Anthony Isidore Smart

Anthony Isidore Smart graduated from the University of Toronto, Canada with a Bachelor of Arts Degree (General), majoring in Economics.

He is an Attorney-at-Law who has been in private practice for 50 years, for 30 of which he led the law firm of Gittens, Smart & Company. He was an elected member of the House of Representatives of the Parliament of Trinidad and Tobago from December 1986 to November 1991.

At various times between January 1987 and February 1989 he was the Deputy Speaker of the House of Representatives, Minister in the Office of the Attorney General, Minister in the Office of the Prime Minister, and Chief Whip in the House of Representatives. He was Attorney General of Trinidad and Tobago from March 1989 to November 1991. He also served as a member of the British Commonwealth Observer Team in 1992 for the first multi-party general election in Kenya 1992 in 22 years.

Mr. Smart was a tutor in Family Law at the Hugh Wooding Law School in the 1970s and was personally responsible for drafting the Code of Ethics for Ministers and Members of Parliament which was laid in the House of Representatives in 1988.

Mr. Smart was appointed as Chairman of the Board of First Citizens Bank Limited on 17 June 2014 and subsequently as Chairman of First Citizens Investment Services Limited, First Citizens Bank (Barbados) Limited, First Citizens Costa Rica S.A., First Citizens Holdings Limited, First Citizens Portfolio and Investment Management Services Limited and First Citizens Group Financial Holdings Limited.

He also served as Executive Chairman of First Citizens Bank Limited from 4 December 2014 to 7 April 2015. Mr. Smart served on the Board of the Child Welfare League of Trinidad and Tobago as a young attorney. He received the Arbor Award from the University of Toronto on November 9, 2004, for outstanding voluntary service to the University. At its 40th Anniversary celebration in 2012, the Phase II Pan Groove Steel Orchestra gave Mr. Smart an award for his service to the steel band.

Mr. Smart was inducted into the Fatima College Hall of Achievement for Public Service in 2015 and received an award for Public Service from the St. Margaret of Antioch Anglican Church, Belmont at its 125th Anniversary in 2016.

Beverly rejoined the First Citizens Group in 2015 as Head - Finance. She has over sixteen years of experience in the field of finance within the financial services, telecommunications and project management sectors. She is also a Fellow Member of the Association of Chartered Certified Accountants (FCCA) and holds an MBA from the University of Manchester.

CHAIRPERSON'S STATEMENT

The International Economy

The global economic environment experienced a volatile year as many economies faced numerous challenges. In the second month of the year, geopolitical risks increased sharply following Russia's invasion of Ukraine in February 2022, pushing energy and commodity prices higher. In response to Russia's decision, several countries implemented economic sanctions against Russian citizens and companies. Additionally, a number of international oil companies such as Shell and ExxonMobil, ceased operations in Russia, with some traders choosing to boycott Russian oil. Russia's invasion occurred at a time when the Organization of Petroleum Exporting Countries (OPEC) restrained its energy production and oil prices were elevated. As a consequence, energy prices rose at an accelerated pace.

The war also impacted food prices as it forced key Black Sea ports to remain idle and curtained the production and export of key commodities including wheat, barley, fertilizers, maize and sunflower as both countries account for roughly a quarter of global exports. Food supplies worldwide were also negatively impacted by intense heat waves and droughts in Europe and Central and South Asia, with the United Nations issuing a warning in May 2022 of possible food shortages that may last for years. In addition, China maintained its zero-COVID strategy along with strict lockdowns and mobility restrictions in 2022 which added further strain on global supply chains as China is a major global supply chain hub, contributing to rising inflationary pressures.

Consequently, countries around the world recorded decade-high inflation in 2022 that led to several central banks to adopt a tighter monetary policy in an effort to temper inflationary pressures. In the US, inflation as measured by the Consumer Price Index (CPI), peaked at 9.1% in June 2022 while in the Euro Area, inflation increased to a high of 10.7% in October 2022.The UK's annual inflation rate rose to a 40-year high of 10.1% in September 2022, up from 9.9% in August 2022, bolstered by higher food prices.

To temper the rise in consumer prices, several central banks adopted a tighter monetary policy posture with the objective of taming overall demand. The US Federal Reserve (FED) started to hike interest rates in March 2022 and has implemented six rate hikes thus far by a cumulative 375 bps. In the Euro Area, the European Central Bank (ECB) raised the three kev ECB interest rates- on the main refinancing operations, the deposit facility and the marginal lending facility, three times thus far for 2022. The Bank of England (BOE) also increased its benchmark interest rate known as the Bank Rate seven times during 2022, so far, bringing the rate to 3.00% as at November 2022.

Against this backdrop, economic activity in roughly a third of the world economy contracted over the first half of 2022 including the US and Europe.Global real GDP fell by 0.10% in the second quarter of 2022, driven by negative growth in the US, Russia, China and drastic slowdowns in Eastern European countries most affected by the Ukrainian conflict.

In its October publication, 2022 the International Monetary Fund (IMF) projected global growth to slow sharply from 6% in 2021 to 3.2% in 2022, propelled by the three largest economies - Euro Area, the US and China. The growth prospects for the Euro Area weighed down by tighter financial is conditions and the vulnerability of the region to the Russian gas supply cuts set to commence in December 2022.

First Citizens Investment Services

Growth in the US is expected to fall for the year and reflects the consecutive GDP contraction in the first and second quarter, higher interest rates and lower consumer demand. The property market crisis along with the restrictive measures will adversely impact China's projected growth for the year.

Regional Economies

In the Caribbean, the post-pandemic recovery that was expected in 2022 was somewhat thwarted as the global economy faced a myriad of challenges, including the unprecedented war in Ukraine. As vaccination rates rose and the COVID-19 infections rate fell, many countries reopened their economies and eased travel restrictions. Resultantly, tourism rebounded strongly in the first half of 2022 which benefited tourism-dependent Caribbean economies. For commodity-Caribbean exporting economies. high commodity prices, coupled with solid global demand, fueled and supported the economic expansion.

The growth prospects for the region have since shifted amid tighter global financial conditions and weaker commodity prices. As such, a deceleration is anticipated in the latter half of 2022, with the IMF projecting the Latin America and the Caribbean region to slow to 3.5% in 2022, down by 3.5% in 2021.

The Jamaican economy slowed over the ninemonth period ending September 2022 registering growth of 6.4% in the first quarter, 4.8% in the second guarter and in the range of 2.5% to 3.5% in the third quarter. The deceleration was led by contractions in the Construction sector as residential construction declined and Mining & Quarrying due to reductions in both alumina and bauxite production due to operational challenges. According to the Bank of Jamaica, the economy is projected to grow within a range of 2.5% to 8.2% for fiscal 2021/2022.

The growth momentum of 2021 continued into the first half of 2022 as the Guyanese economy achieved real oil GDP growth of 36.4%, fueled by oil production and non-oil GDP growth of 8.3%, led by quarrying, construction, agriculture and service sectors. Despite increasing by 10.9%, the impact of the devastating floods that occurred in 2021 weighed on output from the agriculture sector, as rice and sugar output declined by 17.7% and 55.9% during the first six months of 2022. The heavy rainfall resulted in less land to be sown for rice and low sucrose levels in sugar.

of travel The easing restrictions and resumption of cruise operations and travel positively impacted Barbados's economy, reflected in double-digit growth of 10.1% achieved in the first nine months of 2022. Despite the improvement in the tourism sector, arrivals remained below pre-pandemic levels as tourist arrivals reached 302,863 for the nine-month period ending September 2022, 58% below 2019 levels. The 2018 Extended Fund Facility (EFF) programme with the IMF ended in September 2022, with the government successfully meeting the quantitative targets and structural benchmarks of the programme.

Trinidad and Tobago

Based on available data from the Central Statistical Office (CSO), real GDP fell by 0.10% in the first quarter of 2022, with energy sector GDP contracting by 5.1% while non-energy GDP increased by 2.2%. Contractions in natural gas production and LNG refining drove the contraction in the energy sector output while growth in the non-energy sector was bolstered by expansions in the manufacturing, transport and storage sub-sectors. The growth momentum of the non-energy sector continued into the second quarter of 2022, supporting a moderate positive growth in economic performance.

A stronger recovery for the second half of the year is expected and will be supported by higher energy prices, with the Ministry of Finance projecting the domestic economy to grow by 2.0% in 2022 compared to a contraction of 1.0% in 2021.

Energy prices increased sharply in 2022, with crude oil increasing to a high of US\$120.67 per barrel in June and natural gas prices rising to US\$10.33 MMBtu in August. The surge in crude oil prices was largely due to a rise in global demand as economies fully reopened from the pandemic lockdowns and spillover effects from Russia's invasion of the Ukraine. Natural gas prices were supported from increased demand and relatively low inventory levels. Energy prices has since fallen, with crude oil and natural gas trading at US\$72.41 and US\$5.81 MMBtu on December 8 2022 due to waning demand against the backdrop of fears of a global economic recession and slower growth in China.

Inflationary pressures picked up in 2022, as headline inflation increased to 5.9% in July 2022, up from 3.8% at the beginning of the year owing to higher food prices. The Food price index increased from 6.6% in January 2022 to 10.3% in July 2022 owing to imported inflation. Core prices (which excludes food items) also trended upwards, increasing from 3.0% in January 2022 to 4.9% in July 2022, driven by adjustments to domestic fuel prices.

Credit demand strengthened over the period, with private sector credit increasing by 6.6% in July 2022, propelled by expansions in real estate mortgage lending, consumer credit and business loans. The rebound in credit augured well for real sector activity, as such the Central Bank of Trinidad & Tobago (CBTT) maintained the repo rate at 3.50% throughout the year. Resultantly, interest rates remained steady throughout the year, with the average prime lending rate being maintained at 7.57% during the period October 2021 to October 2022.

authen Isidore Smant

Chairman 2 December 2022

Kirst Citizens Investment Services

GENERAL MANAGER'S STATEMENT

This annual report covers the period 1 October 2021 to 30 September 2022, in keeping with the financial year end of the First Citizens Group.

During the financial year ended September 2022, global financial markets exhibited significant volatility, largely due to the rising geopolitical tensions from the ongoing war in Ukraine, decades-high inflation, aggressive interest-rate hikes and extreme movements in currency markets. Consequently, several equity markets fell into bear market territory by the second half of 2022, with losses in excess of 20%.

Faced with rising consumer prices, the US Federal Reserve (FED) pivoted in the first quarter of 2022 and adopted a tighter monetary policy. The Fed's decision to hike interest rates increased the attractiveness to hold US interestbearing assets globally and contributed to the rapid appreciation of the US Dollar. the strengthening particularly acute over the latter half of 2022, reaching historic highs against the Euro, Japanese Yen and the British Pound.

The higher interest rate environment, along with the increased demand for US securities pushed up Treasury yields, notably on the shorter tenor, resulting in the US Yield Curve to invert for a prolonged period. As at the end of October 2022, the 2 and 10 Year US Treasury yields stood at 4.48% and 4.05% respectively. In addition to the yield curve inversion, there was a general shift upwards during 2022, with the 2 year and 10 Yield yields rising by 375 basis points and 254 basis points over the ten month period. Turning to the Trinidad and Tobago market, economic activity is expected to improve in 2022, with the energy sector poised to benefit from the start-up of several upstream projects from bpTT, Shell Trinidad and Tobago, EOG Resources Trinidad and Touchstone Exploration. The foreign direct investments are estimated at US\$1.15bn in the upstream sector over the period January to December 2022, with an additional US\$1.64bn anticipated to be invested in 2023.

Similar to international markets, Trinidad & Tobago's stock market registered losses during the first ten months period ending October 2022. The Composite Index declined by 11.78% year on year, the All T&T Index registered a loss of 5.44% while the Cross Listed Index fell by 28.16%, reflecting the challenging economic and market conditions.

According to the CBTT, during the period October 2021 to June 2022, activity on the primary debt market fell significantly from 21 private placements that raised \$13.18 bn to 4 primary placements at a value of \$3.44bn. This subdued activity was also seen on the secondary government bond market, as only 3 trades were executed at a face value of \$1.9mn for the period January to September 2022, compared with 23 trades valued at \$103.3 mn during the same period in 2021.

The GOTT TTD curve steepened over the first ten months of 2022 across the majority of the tenors. On the short to medium term, the 3-month and 2-year rates increased by 23 basis points and 83 basis points to 0.55% and 1.75% respectively. On the longer end of the curve, the 10-year and 15-year rates increased by 13 basis points and 14 basis points to 5.29% and 5.99% respectively.

First Citizens Investment Services

The Government of Barbados yield curve also steepened year-over-year. On the shorter end of the curve, rates increased by 25 basis points on average while the medium tenors of 2 to 10 years, yields increased by 8 basis points. The spread between the 2-year and 10-year rate widened by 12 bps in September 2022 when compared to September 2021.

In contrast, the Eastern Caribbean XCD yield curve flattened year on year. Short-term and medium-term yields fell by 36 and 65 basis points respectively on average over the period September 2021 to September 2022. The spread between the 2-year and 10-year yields widened by 9 basis points year over year.

Amidst these challenges, this financial year was one in which First Citizens Investment Services Limited continued to record new milestones which included:

First Citizens Brokerage and Advisory Services:

- Successfully acted as lead broker of the FCGFHL APO, raising over TT\$543 million, which was oversubscribed by 55 % and FCIS processed almost 70 % of the subscriptions received, including our clients on the sister isle of Tobago.
- This successful offer means that we have now brokered nine of the last eleven equity listings on the TTSE and have assisted our clients in raising over TT\$ 13 billion in new Equity Capital.
- At the TTSE 40th anniversary conference in October 2022, FCBAS, our brokerage subsidiary received an award from the Exchange for its contribution to the capital market in Trinidad and Tobago in the area of IPO/APO offers.

Regional Milestones:

- Arranger/co-broker Government of St.Lucia XCD 400,778,000 Bonds/Treasury Notes/ Treasury Bills
- Arranger/Lead Broker Government of St. Vincent & the Grenadines XCD 393,274,000 Treasury Notes/ Treasury Bills
- Arranger/co-broker Government of Dominica XCD32,099,000 Treasury Bills
- Arranger/co-broker Government ofGrenada XCD103,421,000 Notes/Treasury Bills

Review of Financial Performance

Net Interest Income

Net Interest Income totaled TTD154.5 million for the financial period ended September 30, 2022, compared to TTD163.9 million for the prior period. This 6% decrease was due to a strategic decision to reduce the investment portfolio balances which was geared towards the management of credit risk and mark to market losses, as bond prices fell with the upward pivoting in interest rates. Therefore, lower returns were earned, which resulted in an 8% reduction in Interest income YOY. Conversely, lower interest expense was incurred due to a reduction in funding cost which positively impacted Net Interest Income.

Fees & Commission Income

Fees and commission increased by TTD2.6 million. The year on year increase was due mainly to an increase in placement fee income along with an increase in commissions from investment management fees.

Trading Losses

Trading losses were experienced in the period due to losses on the sell down of the portfolio. This was necessary to mitigate against credit risk and market risk due to the volatility of bond prices and increasing interest rates. Trading losses of TTD4.9 million was realized in 2022.

Net Foreign Exchange Loss

This loss reduced by TTD1.3 million YOY. This was mainly due to realized and unrealized losses incurred on transaction settlement and balance sheet movements.

Other Income

Other income increased from TTD12.8 million in 2021 to TTD16.9 million in 2022; this was due to a 2022 capital market fee transaction along with a marginal increase in dividend income on the Barita investment.

Administrative and Operating Expenses

Total overhead expenses decreased by TTD2.8 million in 2022. Savings were mainly due to reduced depreciation charges and lower management fees which were marginally offset by an increase in information technology expenses for the period.

Impairment Loss/Gain on financial assets

Net impairment on financial assets moved from a write back in 2021 of TTD13.2 million to a write off of TTD3.1 million in 2022. The significant change in 2022 resulted from a net increase in IFRS 9 ECL provisions for the region which was partially netted off by derecognized instruments which were disposed of or matured during the financial year.

Investment Securities

Total investment securities were TTD5.9 billion at 30 September 2022, compared to the prior year of TTD6.7 billion which resulted in a decline of TTD875 million. This was represented by a negative net position of TTD521.7 million which reflected the movement on maturities and disposal, offset by additions during the financial period followed by a negative movement on the mark to market of TTD349.6 million. In addition, there was a net IFRS 9 provision write-off of TTD3.4 million on the Group's Statement of financial position as at September 30, 2022.

Borrowings

Borrowings decreased by TTD225 million from 2021 to 2022. This net decline was a result of the maturity of a broker funding facility and the execution of a medium term loan note.

Securities Under Repurchase Agreements (Repos)

The repo balances reduced in line with the investment portfolio with the net repo position moving from TTD3,356 million as at September 2021 to TTD3,280 million at the year ended 30 September 2022.

Loan from Parent Company

The loan to our Parent Company reflected a net decrease year on year of TTD105.6 million. At the Group's Statement of financial position date 30 September 2022 the drawn down amount was Nil. The Group does have access to an unsecured short term US facility approved for USD40 million and a line of approved credit for USD25 million respectively.

Shareholders' Equity

Shareholders' equity which comprises of share capital, retained earnings and fair value reserves, stood at TTD1.44 billion at 30 September 2022 which represented a decrease of TTD196 million. This net decrease represents a TTD236.3 million reduction in the fair value reserve, a dividend payment of TTD111.1 million, along with net earned Profit after Tax of TTD151.8 million.

21 November 2022

First Citizens Investment Services Limited And Its Subsidiaries Statement of Management's Responsibilities

Management is responsible for the following:

- Preparing and fairly presenting the accompanying consolidated financial statements of First Citizens Investment Services Limited and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at 30 September 2022, and the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information;
- Ensuring that the Group keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Group's assets, detection/prevention of fraud, and the achievement of Group operational efficiencies;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that comply with laws and regulations, including the Companies Act; and
- Using reasonable and prudent judgement in the determination of estimates.

In preparing these audited consolidated financial statements, management utilised the International Financial Reporting Standards, as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where International Financial Reporting Standards presented alternative accounting treatments, management chose those considered most appropriate in the circumstances.

Nothing has come to the attention of management to indicate that the Group will not remain a going concern for the next twelve months from the reporting date; or up to the date the accompanying consolidated financial statements have been authorised for issue, if later.

Management affirms that it has carried out its responsibilities as outlined above.

General Manager

General Manager 21 November 2022

21 November 2022

Independent auditor's report

To the shareholder of First Citizens Investment Services Limited

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of First Citizens Investment Services Limited (the Company) and its subsidiaries (together 'the Group') as at 30 September 2022, and their consolidated financial performance and their consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statement of financial position as at 30 September 2022;
- the consolidated statement of income for the year then ended;
- the consolidated statement of comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Other information

Management is responsible for the other information. The other information comprises the Annual Report and the Prospectus for the offer of Repurchase Agreements (but does not include the consolidated financial statements and our auditor's report thereon), which is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Annual Report and the Prospectus for the offer of Repurchase Agreements, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Consolidated Financial Statements

30 September 2022

(Expressed in Trinidad and Tobago Dollars)

1 General information

First Citizens Investment Services Limited ("the Company") and its subsidiaries (together "the Group") is incorporated in the Republic of Trinidad and Tobago. Effective 1 September 2018, the Group acquired 100% ownership of First Citizens Portfolio Investment and Management Services Limited (FCPIMS). The Group operates in Trinidad and Tobago as well as in St. Lucia, St. Vincent and Barbados through branches. Its principal business includes dealing in securities and such other business as is authorised pursuant to its registration under the Securities Act 2012 of the Republic of Trinidad and Tobago.

Effective 2 February 2009, First Citizens Bank Limited (the Bank) assumed control of the Group. The Bank is a subsidiary of First Citizens Group Financial Holdings Limited (FCGFH), a subsidiary of First Citizens Holdings Limited (Holdings), with a 60.1% controlling interest. Holdings is owned by the Government of the Republic of Trinidad and Tobago (GORTT). The remainder of the Bank's shares are listed on the Trinidad and Tobago Stock Exchange and are publicly traded.

The Group's registered office is 17 Wainwright Street, Port of Spain, Trinidad and Tobago.

The Group's subsidiaries, all wholly-owned, are:

- First Citizens Portfolio Investment and Management Services Limited;
- First Citizens Brokerage and Advisory Services Limited;
- First Citizens Investment Services (Barbados) Limited;
- Caribbean Money Market Brokers (Trincity) Limited; and
- FCIS Nominees Limited

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

a. Basis of preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and IFRS Interpretation Committee (IFRS IC) applicable to companies reporting under IFRS. These consolidated financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB). The consolidated financial statements are prepared under the historical cost convention as modified by the revaluation of freehold premises, fair value through other comprehensive income financial assets and financial assets classified at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- a. Basis of preparation (continued)
 - (i) Standards, amendments and interpretations which are effective and have been adopted by the Group in the accounting period.
 - Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 Interest Rate Benchmark Reform-Phase 2 (Effective 1 January 2021). The amendments in Interest Rate Benchmark Reform Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16) introduce a practical expedient for modifications required by the reform, clarify that hedge accounting is not discontinued solely because of the IBOR reform, and introduce disclosures that allow users to understand the nature and extent of risks arising from the IBOR reform to which the entity is exposed to and how the entity manages those risks as well as the entity's progress in transitioning from IBORs to alternative benchmark rates, and how the entity is managing this transition. The Group performed an assessment using Secured Overnight Financing Rate (SOFR) and the impact was immaterial refer to note (3.e.i) for further details
 - Amendments to IFRS 16- Covid-19-Related Rent Concessions beyond 30 June 2021 (Effective 1 April 2021). The amendment extends, by one year, the May 2020 amendment that provides lessees with an exemption from assessing whether a COVID-19-related rent concession is a lease modification.

The adoption of these amendments does not give rise to any material impact to the financial statements.

- (ii) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group
 - Amendments to IAS 16 Property, Plant and Equipment Proceeds before intend use (Effective 1 January 2022). The
 amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items
 produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner
 intended by management. Instead, an entity recognises the proceeds from selling such items, and the cost of producing
 those items, in profit or loss.
 - Amendments to IAS 37 Onerous Contracts-Cost of fulfilling a contract (Effective 1 January 2022). The amendments
 specify that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate
 directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials)
 or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the
 depreciation charge for an item of property, plant and equipment used in fulfilling the contract).
 - Amendment to IFRS 3 Reference to the Conceptual Framework (Effective 1 January 2022). The amendments update an outdated reference to the Conceptual Framework in IFRS 3 without significantly changing the requirements in the standard.
 - Amendments to IAS 1 Classification of Liabilities as Current or Non-Current (Effective 1 January 2024). The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current.
 - Amendments IAS1 and IFRS Practice Statement 2 Disclosure of Accounting Policies (Effective 1 January 2023). The
 amendments require that an entity discloses its material accounting policies, instead of its significant accounting policies.
 Further amendments explain how an entity can identify a material accounting policy. Examples of when an accounting
 policy is likely to be material are added. To support the amendment, the Board has also developed guidance and
 examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice
 Statement 2.

Notes to the Consolidated Financial Statements (continued) 30 September 2022 (Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- a. Basis of preparation (continued)
 - (ii) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group (continued)
 - Amendment to IAS 8 Definition of Accounting Estimates (Effective 1 January 2023). The amendments replace the
 definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition,
 accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty".
 Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way
 that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from
 new information or new developments is not the correction of an error.
 - Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction (*Effective 1 January 2023*). The amendments clarify that the initial recognition exemption does not apply to transactions in which equal amounts of deductible and taxable temporary differences arise on initial recognition.

The Group is in the process of assessing the impact of the new and revised standards not yet effective on the financial statements. We do not anticipate any material impact.

b. Consolidation

(i) Principles of consolidation

The consolidated financial statements include the accounts of the Group and its wholly owned subsidiaries as outlined in Note 1. The financial statements of the consolidated subsidiaries used to prepare the consolidated financial statements were prepared as of the parent company's reporting date. The consolidation principles are unchanged.

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated on consolidation. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

(ii) Investment in subsidiaries

Subsidiaries are all entities, (including structured entities) over which the Group has control. First Citizens Investment Services (the Group) controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of the acquiree's identifiable net assets.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- b. Consolidation (continued)
 - (iii) Business combinations and goodwill

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration in relation to financial instruments to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IFRS 9 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the consolidated statement of income.

c. Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency).

The consolidated financial statements are presented in Trinidad and Tobago dollars, which is the Group's functional and presentation currency.

The exchange rate between the TT dollar and the US dollar to 30 September 2022 was TT6.6926 = US1.00 (2021: TT6.6926 = US1.00), the TT dollar and the XCD dollar was TT2.5190 = XC1.00 (2021: TT2.5190 = XC1.00), the TT dollar and the Barbados dollar was TT3.4102 = BB1.00 (2021: TT3.4102 = BB1.00) and the TT dollar and the Jamaican dollar was TT0.0439 = JM1.00 (2021: TT0.0447 = JM1.00).

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income.

Changes in the fair value of monetary securities denominated in foreign currency classified as fair value through other comprehensive income are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in profit or loss and other changes in carrying amount are recognised in other comprehensive income. Translation differences on non-monetary items such as equities classified as fair value through other comprehensive income are included in other comprehensive income.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- c. Foreign currency translation (continued)
 - (iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- (b) income and expenses for each statement of income are translated at average cover exchange rates for the financial year, and
- (c) all resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

d. Derivative financial instruments

Derivative financial instruments including swaps are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. Fair values are obtained from quoted market prices, discounted cash flow models and options pricing models as appropriate. All derivatives are carried as assets when their fair value is positive and as liabilities when negative.

- e. Financial assets and financial liabilities
 - (i) Financial assets

The Group classifies its financial assets based on the following business models:

- · Hold to collect
- · Hold to collect and sell
- · Hold for trading

Based on these factors, the Group classifies its financial instruments into one of the following three measurement categories:

Amortised cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI), and that are not designated at Fair value though profit or loss (FVTPL) are measured at amortised cost. The carrying amount of these assets are adjusted by any expected credit loss allowance recognised and measured as described in note 3.a. Interest income from these financial assets is included in "Interest income" using the effective interest rate method.

The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

For purchased or originated credit-impaired ('POCI') financial assets – assets that are credit-impaired (see definition on note 3 a vi) at initial recognition – the Group calculates the credit-adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows. When the Group revises the estimates of future cash flows, the carrying amount of the respective financial assets or financial liability is adjusted to reflect the new estimate discounted using the original effective interest rate. Any changes are recognised in profit or loss.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- e. Financial assets and financial liabilities
 - (i) Financial assets (continued)
 - Fair value through other comprehensive income (FVOCI)
 - •Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets cash flows represent solely payments of principal and interest, and that are not designated at FVTPL, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss, except for foreign exchange on non-monetary assets which are measured in accordance to c.ii. above. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit and loss and recognised in "Gain on financial assets". The interest income from these financial assets is included in "interest Income' using the effective interest rate method.
 - Fair value through profit or loss (FVTPL)

Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is measured at fair value through profit or loss and is not part of a hedging relationship is recognised and presented in the statement of income within "(Loss)/gain from financial assets". All equity gains and losses are recognized in the statement of income except for those designated at initial recognition to FVOCI or for those equities which are held for the strategic business operations. *Equity instruments* Equity instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include ordinary shares.

The Group subsequently measures all equity investments at fair value through profit or loss, except where the Group's management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. The Group's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, fair value and foreign exchange gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Dividends, when representing a return on such investments, continue to be recognised in profit or loss as other income when the Group's right to receive payments is established.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- e. Financial assets and financial liabilities (continued)
 - (i) Financial assets (continued)
 - (a) Group's business model

The business model reflects how the Group manages the assets in order to generate cash flows. An assessment is made at a portfolio level and includes an analysis of factors such as:

- The stated objective and policies of the portfolio and the operation of those in practice. Specifically, whether the Group's objective is solely to collect the contractual cash flows from the assets or is it to collect both the contractual cash flows and cash flows arising from the sale of the assets.
- Past experience on how the cash flows for these assets were collected.
- Determination of performance targets for the portfolio, how evaluated and reported to key management personnel.
- Management's identification of and response to various risks, which includes but not limited to, liquidity
 risk, market risk, credit risk, interest rate risk.
- Management considers, in classifying its assets, the level of historical sales and forecasted liquidity requirements.

Arising out of the assessment, the portfolios were deemed to have the business models identified as follows:

Hold to collect	Hold to collect and sell	Hold for trading
Bonds Issued by or guaranteed by Government of Trinidad & Tobago (GORTT) more than 3 years at recognition	Bonds Issued by or guaranteed by Government of Trinidad & Tobago less than 3 years at recognition	Actively Traded (Capital Gains) Portfolio
Non-Eurobonds maturing in greater than 3 years at recognition	Eurobonds	Equities
Securities sold under repurchase agreements to clients and brokers	Non-Eurobonds maturing in less than 3 years at recognition	
Long Term Borrowings from brokers in the form of Total Return Swaps	Equities initially designated to OCI	
Medium Term Notes		

Financial assets are classified on recognition based on the business model for managing the contractual cash flows.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- e. Financial assets and financial liabilities (continued)
 - (i) Financial assets (continued)
 - (a) Group's business model (continued)

Hold to collect

Where the business model is to hold assets to collect contractual cash flows, the Group assesses whether cash flows represent solely payment of principal and interest (SPPI). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement, i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement.

Hold to collect and sell

Where the business model is to hold assets to collect and sell, it incorporates the above assessment of SPPI. In addition, the Group manages liquidity and credit risk using both expected and contractual cash flows, through its fair value OCI portfolio and through the disposal of assets.

The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent; a St. Lucia sovereign bond valued US\$1M, which was incorrectly classified as at September 2021, was reclassified from fair value through other comprehensive income to amortised cost as at September 2022. There was no impact on the fair value reserve as the bond price remained unchanged.

Hold for trading

Hold for trading refers to equity instruments whose fair value movements are recognised through the consolidated statement of income

(b) Impairment

The Group assesses on a forward-looking basis the expected credit losses (ECL) associated with its debt instruments carried at amortised cost and FVOCI. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.
- Note 3.a.iii provides more detail of how the expected credit loss allowance is measured.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- e. Financial assets and financial liabilities (continued)
 - (i) Financial assets (continued)
 - (c) Modification of financial assets

The issuer of financial assets sometimes renegotiates or otherwise modifies the contractual cash flows of an instrument. When this happens, the Group assesses whether or not the new terms are substantially different to the original terms. The Group does this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay.
- Significant extension of the term when the borrower is not in financial difficulty.
- Significant change in the interest rate.

If the terms are substantially different, the Group derecognises the original financial asset and recognises a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Group also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the borrower being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in profit or loss as a gain or loss on derecognition.

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

(d) Derecognition other than on a modification

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Group transfers substantially all the risks and rewards of ownership, or (ii) the Group neither transfers nor retains substantially all the risks and rewards of ownership and the Group has not retained control.

The Group enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as 'pass through' transfers that result in derecognition if the Group:

- (i) Has no obligation to make payments unless it collects equivalent amounts from the assets;
- (ii) Is prohibited from selling or pledging the assets; and
- (iii) Has an obligation to remit any cash it collects from the assets without material delay.

Collateral (shares and bonds) furnished by the Group under standard repurchase agreements and securities lending and borrowing transactions are not derecognised because the Group retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- e. Financial assets and financial liabilities (continued)
 - (ii) Financial liabilities

Classification and subsequent measurement of financial liabilities

Financial liabilities are classified as subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in the trading booking) and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at fair value through profit or loss are presented partially in other comprehensive income (the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, which is determined as the amount that is not attributable to changes in market conditions that give rise to market risk) and partially profit or loss (the remaining amount of change in the fair value of the liability). This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss;
- Financial liabilities arising from the transfer of financial assets which did not qualify for derecognition, whereby a financial liability is recognised for the consideration received for the transfer. In subsequent periods, the Group recognises any expense incurred on the financial liability; and
- Financial guarantee contracts and loan commitments (see note 3 c ii).

Derecognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

The exchange between the Group and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred and exchange terms of the modified liability.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

f. Impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

g. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position where there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

h. Determination of fair value

For financial instruments traded in an active market, the determination of fair values of financial assets and liabilities is based on quoted market prices or dealer price quotations.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry Group, pricing service or regulatory agency, and these prices represent actual and regular occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indicators that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions. When a market becomes inactive, the valuation technique is the Group's internally developed model which is based on discounted cash flow analysis.

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques using input existing at the year end.

The Group uses an internally developed model which is generally consistent with other valuation models used in the industry. Valuation models are used to value unlisted debt securities and other debt securities for which the market has become or is illiquid. Some of the inputs of this model may not be market observable and are therefore based on assumptions (see note 4.a.).

i. Sale and repurchase agreements and lending of securities

Securities sold under sale and repurchase agreements (repos) are retained on the consolidated statement of financial position as investment securities and the counterparty liability is included in securities sold under repurchase agreement and borrowings.

Securities purchased under agreements to resell (reverse repos) are recorded as loans to banks or customers as appropriate.

The difference between the sale and repurchase price is treated as interest and accrued over the life of the repo agreement using the effective interest method.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

j. Lease transactions

For all new contracts entered into on or after 1 October 2019, the Group assesses whether a contract is, or contains a lease. A lease is defined as "a contract that conveys the right-of-use of an asset for a period of time in exchange for consideration". To assess whether a contract conveys the right-of-use of an asset, the Group assesses whether:

- the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group
- the Group has the right to obtain substantially all the economic benefits from use of the assets through the period of
 use
- the Group has the right to direct the use of the asset throughout the period of use. The Group has this right when it has the rights to direct "how and for what purpose" the asset is used.

(i) The Group as the lessee

The Group recognises leases as a right-of-use asset and a lease liability at the date at which the leased asset is available for use by the Group. The right of use is initially measured at the cost, which comprises the initial amount of the lease liability, any initial direct cost incurred, an estimate of any cost to dismantle and remove the asset or to restore the asset and less any lease incentive received.

The Group depreciates the right-of-use assets on a straight line basis from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. The Group also assess the right-of-use asset for impairment when such indicators exists.

The Group measures the lease liability at the present value of the lease payments not paid at the commencement date, discounted using the interest rate implicit in the lease or if that rate cannot be readily determined, the Group's incremental borrowing rate, which is the Repo rate. Lease liabilities include the net present value of the following lease payments:-

- fixed payments, including in-substance fixed payments, less any lease incentive
- variable lease payments that are based on an index or a rate, initially measured using the index or rate at the commencement date
- amount expected to be payable by the Group under residual value guarantees
- the exercise price under a purchase option, if the Group is reasonably certain to exercise that option
- lease payments in an optional renewal period, if the Group is reasonably certain to exercise
- penalties for early termination of a lease, if the lease term reflects the Group exercising this option

The lease liabilities will be remeasured when there is a change in future lease payments from a change in rate or index or if the Group changes its assessments of whether it will exercise an extension or termination option.

Payments associated with short-term leases and all low-value assets are recognised on a straight-line basis as an expenses in the consolidated statement of income. Short-term leases are leases with a term of twelve (12) months or less. Low-value assets comprise IT equipment and small items of office furniture.

(ii) The Group as the lessor

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return on the remaining balance of the asset for each period.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

k. Property and equipment

Freehold premises are shown at fair value based on assessments performed by management or by independent valuators every three years, less subsequent depreciation for buildings. Valuations are performed with sufficient regularity to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the assets and the net amount is restated to the revalued amount of the asset.

All other property and equipment are stated at historical cost less depreciation.

Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated statement of income during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of freehold premises are credited to fair value reserves in shareholders' equity. Decreases that affect previous increases of the same assets are charged against fair value reserves directly in equity; all other decreases are charged to the consolidated statement of income.

Depreciation and amortisation are computed on all assets except land.

The provision for depreciation and amortisation is computed using the straight line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives, as follows:-

Buildings	-	50 years
Equipment and furniture	-	4 - 5 years
Computer equipment and motor vehicles	-	3 - 5 years
Leasehold improvements	-	Amortised over the life of the lease

The assets' useful lives and residual values are reviewed and adjusted if appropriate at each reporting date. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount may not be recoverable.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

I. Income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated statement of income, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the statement of financial position date in the countries where the Bank and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax liabilities are provided on taxable temporary differences arising from investments in subsidiaries, associates and joint arrangements, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Generally, the Group is unable to control the reversal of the temporary difference for associates. Only where there is an agreement in place that gives the Group the ability to control the reversal of the temporary difference not recognised.

Deferred income tax assets are recognised on deductible temporary differences arising from investments in subsidiaries, associates and joint arrangements only to the extent that it is probable the temporary difference will reverse in the foreseeable future and there is sufficient taxable profit available against which the temporary difference can be utilised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

m. Employee benefits

(i) Pension plan – First Citizens defined benefit pension plan

First Citizens Bank Limited operates a defined benefit plan, which is a pension plan that defines an amount of pension benefits that an employee will receive on retirement, usually dependent on one or more factors, such as age, years of service and compensation. This pension plan is funded by payments from employees and by the Bank, taking account of the recommendations of independent qualified actuaries.

The Bank's defined benefit plan operates as a plan which shares risks among subsidiaries of the Group which are under common control. The Bank's policy is to recognise the net defined benefit cost of the plan in the separate financial statements of First Citizens Bank Limited, the entity which is legally considered the sponsoring employer of the plan. The Bank recognises a cost equal to its contribution payable for its employees in its separate financial statements.

The liability or asset is recognised in the Bank's statement of financial position. In respect of the defined benefit pension plan, as at September 2022, the defined benefit pension plan asset represented the fair value of the plan's asset less the present value of the obligation at the end of the reporting period. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The Group's contribution to the plan amounted to \$3.2M (2021: \$2.9M) (Note 27 a). These contributions were recharged by the Bank and settled through the intercompany.

(ii) Profit sharing and bonus plans

The Group recognises a liability and an expense for bonuses and profit-sharing, based on a formula that takes into consideration the profit attributable to the First Citizens Group's shareholders after certain adjustments. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

Included in the bonus and profit-sharing is a contribution to the employee share option plan which is administered by the Bank.

Included in the Bank's profit sharing and bonus plan is an employee stock option plan which is settled with the Bank through an intercompany recharge.

n. Cash and due from Banks

For purposes of the consolidated statement of cash flows, cash and due from banks are comprised of cash balances on hand, deposits with banks and short-term highly liquid investments with original maturities of three months or less when purchased, that are readily redeemable to known amounts of cash and which are subject to an insignificant risk of changes in value.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

o. Net interest income and expense

Interest income and interest expense are recognised in the consolidated statement of income for all interest bearing instruments on an accrual basis using the effective interest method based on the initial carrying amount. Interest income includes coupons earned on fixed income investments, Promissory Notes (PNotes) and accrued discount and premium on treasury bills and other discounted instruments. When a financial asset is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction cost, premium, discounts and interest paid or received that are integral to the effective interest rate, such as origination fees.

For financial assets that are credit impaired (stage 3), interest income is calculated by applying the effective interest rate to the carrying value net of the expected credit loss provision.

For financial assets classified as Purchased or Originated Credit Impaired (POCI), interest income is calculated by applying a Credit-Adjusted Effective Interest Rate (CAEIR) (based on an initial expectation of further credit losses) to the amortised cost of these POCI assets. The CAEIR is lower than the effective interest rate as the cash flows of the instruments are adjusted downwards for the impact of expected credit losses.

p. Dividend income

Dividends are recognised in the consolidated statement of income when the entity's right to receive payment is established.

q. Fee and commission income

IFRS 15 's core underlying principle is that an entity should recognise revenue in a manner that depicts the pattern of the transfer of goods and services to customers. The Group's performance obligations are very contract specific for the various services: wealth managed client accounts, private placements, portfolio management fees and commissions and mutual funds portfolio management.

Fees and commissions are recognised at a point in time when the service has been provided. Commissions and fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses are recognised at a point in time on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts usually on a time apportioned basis, which is normally on a monthly billing cycle at a point in time.

Asset management fees related to investment funds are recognised rateably over the period the service is provided and accrued in accordance with pre-approved fee scales. The same principle is applied for wealth management, financial planning and custody services that are continuously provided over an extended period of time. Performance linked fees or fee components are recognised when the performance criteria are fulfilled at a point in time.

Brokerage & Advisory fees are generally recognized at a point in time upon full completion of the scope of works to the contract; however, for Initial Public Offerings and services of that nature the performance obligation may be specific to the stage of completion of the services performance obligation. In addition, some contracts may require variation to the performance obligation based on the client specifications. These contracts would qualify for revenue recognition over time.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

r. Borrowings

Borrowings are recognised initially at fair value, exclusive of transaction costs. Subsequently, borrowings are stated at amortised cost and any difference between proceeds net of transactions costs and the redemption value is recognised in the consolidated statement of income over the period of the borrowings using the effective interest method.

s. Dividend distribution

Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Group's Board of Directors. Dividends for the year, which are declared after the year end, are disclosed in the subsequent events note when applicable.

t. Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of the obligation as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as interest expense.

u. Intangible assets

Intangible assets comprise separately identifiable items arising from business combinations, computer software licenses and other intangible assets. Intangible assets are recognised at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortised using the straight line method over the period that the benefits from these assets are expected to be consumed, generally not exceeding 20 years. Intangible assets with an indefinite useful life are not amortised. At each date of the consolidated statement of financial position, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits. If such indications exist, the intangible assets are analysed to assess whether their carrying amount is fully recoverable. An impairment loss is recognised if the carrying amount exceeds the recoverable amount.

The Group chooses to use the cost model for the measurement after recognition.

Intangible assets with indefinite useful life are tested annually for impairment and whenever there is an indication that the asset may be impaired.

(i) Goodwill

Goodwill arises on the acquisition of subsidiaries and represents the excess of the consideration transferred over the Group's interest in net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Cash Generating Units ("CGU"), or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognised immediately as an expense and is not subsequently reversed.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

2 Summary of significant accounting policies (continued)

- u. Intangible assets (continued)
 - (ii) Other Intangible assets

Other intangible assets are initially recognised when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributed to the assets with flow from their use. The value of intangible assets which are acquired in a business combination is generally determined using income approach methodologies such as the discounted cash flow method.

Other intangible assets are stated at cost less amortisation and provisions for impairment, if any, plus reversals of impairment, if any. They are amortised over their useful lives in a manner that reflects the pattern to which they contribute to future cash flow.

(iii) Computer software

Costs associated with maintaining computer software programmes are recognised as an expense when incurred. However, expenditure that enhances or extends the benefits of computer software programmes beyond their original specifications and lives is recognised as a capital improvement and added to the original cost of the software. Computer software development costs are recognised as assets when the following criteria are met:-

- It is technically feasible to complete the software and use it
- Management intends to complete the software and use it
- There is an ability to use the software
- Adequate technical, financial and other resources to complete the development and to use it
- The expenditure attributable to the software during its development can be reliably measured.

The software development costs are amortised using the straight-line method over their useful lives but not exceeding a period of three years.

v. Fiduciary activities

The Group acts as trustees and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Group (Note 3.d).

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management framework

The Board of Directors of First Citizens Bank Limited has overall responsibility for the establishment and oversight of the First Citizens Group risk management framework. To assist the Board of Directors in fulfilling its duties, two Board sub-committees were established to monitor and report to the Board of Directors of the parent on the overall risks within the First Citizens Group - the First Citizens Group Enterprise Risk Management Committee and the Board Credit Committee; and two Senior Management Committees.

The First Citizens Group Enterprise Risk Management Unit, headed by the Group Chief Risk Officer (GCRO), reports to both Sub-Committees of the Board of Directors through the Senior Management Committees. This unit is responsible for the management, measurement, monitoring and control of operational, market and credit risk for the First Citizens Group through the First Citizens Group Operational Risk and Controls Unit, Group Credit Risk Management Unit, Group Market Risk Unit and Group Business Continuity Planning Unit. The First Citizens Group Enterprise Risk Management Unit reports into the Senior Management Enterprise Risk Management Committee to allow monitoring of the adherence to risk limits and the impact of developments in the aforementioned risk areas on strategy and how strategy should be varied in light of the developments.

The Asset/Liability Committee (ALCO) was established to manage and monitor the policies and procedures that address financial risks associated with changing interest rates, foreign exchange rates and other factors that can affect the Group's liquidity. The ALCO seeks to limit risk to acceptable levels by monitoring and anticipating possible pricing differences between assets and liabilities across the Bank and the Group's various companies via the Treasury and International Trade Centre. The Treasury and International Trade Centre's primary role and responsibility is to actively manage the First Citizens Group's liquidity and market risks. The ALCO is also supported in some specific areas of activity by the First Citizens Group's Market Risk Committee.

As part of its mandate, the Bank Board of Directors establishes written principles for overall risk management, as well as ensuring that policies are in place covering specific areas of risk, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments. In addition, the First Citizens Group Internal Audit Department is responsible for the independent review of risk management and the control environment and reports its findings and recommendation to the Board Audit Committee.

Credit risk management is extended to the subcommittee of the Board of Directors who sit on the Risk Management Committee (RMC), which has oversight and monitors the risk appetite for the investment portfolio for the First Citizens Investment Bank ("the Group").

The most important types of risk are credit risk, liquidity risk and market risk. Market risk includes currency risk, interest rate and other price risk.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

a. Credit risk

Credit risk is a significant risk for the First Citizens Group's business; management therefore carefully manages its exposure to credit risk. The credit risk management and control are centralised in a First Citizens Group Credit Risk Management Unit which reports regularly to the Group Chief Risk Officer and the Board Credit Committee.

Credit risk arises mainly from investments in debt securities and other exposures arising from its trading activities ('trading exposures') including non-equity trading portfolio assets and derivatives as well as settlement balances with market counterparties and reverse repurchase agreements.

(i) Credit risk management

In its management of credit risks, the First Citizens Group has established an organisational structure which supports the lending philosophy of the First Citizens Group. This structure comprises the Board of Directors, the Board Credit Committee (BCC), Senior Management Enterprise Risk Committee (SMERC), the Group Chief Risk Officer (GCRO), the Credit Risk Management Unit and the Internal Audit Department. The Board of Directors maintains general oversight to ensure that policies and procedures are consistent with the strategic direction and credit philosophy of the First Citizens Group and that they serve to bring the required level of protection over assets that are exposed to credit risks. To facilitate day to day decision making and timely implementation of decisions, the Board has delegated authority for specific areas to specific committees and/or officers with an appropriate reporting system to the Board. The BCC focuses primarily on credit risk appetite and in so doing sanctions amendments to credit policies and credit requests exceeding the authority of management. The SMERC together with the GCRO monitors the effectiveness of credit policies and procedures and may direct changes to strategies to improve the effectiveness of policies. The major focus of the Credit Risk Management Unit is to formulate credit policies, monitor compliance with them and on a continuous basis to assess their relevance to the changing business environment. Most of these policies are established and communicated through the First Citizens Group's written Credit Policy Manual.

(ii) Credit risk grading

The Group uses internal credit risk grading or ratings which reflect its assessment of the risk profile or PD of counterparties. The Group utilises one (1) rating model for investment securities.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (ii) Credit risk grading (continued)

Investment securities

For sovereign and corporate investment securities, the ratings published by Standards and Poor's Rating Agency (S&P), where available, are used. For sovereigns with no S&P rating, the Bank's Research and Analytics Unit uses a model based on the S&P methodology to generate a rating. For corporate investment securities with no S&P rating, a rating is assigned using the Borrower Risk Rating ("BRR") model.

S&P published ratings are continuously monitored and updated. The PD's associated with each rating are determined based on realised default over the prior 12 months, as published by the rating agency. The ratings generated by the BRR model are also updated annually.

The Table below provides a comparative view of the rating models used by the Group:

	S&P Rating	Research & Analytics Risk Rating (Investment Securities)	Interpretation
	AAA, AA+	A+	
	AA, AA-	A	Extremely Low Risk
Investment	A+, A	A-	Very Low Risk
Grade	BBB+, BBB, BBB-	B+	Low Risk
	BB+, BB, BB-	В	Moderate Risk
	B+, B, B-	B-	High Risk
Speculative Grade	CCC+, CCC, CCC-, CC+, CC, CC-, C+, C, C-	С	Very High Risk
	D	D	In Default

(iii) Expected credit loss measurement

IFRS 9 outlines a 'three stage' model; for impairment based on changes in credit quality since initial recognition as summarised below:

- A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1 and has its credit risk continuously monitored by The First Citizens Group.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is
 moved to 'Stage 2' but is not yet deemed to be credit-impaired. Please refer to note 3.a.iv for a description of
 how The First Citizens Group determines when a significant increase in credit risk has occurred.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'. Please refer to
 note 3.a.vi for a description of how The First Citizens Group defines credit-impaired and default.
- For financial instruments in Stage 1, the respective ECL's are measured at an amount equal to the portion of lifetime expected credit losses within the next 12 months. Instruments in Stages 2 or 3 respective ECL's are measured based on the expected credit losses on a lifetime basis. Please refer to note 3.a.vii for a description of inputs, assumptions and estimation techniques used in measuring the ECL.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

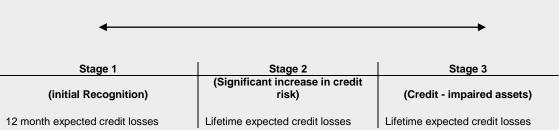

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (iii) Expected credit loss measurement (continued)
 - A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward- looking information. Note 3.a.viii includes an explanation of how The First Citizens Group has incorporated this in its ECL models.
 - Purchased or originated credit-impaired financial assets are those financial assets that are credit- impaired on initial recognition. Their ECL is always measured on a lifetime basis (Stage 3).

Further explanation is also provided of how The First Citizens Group determines appropriate groupings when ECL is measured on a collective basis (refer to note 3.a.x).

The following diagram summarises the impairment requirements under IFRS 9 (other than purchased or originated credit-impaired financial assets):

Change in credit quality since initial recognition

(iv) Significant increase in credit risk (SICR)

The First Citizens Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following criteria have been met:

Criteria	Investment Grade Portfolio	Single "B" Speculative Grade Portfolio
Absolute Measure	PD - 15% or higher	PD - 25% or higher
AND	AND	AND
Relative Measure	One notch downgrade (investment securities rating scale)	One notch downgrade (investment securities rating scale)
OR	OR	OR
Special Consideration	Eurobonds with Trigger 3 Breaches	Eurobonds with Trigger 3 Breaches

The First Citizens Group has not used the low credit risk exemption for any financial instruments in the year ended 30 September 2022.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (v) Significant decrease in credit risk (SDCR)

The First Citizens Group considers a financial instrument to have experienced a significant decrease in credit risk when one or more of the following criteria have been met:

Criteria	Investment Grade Portfolio	Single "B" Speculative Grade Portfolio
Absolute Measure	PD – 12.5% or lower	PD - 25% or lower
AND	AND	AND
Relative Measure	Credit rating reverts to level just prior to the SICR	One notch upgrade (investment securities rating scale)
OR	OR	OR
Special Consideration	No credit stop loss breaches	No credit stop loss breaches

(vi) Definition of default and credit-impaired assets

The First Citizens Group defines a financial instrument as in default, which is fully aligned with the definition of credit- impaired, when it meets one or more of the following criteria:

Quantitative criteria

The borrower is more than 90 days past due on its contractual payments.

Qualitative criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower formally files for bankruptcy or there is a commencement of foreclosure or restructure proceedings or an indication of the intention to restructure is initiated by the borrower.
- The obligation is classified doubtful or worse as per The First Citizens Group's classification process.
- A modification to terms and conditions of the original investment that would not normally be considered is executed and where the change in the present value of the cashflows of the new proposed investment versus the original exceed 10%.

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD), throughout the Group expected loss calculations.

An investment instrument is considered to no longer be in default (i.e. to have cured) when it has been restructured. An exception exists for credit impaired facilities at origination.

Purchase Originated Credit-Impaired (POCI)

POCI financial assets are those for which one or more events that have a detrimental impact on the estimated future cash flows have already occurred. Indicators include:

- Borrower or issuer is experiencing significant financial difficulty;
- A breach of contract, such as a default or past due event;
- The granting of an uncustomary concession(s) by the lender(s) as a result of the borrower's financial difficulty;
- A high likelihood of bankruptcy or other financial reorganisation by the borrower;
- The loss of an active market for that financial asset because of financial difficulties; or
- The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (vii) Measuring ECL Explanation of inputs, assumptions and estimation techniques

The Expected Credit Loss (ECL) is measured on either a twelve (12) month (12M) or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- PD represents the likelihood of a borrower defaulting on its financial obligation (as defined in note 3.a.vi), either over the next twelve (12) months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, either over the next twelve (12) months (12M EAD) or over the remaining lifetime (Lifetime EAD). The EAD is calculated as the outstanding balance of the investment.
- LGD For sovereign investment securities, LGDs are obtained from Moody's Investor Services' Data Report on Sovereign Default and Recovery Rates (1983-2021). Corporate investment securities LGDs are based on the standard terms for North American corporate entities CDS contracts, taken from Moody's Analytics' CDSimplied EDF™ Credit Measures and Fair-value Spreads.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

(viii) Forward-looking information incorporated in the ECL models

The calculation of ECL incorporates forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

Determination of macroeconomic scenarios and probabilities

For each country in which the Group has investment securities, management performs scenario analysis to determine the impact of future economic conditions on the PD in these countries. Two main macro-economic variables (MEVs) are determined, which is statistically linked to the credit risk of that sovereign. Correlation analysis is then conducted between the two MEVs and key sovereign credit risk metrics, to determine which are most significant. Relevant sovereign credit risk metrics are identified as sovereign credit rating drivers to quantify the impact of the MEVs on each credit risk driver and ordinary least squares (OLS) regression is conducted. To establish scenarios, the MEVs are 'shocked', such that the official forecast for each year moves up and down by a multiple of the historical standard deviation to establish a best and worst. The new values derived are run through a regression model to quantify the relationship between the credit rating and the Eastern European crisis as well as the increasing probability of a global economic slowdown due to strong inflationary pressures, rising interest rates and withdrawal of fiscal stimulus. As such the forward looking scenarios factor in all of these economic shocks.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

a. Credit risk (continued)

(ix) Forward-looking information incorporated in the ECL models (continued)

Determination of macroeconomic scenarios and probabilities (continued)

The following are the lead sovereign indicators used in the macroeconomic overlay, the lead indicators remained unchanged from the prior year unless indicated:

TRINIDAD AND TOBAGO: Lead Indicators: • WTI Oil Price

T&T FX Reserves

Both indicators are negatively related to sovereign risk, suggesting that higher oil price and FX reserves will positively impact upon the economy and therefore reduce ECLs.

BARBADOS

Lead Indicators:

- US 10 Year Yield (2021: WTI Oil Price)
- UK Unemployment Rate (2021: US Dollar Index)

Both indicators are positively related to sovereign risk, such that both the US 10-year Treasury yield and UK Unemployment move in the same direction as Barbados' sovereign risk. This suggests that higher US Treasury yields and an increase in joblessness in the UK may negatively impact upon Barbados' economy and therefore likely to increase ECLs.

ST LUCIA/ ST VINCENT AND THE GRENADINES/ ANTIGUA AND BARBUDA Lead Indicators:

- US GDP Growth Rate
- US Unemployment Rate

US GDP growth rate is negatively related to sovereign risk of the ECCU members, suggesting that increases in US GDP growth reduces ECL, while US unemployment rate is positively related to sovereign risk, indicating that as US unemployment rate rises, the ECCU economies are negatively impacted, resulting in higher ECLs.

While there are other components that may impact upon the final ECLs, from a macroeconomic perspective, by using the link between the lead economic variables and sovereign risk, we generalise that once the lead indictors positively impact the economies, ECLs are likely to decline. On the other hand, if the lead indicators negatively impact the economies, ECLs are likely to increase.

The calculation of ECL incorporates forward-looking information. The First Citizens Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

For example, the following credit ratings were forecasted for the next three years using these macro-economic scenarios for Barbados. The weightings applied to the forecasted ratings were 60% for year 1, 20% each for year 2 and 3. These weightings were determined based on management's judgment and experience.

September-2022											
Current rating (as at September 2022)		2023 2024				2025					
В-	Base	Worst	Best	Current	Base	Best	Worst	Current	Base	Best	Worst
	В	В	BB	B-	В	BB	CCC+	B-	B-	B+	CCC
Probability of Transition (in %)	33.	52%	0.00%	66.48%	44.82%	0.47%	5.24%	49.47%	92.79%	6.42%	0.79%

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (ix) Forward-looking information incorporated in the ECL models (continued)

Determination of macroeconomic scenarios and probabilities (continued)

These economic variables and their associated impact on the PD, EAD and LGD vary by financial instrument. Management judgment has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by the Economic Research Unit on a periodic basis and provide the best estimate view of the economy over the next three years. After three years, to project the economic variables out for the full remaining lifetime of each instrument, a mean reversion approach has been used.

(x) Risk limit control and mitigation policies

The First Citizens Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary. Limits on the level of credit risk by product and by country are approved annually by the Group's Board of Directors. Actual exposures against limits are monitored regularly and reported to the Group's Risk Management Committee and the Board of Directors.

(a) Single investor or industry exposure limits

These limits have been established based on a ranking of the riskiness of various industries. The ranking is guided by a model developed by the First Citizens Group for this purpose. The model utilises a scale incorporating scores of 1 to 6 with 1 being the least risky. Exposure limits as a percentage of the total credit portfolio have been established for the various country exposure categories based on the risk ranking.

(b) Country exposure limits

Exposure limits have been established for selected countries which are considered to be within the Group's target market. Three (3) risk categories have been developed and the selected countries have been assigned to these categories based either on ratings issued by acceptable rating agencies or the Group's own internal assessment of the economic and political stability of the target. Maximum cross border exposure has been limited to a pre-determined portion of total assets and this amount is allocated to the various risk categories with a larger share being allocated to the more highly rated categories.

(c) Collateral

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of collateral to secure investments. Investment securities, treasury and other eligible bills are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

(d) Liquidity support agreement

The terms of the Liquidity Support Agreement (LSA) under which First Citizens Bank Limited (the Bank) acquired Caribbean Money Market Brokers Limited (CMMB), now First Citizens Investment Services Limited (FCIS), outlined certain financial assurances given by the Government of Republic of Trinidad and Tobago (GORTT) to the Bank, that provided for the indemnification of the Bank against various claims, losses or liabilities if incurred by FCIS within a stipulated period of time after the date of acquisition in relation to obligations existing or default on assets owned by FCIS at the date of the acquisition.

The LSA dated 15 May 2009 and made between the GORTT, the Central Bank of Trinidad and Tobago (CBTT) and the Bank provided that all reasonable claims by the Bank in respect of such losses were expected to be settled, once the Bank had made all reasonable efforts to recover or resist such claims, losses or liabilities. The Bank committed to reimburse FCIS for any losses incurred by FCIS against which the Bank has been indemnified.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (x) Risk limit control and mitigation policies (continued)
 - (d) Liquidity support agreement (continued)

Losses which are covered under the LSA include losses in respect of balances due from CL Financial and its affiliates accruing from the date that CMMB was acquired by the Bank to the greater of the maturity date of the obligation or 6 years from the date of completion of the share transfer of CMMB to the Bank.

The Ministry of Finance continues to recognise its commitment under the LSA agreement by way of granting consecutive extensions under the Liquidity Support Agreement for successive periods from 16 May 2015 with the most recent being from 1 March 2023 to 29 February 2024.

Interest continues to accrue at 4% and 5% for the CL Financial USD PNOTE and the CL Financial TTD commercial paper respectively. As at the statement of financial position date, the amount of Promissory Notes due was US\$110,030,600 and the amount of the Commercial Paper due TT\$269,411,522. The LSA extension was executed on 8 September 2022 confirming the extension to the expiration of the LSA on 29 February 2024. These are classified as amortised cost in the consolidated statement of financial position.

(xi) Maximum exposure to credit risk before collateral held or other credit enhancement

Credit risk exposures relating to financial assets carried on the Group's consolidated statement of financial position are as follows:

	Gross maximum exposure Sept 2022 \$'000	Gross maximum exposure Sept 2021 \$'000
Cash and due from banks Financial assets	452,616	265,085
- Fair value through other comprehensive income	1,701,712	2,368,082
- Amortised cost	3,772,452	3,969,442
Other assets (note 12)	26,512	31,149
	5,953,292	6,633,758

The above table represents a worst case scenario of credit risk exposure to the Group without taking account of any collateral held or other credit enhancements attached.

For on-consolidated statement of financial position assets, the exposures set out above are based on gross carrying amounts before impairment. There are no credit risk exposures relating to off-consolidated statement of financial position items.

As shown above, 8% of the total maximum exposure is derived from cash and due from banks and receivables (2021: 4%); while 92% represents investments in other debt securities (2021: 96%).

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (xi) Maximum exposure to credit risk before collateral held or other credit enhancement (continued)

Management is confident in its ability to continue to control and sustain minimal exposure of credit risk to the Group resulting from both its cash and due from banks and assets held at amortised cost portfolio and its other debt securities based on the following:

- The Group has maintained a stringent selection process for investing in securities with none of the impaired assets coming from new investments made in the current financial year.
- The collateral package or financial assurances in place in support of receivables minimises the probability of losses on this portfolio.
- For September 2022, more than 48.6% (2021: 50%) of the investments in debt securities and other bills have at least a BBB- based on Standards & Poor's Ratings.
- As per Note 3.a.x.d 'Risk limit control and mitigation policies- Liquidity Support Agreement', management is confident that given the agreement to transfer the benefits of such assurances by First Citizens Bank Limited to the Group, the Group would realise no losses on these assets. The amount outstanding to the Group stood at TT\$276.6M and US\$110.5M as at 30 September 2022 (2021: TT\$258.5M and US\$106.97M) and continues to accrue interest.
- The Group's portfolio carries exposure to the credit risk of the Government of Barbados securities which at the consolidated statement of financial position date accounted for BB\$115M, 6.703% of the value of Investment Securities (2021: BB\$107M, 5.49%). Included in this portfolio are POCI bonds with a face value of BB\$131,997,672 (2021: BB\$131,997,672).
- The Group's exposure to the GORTT debt included in financial assets as at 30 September 2022 was TT\$1.7B, 28.09% (2021: TT\$1.8B, 26.6%).
- (xii) Financial assets

Included in amortised cost past due but not impaired are amounts due from CL Financial and its affiliates of \$1B which matured but are indemnified under the Liquidity Support Agreement (LSA) (2021: \$974.4M). All principal and interest payments due on these advances are covered under the LSA as detailed in 3.a.x.d.

Further, the material indemnified amount outstanding under the Liquidity Support Agreement represents certain Promissory Note and Commercial Paper obligations which were and are due and owing by CL Financial Limited to CMMB (now First Citizens Investment Services Limited ("FCIS"). The GORTT has since petitioned to the Court to wind up CL Financial on the basis that the CL Financial was unable to pay its debts and or that it was just and equitable that the Company be wound up. On 25th July 2017, the Court of Appeal, ordered the appointment of a joint provisional liquidator over the assets of that company pending the determination of the winding up petition.

It is against this background that management made a formal claim/demand by the submissions of (Claim #14) indicating the Bank's intention to claim the full settlement by 30 September 2021 in accordance with the Bank's right to be indemnified in respect of those obligations under the terms of the LSA.

The GORTT in its letter dated 9 September 2022 stated its execution of an extension of the LSA for the period 1 March 2023 to 29 February 2024.

As at the Statement of Financial Position date, the total outstanding under the LSA was US\$110.5M and TT\$276.6M.

3 Financial risk management (continued)

- a. Credit risk (continued)
 - (xiv) Loss allowance

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- Transfers between Stage 1 and Stages 2 or 3 due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequent step up (or step down) between 12-month and Lifetime ECL;
- Additional allowances for new financial instruments recognised during the period, as well as releases for financial instruments de-recognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models;
- Impacts on the measurement of ECL due to changes made to models and assumptions;
- Discount unwind within ECL due to the passage of time, as ECL is measured on a present value basis;
- Foreign exchange retranslations for assets denominated in foreign currencies and other movements; and
- Financial assets derecognised during the period and write-offs of allowances related to assets that were written off during the period.

(xv) Write-off policy

The Group writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the Group's effort to dispose of repossess collateral is such that there is no reasonable expectation of recovering in full.

The Group may write-off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off during the year ended 30 September 2022 was nil (2021: nil). The Group still seeks to recover amounts it is legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

a. Credit risk (continued)

(xvi) Concentration of risks of financial assets with credit risk exposure - Geographical sectors

The following table breaks down the Group's main credit exposure at their carrying amounts, as categorised by geographical region. For this table, the Group has allocated exposures to regions based on the country of domicile of its counterparties. The Group's investment portfolio, comprising cash and cash equivalents, financial assets – receivables, fair value through other comprehensive income, amortised cost, held for trading and repurchase receivables, is diversified across 32 countries. Limits for each country are reviewed on an annual or more frequent basis and the exposures are monitored on a daily basis. The country exposures are categorised into five regional sectors and the sector concentrations within the portfolio are as follows:

	Asia \$000	North America \$000	South & Central America \$000	Caribbean \$000	Other countries \$000	Total \$000
Cash and due from Banks Financial assets: - Fair value through other		7,069		445,547		452,616

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

b. Market risk

The Group takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The market risks arising from trading and non-trading activities are measured separately by the First Citizens Group Market Risk department who submit reports to the Senior Management Enterprise Risk Management Committee on a regular basis and also reports via the First Citizens Group Enterprise Risk Management Unit to the Board Enterprise Risk Management Committee to enable Board oversight of market risk issues. Additionally, on a monthly basis, the First Citizens Group's Pricing Committee reviews and approves the yield curves used to value all investment securities and reports on this into the Group ALCO. This Committee also provides for the consideration of the Group ALCO technical information that may be relevant to current and developing market conditions from time to time.

Trading portfolios are those positions entered into primarily to take advantage of market movements to generate capital gains.

Non-trading portfolios primarily arise from investments held as collateral for repurchase agreements. Non-trading portfolios also entail foreign exchange and equity risks arising from the Group's amortised cost and fair value through other comprehensive income investments.

(i) Market risk measurement techniques

As part of the management of market risk, the Group uses duration management and other portfolio strategies to manage market risk. The major measurement techniques used to measure and control market risk are outlined below.

Value at risk

The Group applies a 'value at risk' methodology (VAR) to its trading and non-trading portfolios, to estimate the market risk of positions held and the maximum losses expected, based upon a number of assumptions for various changes in market conditions. VAR measurements capture potential losses arising from changes in interest rates and foreign exchange rates. The Board sets limits on the value of risk that may be accepted for the Group's, trading and non-trading portfolios, which are monitored on a daily basis by First Citizens Group Market Risk Unit.

VAR is a statistically based estimate of the potential loss on the current portfolio from adverse market movements. It expresses the 'maximum' amount the Group might lose, at a certain level of confidence (99%) under normal market conditions.

The First Citizens Group Market Risk calculates VAR using a 99% confidence level. The VAR model assumes a certain 'holding period' until positions can be closed (10 days for Eurobonds and 30 days for other securities). For comparability purposes the 1-day VAR for the portfolio segments are disclosed in the following section. A parametric approach is used in calculating VAR which uses the volatility, correlation and relative weights of the securities in the portfolio. Actual outcomes are monitored regularly to test the validity of the assumptions and parameters/factors used in the VAR calculation.

The use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Notes to the Consolidated Financial Statements (continued) 30 September 2022 (Expressed in Trinidad and Tabage Dollars)

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- b. *Market risk (continued)*
 - (i) Market risk measurement techniques (continued)

Value at risk (continued)

Actual exposure against limits is monitored by Risk Management on a daily basis. There are Board approved limits set on the portfolio VAR. A breach in these limits would trigger actions by the management of the Group to reduce risk on the portfolio. These actions can include hedging of the portfolio or specific positions or sale of securities to bring the portfolio back within limit.

The quality of the VAR model is continuously monitored by back-testing the VAR results. All back-testing exceptions and any exceptional revenues on the profit side of the VAR distribution are investigated.

Stress tests

Stress tests provide an indication of the potential size of losses that could arise in extreme conditions. The stress tests carried out by risk management include interest rate stress testing, where movements in the yield curve are applied to each investment.

The Group stressed test the portfolio at 30 September 2022 based on a 100 basis point (1%) upward parallel shift in all yield curves which resulted in unrealized mark to market losses of \$205.68M (2021: \$294.48M).

The results of the stress tests are reviewed by senior management, the Risk Management Committee and by the Board of Directors.

Based on net foreign currency positions at 30 September 2022 and 2021, the effect of a 2.5% depreciation in the Trinidad and Tobago dollar against the respective currencies is as follows:

	USD \$'000	EC \$'000	JMD \$'000	BBD \$'000
At 30 September 2022 Gain/(loss)	14,561	(3,371)	10,996	1,079
At 30 September 2021 Gain/(loss)	20,575	(3,778)	11,185	921

3 Financial risk management (continued)

- b. Market risk (continued)
 - (ii) Foreign exchange risk

The Group takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. It is the policy of the Group not to engage in speculative foreign exchange activities, The Board sets limits on the level of exposure by currency and in aggregate for all positions, which are monitored periodically. The Group's strategy of managing this risk is to buy low and sell high; establish relationships with corporate foreign exchange earners; limit foreign exchange exposure; avoid speculation with an aim to keep a balanced position; and match foreign currency denominated liabilities. The Group does not currently engage in any hedging activities to mitigate currency risk. The table below summarises the Group's exposure to foreign currency exchange rate risk at 30 September 2022. Included in the table are the Group's financial instruments at TTD equivalents, categorised by currency.

Included in the "Other" category are assets and liabilities held in UK pound sterling, Euro and Canadian dollars. A 1% increase or decrease in any of these currencies would not significantly impact the Group's profit.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- b. Market risk (continued)
 - (iii) Interest rate risk

Interest rate risk management focuses on potential changes in net interest income resulting from changes in interest rates, product spreads and mismatches in the re-pricing between interest rate sensitive assets and liabilities. Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may also reduce resulting in losses in the event that unexpected movements arise. The Group's objective in the management of its interest rate risk is to reduce the sensitivity of its earnings and overall portfolio value to fluctuations in the interest rate. The table below summarises the Group's exposure to interest rate risks.

	Up to 1 month \$'000	1 to 3 months \$'000	3 to 12 months \$'000	1 to 5 years \$'000	Over 5 years \$'000	Non- interest bearing \$'000	Total \$'000

Interest rate risk management focuses on potential changes in net interest income resulting from changes in interest rates, product spreads and mismatches in the re-pricing between interest rate sensitive assets and liabilities. If interest rates were to move by 1%, the impact on net interest income would be \$12.6M (2021: \$18.3M).

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- b. Market risk (continued)
 - (iv) Other price risk

Other price risk arises due to the possibility that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Group is affected by changing prices of equity instruments mainly classified as fair value through other comprehensive income securities with fair value movements recognised in shareholders' equity. These investments are held for strategic reasons and risk is managed via exposure limits. As at 30 September 2022, the Group's significant holding is as follows:

	Originating currency JMD '000	Functional currency TTD '000
Equities instruments recognised in OCI		
As at 1 October 2021		
Equity Instruments	9,813,140	438,647
Additions		
Disposals		
FX		(7,850)
MTM Movement	(17,251)	(757)
As at 30 September 2022	9,795,889	430,040
Equities instruments recognised in OCI		
As at 1 October 2020		
Equity Instruments	5,203,838	246,142
Additions	3,029,200	137,079
Disposals		
FX		(15,204)
MTM Movement	1,580,102	70,630
As at 30 September 2021	9,813,140	438,647

Price sensitivity

These securities are listed in Jamaica; if prices for equity securities listed in Jamaica move by 15% with all other variables including tax being held constant, the effects on the other comprehensive income would have been TT\$64.5M in 2022 and TT\$65.8M in 2021.

FX sensitivity

If the JMD appreciates by 250 basis points against the USD, the OCI would increase by TT\$4.3M (2021: increase by TT\$4.3M). The average change for the last three (3) years was 44 basis points (2021: 35 basis points). The change for 2022 was 25 basis points (2021: 51 basis).

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

c. Liquidity risk

The liquidity risk is the risk that the Group will be unable to generate or obtain sufficient cash or its equivalent in a timely and cost-effective manner to meet its commitments when they fall due under normal and stress circumstances and arises from fluctuation in cash flows. The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits and funds under management, loan draw downs, guarantees and from margin and other calls on cash settled derivatives. The Group does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty.

Liquidity risk management process

The First Citizens Group's liquidity management process is carried out by the Treasury and International Trade Centre and monitored by the Group's Asset/Liability Committee (ALCO). The First Citizens Group's liquidity management framework is designed to ensure that there are adequate reserves of cash and other liquid securities to satisfy current and prospective commitments arising from either on-statement of financial position or off-statement of financial position liabilities. The Group relies on a broad range of funding sources and applies prudent limits to avoid undue concentration. Current and projected cash flows are monitored, together with diversification of funding and contingency planning, and ensuring that funding disturbances are minimised. The Group manages liquidity risk using both expected and contractual cash flows through its investment portfolio strategy for its business model. The Group would also be able to meet unexpected net cash outflows by accessing additional funding sources such as the existing facility with its parent company, asset-backed financing from commercial banks and securities brokers.

Compliance with liquidity policies and risk limits is tracked by First Citizens Group Market Risk Unit and reported into the Senior Management Enterprise Risk Management Committee and via the First Citizens Group Enterprise Risk Management Unit to the Board Enterprise Risk Management Committee.

Assets available to meet all of the Group's liabilities include cash and due from banks; receivables and liquid debt securities. In the normal course of business, a proportion of liabilities to customers under securities sold under repurchase agreements repayable within one year will be extended. The Group's business model allows for the management of its liquidity risk using both expected and contractual cash flows. The Group would also be able to meet unexpected net cash outflows by accessing additional funding sources such as the existing facility with its parent company, asset-backed financing from commercial banks and securities brokers.

(i) Assets held for managing liquidity risk

The Group holds a diversified portfolio of cash and high-quality highly-liquid securities to support payment obligations and contingent funding in a stressed market environment. The Group's assets held for managing liquidity risk comprise:

- (a) Cash deposits at Bank
- (b) Government bonds
- (c) Secondary sources of liquidity in the form of liquid instruments in the Group's investment portfolios.
- (ii) Loan commitments

As at 30 September 2022 the Group has no financial instruments that commit it to taking up new receivables or other debt securities (2021: nil).

(iii) Capital commitments

At 30 September 2022, the Group had capital commitments towards Information Communication Technology (ICT) projects to the value of \$3,244,745 (2021: \$2,634,833).

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

d. Fiduciary activities

The Group provides custody, mutual funds and investment management services to third parties which involve the Group making allocation and purchase and sale decisions in relation to a wide range of financial instruments. Those assets that are held in a fiduciary capacity are not included in these consolidated financial statements.

- e. Fair value of financial assets and liabilities
 - (i) Financial instruments not measured at fair value

The table below summarises the carrying amounts and fair values of those financial assets and liabilities not presented on the Group's consolidated statement of financial position at their fair value.

	Carrying value		Fair value	
	Sept 2022 \$000	Sept 2021 \$000	Sept 2022 \$000	Sept 2021 \$000
Financial assets				
Cash and due from Banks	452,616	265,085	452,616	265,085
Financial assets at amortised cost	3,734,961	3,939,450	3,781,411	3,947,178
Other assets	26,512	31,149	26,512	31,149
Financial liabilities				
Borrowings				
and bank overdraft	1,292,720	1,518,109	1,489,393	1,772,113
Funds under management	6,221	6,420	6,283	6,420
Securities sold under				
repurchase agreement	3,280,111	3,356,300	3,515,955	3,423,808
Loan from parent company	257,017	362,740	257,017	362,740
Creditors and accrued expenses	130,113	109,342	130,113	109,342

The fair values of the Group's financial instruments are determined in accordance with International Financial Reporting Standards (IFRS) 9 "Financial instruments: Recognition and Measurement". The fair value of the borrowings and securities sold under repurchase agreements are based on the fair value of the financial assets of the underlying securities less the accrued interest.

Financial instruments where carrying value is equal to fair value

Due to their liquidity and short-term maturity, the carrying values of certain financial instruments approximate their fair values. Financial instruments where carrying value is approximately equal to fair value include cash and due from banks.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

- e. Fair value of financial assets and liabilities (continued)
 - (i) Financial instruments not measured at fair value (continued)

Amortised cost investments

Fair value for amortised cost assets is based on market prices or broker/dealer price quotations. Where this information is not available, fair value is estimated using a discounted cash flow valuation methodology where all cash-flows of the instruments are discounted at an appropriate yield plus a credit spread where applicable. The fair value of the amortised cost portfolio is computed for disclosure purposes only.

Borrowings, Funds under Management and Securities sold under Repurchase Agreements

The above include maturities ranging from 1 day to 5 years and are subject to interest reset on a regular basis. The fair value of those amounts with maturities of less than one year is approximately equal to their carrying value. For long term fixed rate liabilities, the fair value of these amounts is estimated using fair value of the underlying securities and accrued finance cost to date.

Loan from parent company

The fair value of these facilities is calculated using discounted cash flow analysis of comparable GORTT borrowing rates for the term indicated, plus a spread consistent with the parent company credit rating September 2022 \$257M (2021: \$362.7M). These facilities accrue interest rates of 3 months LIBOR plus 275 basis point and 4%. If interest was accrued using the SOFR plus 275 basis point interest expense would decrease by \$432,128. The fair value of those amounts with maturities of less than one year is approximately equal to their carrying value.

(ii) Financial instruments measured at fair value using a valuation technique

The total amount of the change in fair value estimated using a valuation technique that was recognised in profit or loss during the period September 2022: \$nil (2021: nil).

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to these valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect The Group's market assumptions. These two types of inputs have created the following fair value hierarchy:-

- Level 1-Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges.
- Level 2-Measurements involving inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes debt instruments.
- Level 3-Measurements involving significant inputs for the asset or liability that are not based on observable
 market data (that is, unobservable inputs). This level includes equity investments and debt instruments with
 significant unobservable components.

First Citizens Investment Services Limited And Its Subsidiaries

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

3 Financial risk management (continued)

Fair value of financial assets and liabilities (continued) e.

Financial instruments measured at fair value using a valuation technique (continued) (ii)

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

3 Financial risk management (continued)

f. Capital management

The Group's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- To comply with the Securities Exchange Commission Repo guidelines
- To comply with the capital requirements set by the regulators of the securities markets where the Group operates;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns to shareholders and benefits for other stakeholders;
- To ensure that the Group can remain solvent during periods of adverse earnings or economic decline; and
- To ensure that the Group is adequately capitalised to cushion depositors and other creditors against losses.

Capital adequacy and the use of regulatory capital are monitored daily by the Group's management, employing techniques based on the requirements of the Trinidad and Tobago Securities and Exchange Commission (the Commission), for supervisory purposes. The required information is filed with the Commission on a regular basis as required.

The Commission requires each securities company to hold the minimum paid up share capital of Five Million Trinidad and Tobago dollars. In addition to the minimum level of regulatory capital, the Group's management also monitors capital adequacy using relevant national and international benchmarks. Capital adequacy calculations are reported monthly to the Group's Risk and Portfolio Strategy Committee, the Risk Management Committee and the Board of Directors.

The Group complied with all of the externally imposed capital requirements to which it is subject for the periods ended 30 September 2022 and 30 September 2021.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

4 Critical accounting estimates and judgements in applying accounting policies

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances:

a. Financial assets at fair value through other comprehensive income

For actively traded instruments, the Group uses market prices from approved primary sources, mainly broker prices and Bloomberg. These inputs are then used in conjunction with the discounted cash flow method to determine the fair value of fair value through other comprehensive income financial assets not traded in active markets. The discounted cash flow method discounts the cash-flows of the financial assets at an appropriate yield plus a credit spread where applicable. The carrying amount of fair value through other comprehensive income financial assets would decrease by \$71.43M if the discount rate used in the discounted cash flow analysis is increased by 100 basis points from management's estimates (2021 - \$125.45M).

The Group's credit spread methodology utilises gradient tenors and currency specific spreads. The appropriate credit spread for the agency or corporate fixed income security is determined using a cubic spline interpolation of the appropriate currency and credit rating category in the credit spread matrix based on the remaining tenor of the facility. This singular credit spread is then added to the discount spot rates to value the facility using the discounted cashflow method.

There were no changes to the Credit Spread Methodology this year. The models used to determine fair values are validated and periodically reviewed by experienced personnel at Group Market Risk.

The Group recognises equity financial instruments in other comprehensive income to facilitate its business activities and for portfolio diversification. These shares are traded in an active market and are recognised in level 1 (see note 3.e.ii). Equity financial instruments which are quoted was valued \$430.5M as at September 2022 (2021: \$438.6M). The remainder of equity financial instruments in other comprehensive income are unlisted. As at September 2022, these instruments were valued at \$10.1M (2021: \$9.5M). The Group's listed equity financial instruments which are recognised in fair value through profit or loss as at September 2022 was \$636K (2021: \$607K) (see note 8).

b. Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and fair value through other comprehensive income is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of debt instruments defaulting). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in note 3.a.vii. The main sensitivity to the ECL is in the macroeconomic overlay scenarios which are explained in note 3.a.viii.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Notes to the Consolidated Financial Statements (continued) 30 September 2022

(Expressed in Trinidad and Tobago Dollars)

4 Critical accounting estimates and judgements in applying accounting policies (continued)

c. Loss given default

The Loss Given Default rate on corporate senior unsecured bonds is estimated to be 60% based on the International Swaps and Derivatives Association standard Credit Default Swap contract specification for North American corporate issuers. The Loss Given Default rate on sovereign senior unsecured bonds is estimated to be 47% based on the average Loss Given Default rate on Sovereign bonds during the period 1983 to 2019 as reported by Moody's Investors Service.

d. Fair valuation of properties

The best evidence of fair value is current prices in an active market for similar lease and other contracts. In the absence of such information, the Group determines the amount within a range of reasonable fair value estimates. In making the judgement, the Group considers information from a variety of sources including:

- Current prices in an active market for properties of different nature, condition or location (or subject to different lease or other contracts), adjusted to reflect those differences;
- Recent prices of similar properties in less active market, with adjustments to reflect any changes in economic conditions since the date of the transactions that occurred at those prices; and
- Discounted cash flow projections based on reliable estimates of future cash flows, derived from the terms of any existing lease and other contracts and (where possible) from external evidence such as current market rents for similar properties in the same location and condition, and using discount rates that reflect current market assessments of the uncertainty in the amount.
- The First Citizens Group engages external, independent and qualified valuators to determine the fair value of the Group's land and buildings at least every three years. The last valuations were performed as at September 2021.

5 Cash and due from Banks

	2022 \$000	2021 \$000
Cash and due from Banks Short-term investments	449,422 3,194	261,914 3,171
	452,616	265,085
Short-term investments: - Maturity within 3 months - Maturity over 3 months	735 2,459	727 2,444
	3,194	3,171

The average effective interest rate on cash and due from bank was 0.59% (2021: 0.22%).

Term deposits are presented as cash equivalent if they have a maturity of three months or less from the date of acquisition and repayable within 24 hours' notice with no loss of interest.

Cash and cash equivalents include the following for the purposes of the consolidated statement of cash flow:

Cash and due from Banks	449,422	261,914
Short-term investments – maturity within 3 months	735_	727
	450,157	262,641

b. Recognised fair value measurements (continued)

(ii) Valuation techniques used to determine level 2 and level 3 fair values (continued)

The basis of valuation is the market value, which is defined as the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.

Changes in fair value are recorded in the statement of comprehensive income. The Group's policy is to obtain independent valuations for its freehold land and buildings at least every three years.

Level 3 fair values of land and retail units have been derived using the sales comparison approach. Commercial rental income of comparable land and buildings in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square foot.

If freehold premises were stated on the historical cost basis, the amount would be as follows:

	2022 \$000	2021 \$000
Cost	44,638	44,638
Accumulated depreciation	(12,168)	(10,885)
Net book amount	32,470	33,753
Lease liabilities		
Opening lease liability	1,211	1,905
Additions	4,858	
Disposals	(143)	
Interest expense	371	57
Repayment of lease principal	(2,010)	(751)
Lease liability	4,287	1,211
Current lease liability	590	729
Non-current lease liability	3,697	482
	4,287	1,211
Other assets		
	2022 \$000	2021 \$000

13 Borrowings

	2022 \$000	2021 \$000
Medium term borrowings Short term borrowings	485,273 807,447	275,251 1,242,858
	1,292,720	1,518,109

Medium term borrowings represent unsecured borrowings: US\$42.15M, and TT\$200M from clients for a period of one to three years (2021: US\$11.09M and TT\$200M). Interest on these debt instruments accrue at rates of 2.5% and 3.5% on the USD and on the TTD at 3.3% for the year ended September 2022 (2021: 2.9% USD and 3.3% TTD). The average rate as at the end of September 2022 was 3.10% (2021: 2.80%).

Short term borrowings represent two facilities, one of which matured in 2022 Nil (2021: US\$65M) and an existing facility of US\$120M (2021: US\$120M) which is secured by the Group's investment securities. Average interest rate 2.9% (2021: 2.93%). The market value of the investment security held as collateral for these facilities amounted to TT\$1,489M at September 2022 (2021: TT\$1,772M) (Note 3 e (i)).

14 Securities sold under repurchase agreements

Securities sold under repurchase agreements are analysed by sector as follows:

	2022 \$000	2021 \$000
Invested principal Accrued interest	3,242,333 37,778	3,310,796 45,504
	3,280,111	3,356,300
Public institutions Private institutions Consumer	1,152,815 1,125,569 1,001,727	1,112,367 1,179,119 1,064,814
	3,280,111	3,356,300
Current portion Non-current portion	2,789,521 490,590	2,950,082 406,218
	3,280,111	3,356,300

These financial instruments accrue interest at rates between 0.10% and 4% (2021: 0.03% and 4.83%).

15 Creditors and accrued expenses

	2022 \$000	2021 \$000
Accrued expenses Due to brokers Other liabilities Related parties	11,734 480 89,189 28,710	11,410 3,455 67,373 27,104
	130,113	109,342

Balances due to related parties include an amount of \$26.6M (2021: \$22.8M) owed to the Bank. This relates to an amount owing to GORTT by the Bank in respect of payments made on claims which were subsequently recovered pursuant to the Liquidity Support Agreement discussed in Note 3.a.ix.

Other liabilities balance as at 30 September 2022 includes amounts due for Equity and Bond settlements \$66.6M (2021: \$22.2M) and an amount of \$5.8M relating to discontinued products which were reclassified from funds under management to other liabilities in 2021.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago Dollars)

16 Loan from parent company

	2022 \$000	2021 \$000
Loan from parent company	257,107	362,740

This comprises two loan facilities:

1) Unsecured Medium Term US facility approved for US\$37.7M, at a rate of 4%. Drawn down balance as at September 2022: US\$37.7M (2021: US\$38.4M at 4%), repayable March 2025.

2) Line of credit approved for US\$25M. Drawn down balance as at September 2022: Nil (2021: US\$15M).

17 Deferred tax

Deferred taxes are calculated on all temporary differences under the liability method using tax rates of 30% for Trinidad and 5.5% for Barbados (2021: 30% and 5.5%).

The movement on the deferred tax account is as follows:	2022 \$000	2021 \$000
At beginning of year Statement of income charge (Note 29) Statement of Other Comprehensive Income - Fair Value Reserves – (Note 19)	113,227 (4,181) (98,992)	120,387 (26,150) 18,990
	10,054	113,227

Deferred tax assets and liabilities, the deferred tax charge/credit in the statement of income and fair value reserve – financial assets are attributable to the following items:

	Opening balance Oct 2021 \$'000	Statement of Other Comprehensive Income -Fair Value Reserves \$'000	(Credit)/Charge to statement of income \$'000	Closing balance Sept 2022 \$'000

19 Other reserve

i Fair value reserve – Financial assets

For debt financial assets, the fair value reserve comprises the cumulative net change in the fair value of the fair value through other comprehensive income financial assets, net of deferred tax, until the assets are derecognised or impaired. For equity financial assets, any movement in fair value is recognised through other comprehensive income and are not recycled to the consolidated statement of income.

iii Fair value reserve – Land and buildings

The fair value reserve comprises of the net fair value of the Group's land and building, which are valued by an independent valuator every three years.
