blended yield curve. However, because these bonds have been recognized as POCI, the effective interest rate needed to be adjusted to reflect the expected cash flows – net of expected credit losses. Lifetime expected credit losses were used in the estimated cash flows for the purposes of calculating the effective interest rate – resulting in a credit-adjusted effective interest rate (CAEIR).

Valuation of the Government of Barbados Instruments Credit-Impaired

As at 1 October 2018, the Government of Barbados instruments received in the debt exchange, were classified at initial recognition as POCI, for which the carrying value was determined by discounting the expected cashflows using a suitable yield curve. The curve utilized was constructed using a methodology that captured a market participant's perspective. This took into consideration the risk appetite, and compensations thereof, of investors who participated in similar restructures of sovereign debt and the resulting observations of their yield curves, post-restructure. The curve was constructed using the inputs obtained up to the fifteen year point from FCIS Research and Analytics Department's market reads process. Due to the limitation of available data beyond the fifteen year point, another sovereign of similar credit rating that underwent a restructure was combined through interpolation/extrapolation to produce a blended curve.

The amortization schedule for the POCIs held by the group was arrived by the following:-

- The instruments had irregular cash flow schedules. This meant that it was highly sensitive to rounding errors, often leading to amplification of small changes in inputs.
- Inherent in these instruments is constant revision. While our modelled cash flows predicted immediate coupon haircuts, these did not materialize as actual cash flows were as contractually promised.
- Hence the modelled cash flows had to be adjusted for actuals being different from expected; as well as changes to future expectations.

The amortized prices were as follows:-

Instrument	Series B	Series D
Opening Price at 1 October 2019	69.84	69.76
Interest Accrued	4.76	4.42
Cash Received	(1.00)	(1.5)
ECL Unwinding	2.06	3.04
Calculated Price at 30th September 2020	75.65	75.72
Price Movement for Year	5.81	5.96

(Expressed in Trinidad and Tobago dollars)

#### 4 Critical accounting estimates and judgements (CONTINUED)

#### c. Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for financial assets measured at amortized cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in note 3.a.v, which also sets out key sensitivities of the ECL to changes in these elements. In the current COVID19 environment, additional factors were taken into consideration (ref 3.a.iii, 3.a.iv, 3.a.vi).

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.
- Determination of macroeconomics drivers and forecasting macroeconomic scenarios
- Recovery rates on unsecured exposures
- Drawdown of approved facilities

#### Loss given default

The Loss Given Default rate on corporate senior unsecured bonds is estimated to be 60% based on the International Swaps and Derivatives Association standard Credit Default Swap contract specification for North American corporate issuers. The Loss Given Default rate on sovereign senior unsecured bonds is estimated to be 46% based on the average Loss Given Default rate on Sovereign bonds during the period 1983 to 2019 as reported by Moody's Investors Service (note 3.a.vi).

#### d. Income taxes

Management judgement is required in determining provisions for income taxes and there are many transactions and calculations for which the ultimate tax determination is uncertain. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. When appropriate, particularly where the ultimate tax determination is uncertain, management also obtains opinions or advice from leading tax advisors and regularly reassesses its strategy in relation to such exposures.

The Group is subject to income tax in variance jurisdictions. Tax is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date. Substantive enactment is considered to be achieved when further steps in the enactment process will not change the outcome of a proposed change in tax law. Management considers the legislative process applicable in each jurisdiction in which it operates in determining at what point a proposed change in tax law will be considered substantively enacted by identifying the point after which further steps in the enactment process will not affect the outcome of the proposed change. In January 2018, the Corporation tax rate for financial institutions in Trinidad and Tobago was increased to 35%.

In November 2018, the Government of Barbados announced the reduction of corporate income tax rates to a sliding scale of 5.50% to 1.00% for fiscal years beginning 1 January 2019.

(Expressed in Trinidad and Tobago dollars)

#### **Critical accounting estimates and judgements** (CONTINUED)

#### e. Retirement benefits

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of pension obligations.

The assumptions used in determining the net cost (income) for pensions include the discount rate, salary and pension increases. The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Group considers the interest rates of high-quality corporate bonds, and where no deep corporate market exist, the Government bonds are used, that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. In determining the salary increases, the Group considered long-term salary inflation, age, merit and promotion (note 21.j for sensitivity).

#### f. Fair valuation of properties

The best evidence of fair value is current prices in an active market for similar lease and other contracts. In the absence of such information, the Bank determines the amount within a range of reasonable fair value estimates. In making the judgement, the Bank considers information from a variety of sources including:

- (i) Current prices in an active market for properties of different nature, condition or location (or subject to different lease or other contracts), adjusted to reflect those differences:
- (ii) Recent prices of similar properties in less active market, with adjustments to reflect any changes in economic conditions since the date of the transactions that occurred at those prices; and
- (iii) Discounted cash flow projections based on reliable estimates of future cash flows, derived from the terms of any existing lease and other contracts and (where possible) from external evidence such as current market rents for similar properties in the same location and condition, and using discount rates that reflect current market assessments of the uncertainty in the amount and timing of the cash flows.
- (iv) The Group engaged external, independent and qualified valuators to determine the fair value of the Group's land and buildings. The valuations were performed in August 2018. The Group's policy is to obtain independent valuations for freehold land and buildings at least every three years. (note 14(a) ii).

The valuations are based on current market conditions and thus may change in the future (note 14 (a) ii). The impact of COVID-19 on the Bank's properties is being treated as a short term event, which is not measurable at this point in time due to the high level of uncertainty in the real estate market. However, in accordance with the Bank's policy, an external valuation will be performed in 2021 and would be indicative of the market's outlook.

#### g. Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment in accordance with the accounting policy stated in note 2 b (iii). The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. If the discounted rate used in the value-inuse calculation was increased by 100 basis points from management's estimates, the value-in-use calculation will still exceed the fair value less cost to sell calculation, and there will be no impairment of goodwill.

(Expressed in Trinidad and Tobago dollars)

#### **Segment analysis**

For management purposes, the Group is organized into five business segments based on products and services as follows:-

- Retail banking: includes loans and mortgages, deposit, foreign exchange transactions, credit and debit cards and card merchant acquiring business with retail and commercial customers.
- Corporate banking: loans and credit facilities and deposits and current accounts for corporate and institutional customers.
- Treasury management and investment banking: Liquidity management and investment banking services including corporate finance, and specialized financial trading.
- Asset management: Investment products and services to institutional investors and intermediaries.
- **Group function:** Finance, legal, and other centralised functions.

Other Group operations comprise fund management, institutional finance and providing computer services, none of which constitutes a separately reportable segment and business activities from head office.

As the Group's segment operations are all financial with a majority of revenues deriving from interest and the Group Chief Executive Officer relies primarily on net interest revenue to assess the performance of the segment, the total interest income and expense for all reportable segments is presented on a net basis.

There were no changes in the reportable segments during the year.

Transactions between the business segments are carried out at arm's length. The revenue from external parties reported to the Group Chief Executive Officer is measured in a manner consistent with that in the consolidated income statement. The segmental information is reported gross and therefore consolidation adjustments have not been eliminated.

Funds are ordinarily allocated between segments, resulting in funding cost transfers disclosed in inter-segment net interest income. Interest charged for these funds is based on the Group's average cost of funding. There are no other material items of income or expense between the business segments.

Internal charges and transfer pricing adjustments have been reflected in the performance of each business. Revenue-sharing agreements are used to allocate external customer revenues to a business segment on a reasonable basis.

The Group's management reporting is based on a measure of operating profit comprising net interest income, loan impairment charges, net fee and commission income, other income and non-interest expenses.

The information provided about each segment is based on the internal reports about segment profit or loss, assets and other information, which are regularly reviewed by the Executive Management.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of the consolidated statement of financial position.

(Expressed in Trinidad and Tobago dollars)

#### Cash and due from other banks

	2020 \$'000	2019 \$'000
Cash and bank balances Short-term investments	3,178,165 1,998,691	2,180,259 1,495,705
	5,176,856	3,675,964
Short-term investments:		
- 3 months from the date of acquisition	791,149	1,088,650
- Maturity over 3 months	1,207,542	407,055
	1,998,691	1,495,705

The average effective interest rate on short-term bank deposits was 1.7% (2019: 2.9%); these deposits have an average maturity of 90 days (2019: 90 days).

Cash and cash equivalents include the following for the purposes of the consolidated statement of cash flow:

Cash and bank balances	3,178,165	2,180,259
Short-term investments – maturity within 3 months	791,149	1,088,650
Due to other banks	(2,011,616)	(2,204,290)
	1,957,698	1,064,619

#### **Statutory deposits with Central Bank**

Under the provisions of Financial Institutions Act 2008 (Trinidad and Tobago), the Bank and its subsidiary (First Citizens Depository Services Limited) are required to maintain as a deposit with the Central Bank of Trinidad and Tobago restricted cash balances. These balances represent a ratio of certain deposit liabilities held in such form and to such extent as the Central Bank may prescribe from time to time. As of 30 September 2020, the current ratio was 14% for First Citizens Bank Limited and 9% for First Citizens Depository Services Limited. Under the provisions of the Act, it can be waived for a specified period of time and on such conditions as may be determined by the Central Bank.

In Barbados, under the provisions of the Financial Institution Act, 1996-16, the Bank's subsidiary, First Citizens Bank (Barbados) Limited, is required to maintain as a deposit with the Central Bank of Barbados restricted cash balances. This balance represents a ratio of customers deposit balances (both domestic and foreign currency) held in such form and to such extent as the Minister, on advice of the Central Bank may prescribe from time to time. As at 30 September 2020, the ratio was 15% of total domestic customer deposit balances (comprising 10% government securities and 5% cash) plus 2% of total foreign customer deposit balances.

As at 30 September 2020, the Bank and its qualifying subsidiaries were in compliance with these requirements.

#### Loan notes

The loan notes due to the Group comprise the following:

	2020 \$'000	2019 \$'000
(i) Taurus Services Limited (ii) First Citizens Holdings Limited (Holdings)	136,971 10,428	205,457 15,642
	147,399	221,099

(i) This represents several interest bearing notes issued by Taurus Services Limited as consideration for assets sold to Taurus Services Limited as part of the restructuring of the three former banks and Government support for the Company on its formation (See Note 1).

The terms of the original notes, dated 30 September 1994, were as follows:

- Tenor of 15 years with effect from 30 September 1994;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum;
- A moratorium of 5 years on principal payments; and
- Government guarantee.

On 1 October 2000, a new agreement was entered into whereby the GORTT made a bullet payment to reduce part of the interest accrued. The unpaid portion of the interest up to that date of \$150 million was capitalized. Thereafter, accrued interest was capitalized semi-annually until 30 September 2002 (the end of the moratorium) and this totalled \$198.4 million. The new principal balance outstanding on the restructured loan notes as at 30 September 2004 which includes all capitalized interest to date amounted to \$1,267 million.

The terms of this new agreement are as follows:

- Tenor of 22 years with effect from 1 October 2000;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum;
- A moratorium of 2 years on both principal and interest;
- Payment of principal and interest in semi-annual intervals thereafter; and
- Government guarantee.

To date, these notes have been serviced in accordance with the new agreement. These notes are not transferable.

- (ii) This represents the balance on a loan note issued by Holdings as consideration for \$40 million redeemable preference shares in the Bank and a non-interest bearing note in the amount of \$58 million issued by the Bank. The original terms of the note were as follows:
  - Tenor of 15 years with effect from 30 September 1994;
  - Interest rate of 4.5% below prime with a floor rate of 11.5% per annum; and
  - Government guarantee.

On 1 October 2000, a new agreement was entered into whereby unpaid interest up to that date of \$11.2 million was capitalized. Thereafter, accrued interest was capitalized semi-annually until 30 September 2002 (the end of the moratorium) and this totalled \$17.9 million. The new principal balance outstanding on the restructured loan note as at 30 September 2004 which includes all capitalized interest to date amounted to \$96.5 million.

(Expressed in Trinidad and Tobago dollars)

### Loan notes (CONTINUED)

The terms of this new agreement are as follows:

- Tenor of 22 years with effect from 1 October 2000;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum;
- A moratorium of 2 years on both principal and interest;
- Payment of principal and interest in semi-annual intervals thereafter; and
- Government guarantee.

To date, this note has been serviced in accordance with the agreements. This note is not transferable.

The ECL for the Taurus note was computed using the PD for the GORTT, which is a counterparty of this agreement. This is classified under Stage 1 with no impact.

### a. Recognized fair value measurements

### (i) Fair value hierarchy

This note explains the judgements and estimates made in determining the fair values of the non-financial assets that are recognized and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its non financial assets carried at fair value into the three levels prescribed under the accounting standards. An explanation of each level is provided in note 3.g.ii.

(Expressed in Trinidad and Tobago dollars)

### **Property, plant and equipment** (CONTINUED)

- a. Recognized fair value measurements (CONTINUED)
  - (i) Fair value hierarchy (CONTINUED)

Level 3	2020 \$'000	2019 \$'000
Land and building Building on Lease Land Freehold Land	428,266 37,827 2,250	421,036 38,022 2,250
	468,343	461,308

The Group's policy is to recognize transfers into and transfers out of fair values hierarchy levels as at the end of the reporting period. There were no transfers between levels 1 and 2 for recurring fair value measurements during the year.

#### (ii) Valuation techniques used to determine level 2 and level 3 fair values

As at 30 September 2020, the Group's freehold premises were stated at revalued amounts determined by management. Valuations were made on the basis of open market value. Open market values are determined by considering the current market condition. Changes in fair value are recorded in the statement of comprehensive income. The Group's policy is to obtain independent valuations for its freehold land and buildings at least every three years.

At the end of each reporting period, management update their assessment of the fair value of each property, taking into account the most recent independent valuations. Management determine a property's value within a range of reasonable fair value estimates.

The best evidence of fair value is current prices in an active market for similar properties. Where such information is not available, Management may consider information from a variety of sources including:

- current prices in an active market for properties of different nature or recent prices of similar properties in less active markets, adjusted to reflect those differences:
- discounted cash flow projections based on reliable estimates of future cash flows.

#### (iii) Transfer between level 2 and 3 and change in valuation techniques

There were no transfers between levels 2 and 3 for recurring fair value measurements nor change in the valuation technique during the financial year.

Level 3 fair values of land and retail units have been derived using the sales comparison approach. Sales prices of comparable land and buildings in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square foot. If the price per square foot increase by 100 basis points, the fair value will increase by \$13.0M (2019: \$13.0M) with a corresponding entry in the reserve in shareholders' equity.

(Expressed in Trinidad and Tobago dollars)

### **14 Property, plant and equipment** (CONTINUED)

a. Recognized fair value measurements (CONTINUED)

(iii) Transfer between level 2 and 3 and change in valuation techniques (CONTINUED)

If freehold premises were stated on the historical cost basis, the amounts would be as follows:

	2020 \$'000	2019 \$'000
Cost Accumulated depreciation	390,223 (155,748)	381,181 (148,725)

Goodwill is reviewed annually for impairment or more frequently when there are indicators that impairment may have occurred.

Impairment test for goodwill

Goodwill is allocated for impairment testing purposes for the following cash generating units as follows:-

Goodwill	2020 \$'000	2019 \$'000
First Citizens Investment Services (FCIS)	156,886	156,886
	156,886	156,886

The recoverable amounts of the cash generating units were determined based on value-in-use. Cash flow projections used in the value-in-use calculations were based on financial projections by management covering a five (5) year period and a discount rate. Cash flow beyond that five year period have been extrapolated using the growth rate for the respective units.

(Expressed in Trinidad and Tobago dollars)

#### **Intangible assets** (CONTINUED)

The key estimates used in the value-in-use calculations are as follows:-

	FCIS	
	2020	2019
Estimates used in the value for use		
Net interest margin growth	5.34%	8.79%
Growth rate	5.05%	8.36%
Discount factors	4.36%	4.69%

These assumptions were used for the analysis of each cash generating unit. Management determined the net interest margin and growth rate based on past performance and its expectations of the market developments.

Goodwill is reviewed annually for impairment, or more frequently when there are indicators that impairment may have occurred. The impairment test carried out as at 30 September 2020 for FCIS, revealed that the value in use is in excess of the carrying amount.

#### **Customers' deposits** 16

Deposits are analysed by sector as follows:

	2020 \$'000	2019 \$'000
Public institutions	11,952,823	10,404,624
Private institutions	7,123,281	6,546,497
Consumers	9,841,130	8,899,569
	28,917,234	25,850,690
Current portion	28,439,351	25,380,350
Non-current portion	477,883	470,340
	28,917,234	25,850,690
	•	

Deposits due to customers only include financial instruments classified as liabilities at amortized cost. Deposits amounting to \$3.4 billion (2019: \$6.4 billion) are at fixed rates. All other deposits amounting to \$25.5 billion (2019: \$19.5 billion) are at variable rates.

(Expressed in Trinidad and Tobago dollars)

### 17 Other funding instruments

	2020 \$'000	2019 \$'000
Repurchase agreements	4,015,263	3,900,512
Funds under management	28,240	25,748
USD fixed rate note	182,362	248,751
	4,225,865	4,175,011
Other funding instruments are analysed by sector as follows:		
Public institutions	1,593,927	1,110,100
Private institutions	1,553,028	1,974,936
Consumers	1,078,910	1,089,975
	4,225,865	4,175,011
Current portion	3,404,119	3,382,134
Non-current portion	821,746	792,877
	4,225,865	4,175,011

The securities sold under the repurchase agreements only include financial instruments classified at amortized cost (see Note 8a). Interest rates on these repos range from 0.1% to 4.0% in 2020 (2019: 0.20% to 5.89%).

#### **Due to other Banks**

Short term	1,568,358	1,769,580
Medium term	443,258	434,710
	2,011,616	2,204,290

Short-term borrowings represented demand facilities via a number of financial institutions.

Medium term borrowings represent unsecured borrowings of US\$36.09 million, and TT\$200 million from clients for a period of one to three years (2019: US\$35.1 million and TT\$197.7 million). The average interest rate for 2020 was 2.80% (2019: 3.63%).

(Expressed in Trinidad and Tobago dollars)

### 19 Creditors and accrued expenses

	2020 \$'000	2019 \$'000
Accrued expenses	202,946	193,751
Other liabilities	220,972	228,448
Interest payable	87,109	85,845
Due to GOTT	24,685	23,171
Due to brokers	3,927	5,247
Funds payable to bondholders	131,125	125,069
	670,764	661,531

The amount due to GORTT relates to what is owed by the Bank with respect to payments made on claims which were subsequently recovered pursuant to Liquidity Support Agreement outlined in note 3 a.(viii) (e).

#### 20 Leases

### 21 Retirement benefit liability (CONTINUED)

c. The defined benefit obligation is allocated between the Plan's members as follows:

	2020	2019
- Active	65%	68%
- Deferred members	5%	7%
- Pensioners	30%	25%
The weighted average duration of the defined		
benefit obligation at year end	19.3 years	18.6 years

96% of the benefits for active members are vested

40% of the defined benefit obligation for active member is conditional on future salary increases

d. Movement in fair value of plan assets:

		\$'000	\$'000
	Beginning of year	1,393,802	1,343,706
	Interest income	77,134	73,797
	Return of plan assets, excluding interest income	(18,826)	(19,785)
	Company's contributions	51,110	29,888
	Members contributions	15,853	14,198
	Benefits paid	(47,900)	(46,535)
	Expense allowance	(1,579)	(1,467)
	Fair value of plan assets at end of year	1,469,594	1,393,802
	Actual return on plan asset	58,308	54,012
e.	Asset allocation		
	Local and regional equity securities	401,668	397,162
	Overseas equities (outside CARICOM)	242,417	224,683
	TT\$ denominated bonds	704,317	667,973
	US\$ denominated bonds	40,269	40,353
	Cash and cash equivalents	80,923	63,361
	Other (annuities, mortgages etc.)		270
	Fair value of plan assets at end of year	1,469,594	1,393,802

All asset values as at 30 September 2020 were based on unaudited accounts provided by First Citizens Trustee Services Limited. Overseas equities have quoted prices in active markets. Local equities also have quoted prices but the market is relatively illiquid. The Plan's investment manager calculates the fair value of the Government bonds and corporate bonds by discounting expected future proceeds using a constructed yield curve.

2020

2010

(Expressed in Trinidad and Tobago dollars)

### **21** Retirement benefit liability (CONTINUED)

#### e. Asset allocation (CONTINUED)

The majority of the Plan's government bonds were issued by the Government of Trinidad & Tobago, which also guarantees many of the corporate bonds held by the Plan.

The Plan's assets are invested using a strategy agreed with the Plan's Trustee and Management Committee.

This strategy is largely dictated by statutory constraints (at least 80% of the assets must be invested in Trinidad & Tobago and no more than 50% in equities) and the availability of suitable investments.

There are no asset-liability matching strategies used by the Plan.

		2020 \$'000	2019 \$'000
f.	Expenses recognized in profit or loss	•	
	Current service costs	56,202	50,484
	Net interest on net defined benefit liability/asset	669	1,960

	Closing defined benefit liability	(121,263)	(8,885)

(Expressed in Trinidad and Tobago dollars)

### 21 Retirement benefit liability (CONTINUED)

i. Summary of principal assumptions as at 30 September

	2020	2019
Discount rate	5.5%	5.5%
Average individual salary increases	5.5%	5.5%
Future pension increases	1.25%	1.25%

Assumptions regarding future mortality are based on published mortality tables. The life expectancies underlying the value of the defined benefit obligation as at 30 September 2020 are as follows:

Life expectance	at age 60 for	current pe	nsion in years
LIIC CAPCULATION	at age of ioi	Current pc	Histori III years

- Male	21.8	21.0
- Female	26.0	25.1
Life expectance at age 60 for current members age 40 in	years	
- Male	22.7	21.4
- Female	27.0	25.4

### j. Sensitivity analysis

The calculation of the defined benefit obligation is sensitive to the assumptions used. The following table summarizes how the defined benefit obligation as at 30 September 2020 would have changed as a result of a change in the assumptions used.

	1% pa decrease	1% pa increase
Discount rate	339,364	(251,447)
Future salary increases	(116,364)	138,413
Future pension increases	(149,816)	188,288

An increase of 1 year in the assumed life expectancies shown above would increase the defined benefit obligation at 30 September 2020 by \$26.3 million (2019: \$25.1 million).

These sensitivities were calculated by re-calculating the defined benefit obligations using the revised assumptions.

#### k. Funding

The Bank meets the balance of the cost of funding the defined benefit Pension Plans and the Bank must pay contributions at least equal to those paid by members, which are fixed. The funding requirements are based on regular (at least every 3 years) actuarial valuations of the Plans and the assumptions used to determine the funding required may differ from those set out above. The Bank expects to pay \$63.2 million to the Pension Plans during 2020/2021.

(Expressed in Trinidad and Tobago dollars)

### 24 Notes due to parent company

	2020 \$'000	2019 \$'000
First Citizens Holdings Limited	58,000	58,000

The amount due to Holdings is a non-interest bearing note with no specified maturity date, issued in part consideration for a note acquired from Holdings (see Note 11 (ii)).

(Expressed in Trinidad and Tobago dollars)

### **Share capital**

The total authorised number of shares are issued and fully paid. Thirty five point five seven percentage (35.57%) of these shares are trading on the local stock exchange.

	2020 \$'000	2019 \$'000
251,353,562 ordinary shares of no par value	539,957	539,957
Treasury shares/stock	(185,000)	(185,000)
42,500,000 A preference shares of no par value	42,500	42,500
61,100,000 B preference shares of no par value	61,100	61,100
	458,557	458,557

The Class A preference shares are non-convertible, non-participating and non-voting. The option for redemption expired in September 1999. The shares pay cumulative dividend of 4% per annum.

The Class B preference shares pay cumulative dividends of 2% per annum when declared, but are non-participatory, non-voting, non-convertible and non-redeemable.

### Employee share ownership plan

In April 2017, the shareholders approved the establishment of an employee share ownership plan for the Group's staff. This ESOP was subsequently approved by the Board of Inland Revenue in December 2018. The first distribution was made in January 2019 based on the profit of the Bank for the financial period ending 30 September 2018.

The plan is designed to provide long-term incentives to the employees. The object of the plan is to permit and facilitate the transfer of the annual bonus distribution if any of the Bank to the Trustee to be applied towards the purchase of shares in the Bank to be held by the trustee to the use and benefit of participants and otherwise dealt with in accordance with the provisions of section 35 of the income tax act (Clause 3 – Trust Deed).

Each participant shall be required to contribute to the plan not less than 25% of the award allocated to him (if any) but may contribute up to 50% of the award, for the trustee to purchase shares, which shares shall be held in trust for the participants.

The number of shares to which each participant shall become entitled for allocation by the trustee shall be determined by dividing the valuation price into the amount to which each participant is entitled in the annual bonus distribution for the same plan year. The valuation price shall be the market price quoted on the Trinidad and Tobago Stock Exchange Limited.

	2020	2019
Shares allocated to the Plan		
Opening balance	5,375,958	5,781,250
Shares allocated to employees	(360,727)	(405,092)
	5,015,231	5,376,158

(Expressed in Trinidad and Tobago dollars)

#### **Statutory reserves**

The Financial Institutions Act 2008, Part VI, Section 56 1(a) (Trinidad and Tobago) stipulates that a Bank must transfer at the end of each financial year no less than 10% of its profits after taxation to a Reserve Fund until the amount standing to the credit of the Reserve Fund is not less than the stated capital or assigned capital of the Bank.

In accordance with the Financial Institutions Act 1996-16, the Bank's subsidiary, First Citizens Bank (Barbados) Limited, is required to transfer to a reserve fund a minimum of 25% of the net income for the year, wherever the amount of the reserve fund is less than the stated capital.

The FIA 2008 Section 60.1, also indicated that no licensee shall incur, deposit liabilities of an amount exceeding twenty (20) times the sum of its stated capital or assigned capital and Statutory Reserve Fund.

### **Retained earnings**

The retained earnings is the accumulated net income that is retained by the group at a particular point of time, such as at the end of the reporting period. At the end of that period, the net income (or net loss) at that point is transferred from the Profit and Loss Account to the retained earnings account.

#### Other reserves

i. Fair value reserve

For debt instruments, the fair value reserve comprises the cumulative net change in the fair value of investment securities measured at FVOCI, less ECL allowances recognized in profit or loss, net deferred tax, until the assets are derecognized or impaired.

For equity financial assets which are measured at FVOCI are not recycled to the statement of income.

ii. Revaluation reserve

The revaluation reserve relates to the revaluation of the freehold property.

iii. Re-measurement of defined benefit reserve

The remeasurements of the defined benefit represents actuarial gains and losses, returns on plan assets (outside of any changes recorded as net interest) and any changes in the asset ceiling (outside of any changes recorded as net interest).

iv. Translation reserve

The translation reserve comprises all foreign currency differences arising from translation of the financial statements of foreign operations, as well as in a separate component in equity in the consolidated financial statements.

	455,074	482,440

(Expressed in Trinidad and Tobago dollars)

### **Other operating expenses** (CONTINUED)

The Central Bank and Financial Institutions (Non-Banking) (Amendment) Act, 1986 of Trinidad & Tobago established a Deposit Insurance Fund for the protection of depositors. By the Central Bank (Deposit Insurance) Order 1986, dated 17 September 1986, an annual premium of 0.2% of the average deposit liabilities outstanding as at the end of each quarter of the preceding year is levied.

The Barbados Deposit Insurance Corporation (BDIC), established under the Deposit Insurance Act-29 of 2006, came into operation on 8 June 2007. The deposit insurance initial contribution and premium was set at 0.05% of the insurable deposits held by the member during the calendar year preceding the calendar year for which the premium is payable.

#### **Taxation** 36

	2020 \$'000	2019 \$'000
Current tax	236,869	310,454

### d. Government of the Republic of Trinidad and Tobago

As stated in note 1, on the formation of the Bank it was agreed that the assets and liabilities of the predecessor financial institutions would be transferred to the Bank and the non-performing portfolio sold to a liquidating company in consideration for an equivalent amount of Government-guaranteed notes and commercial paper. In 2009, the Bank entered into a Liquidity Support Agreement with GORTT and the Central Bank in relation to the acquisition of the shares of Caribbean Money Market Brokers Limited, now First Citizens Investment Services Limited which provided indemnification of the Bank against certain losses (Note 3.a.vii).

The current amount outstanding on these arrangements and obligations and the related income and expenses are disclosed below:-

	\$'000	\$'000
Assets Loan notes with Taurus Services Limited (Note 11 (i))	136,971	205,457
<b>Liabilities</b> Due to GORTT (Note 19)	22,890	23,171
